ORGANIZATION

THE ECCLESIASTICAL ORGANIZATION OF THE CHURCH

The organization of the Church consists of:

(1) Patriarchs, Archbishops and Bishops in countries under the common law of the Church.

(2) Abbots and Prelates "nullius dioceseos".

(3) Vicars Apostolic and Prefects Apostolic in countries classified as Missionary and under Propaganda, the former having Episcopal dignity.

Accuracy cannot be guaranteed for the following particulars. They are compiled from statistics gathered from different sources and dates. They will serve, however, as a reliable outline picture.

The total population of the world was estimated in 1974 at 3,873,733,000; the Catholic population at 705,028,000, about 18.3 per cent.

Among the Pope's titles is that of Patriarch of the West. There are five other Patriarchates of the Latin Rite—

Jerusalem, the West Indies, the East Indies, Lisbon and Venice. The Eastern Catholic Churches each have Patriarchs: Alexandria for the Coptic Rite, Babylon for the Chaldean Rite, Cilicia for the Armenian Rite, and Antioch for the Syrian, Maronite and Melchite Rites.

There are 2,219 residential sees—13 patriarchates, 424 metropolitan archbishoprics, 57 archbishoprics and 1,716 bishoprics. Of the 1,983 titular sees (92 metropolitan archbishoprics, 89 archbishoprics and 1,802 bishoprics), 1,190 are filled by priests who have been given these titles, but exercise no territorial jurisdiction. Other territorial divisions of the Church include 101 prelacies, 22 abbacies nullius, 12 apostolic administrations, 26 exarchates of the Eastern Church, 78 apostolic vicariates, 67 prefectures and 4 missions 'sui iuris'.

The above figures refer to the state of the Church on November 30th, 1975.

RADIO

Radio Vatican: Vatican City and Santa Maria di Galeria;
Dir.-Gen. ROBERTO P. TUCCI, S.J.; Dir. of Programmes
JORGE P. BLAJOT, S.J.

Radio Vatican was founded in 1931 and situated within the Vatican City. A new transmitting centre, inaugurated by Pius XII on October 27th, 1957, has been added and is located at Santa Maria di Galeria, about twelve miles north-west of the Vatican. Under a special treaty between the Holy See and Italy the site of this new centre, which covers about 1,037 acres, enjoys the same extra-territorial privileges as are recognized by international law to the diplomatic headquarters of foreign States.

The station operates an all-day service, normally in thirty-one languages, but with facilities for broadcasting liturgical and other religious services in additional languages, including Latin.

The purpose of the Vatican Radio is to broadcast Papal teaching, to provide information on important events in the Catholic Church, to express the Catholic point of view on such problems as touch upon religion and morality, but above all to form a continuous link between the Holy See and Catholics throughout the world.

There is no television service.

YUGOSLAVIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Socialist Federal Republic of Yugoslavia has a long western coastline on the Adriatic Sea. It is bounded to the north by Italy, Austria and Hungary, by Romania and Bulgaria to the east, with Greece and Albania to the south. The climate is continental in the hilly interior and Mediterranean on the coast, with a steady rainfall throughout the year. The average summer temperature in Belgrade is 22°C (71°F), the winter average being 0°C (32°F). Serbo-Croat is spoken by Croats, Montenegrins and Serbs; Macedonians and Slovenes use their own languages. All three are official languages. Religion is separate from the state; about two-fifths of the population belong to the Orthodox Church and one-third to the Roman Catholic Church. There are also a considerable number of Muslims and several other small Christian communities. The national flag (proportions 2 by 1) consists of blue, white and red horizontal stripes, with a five-pointed, gold-edged red star in the centre. The capital is Belgrade.

Recent History

Following the struggle of the Partisans against the German occupation during the Second World War, the Monarchy was abolished and a Republic set up in 1945 under the leadership of Marshal Tito. Refusing to accept Soviet hegemony, Yugoslavia was expelled from the Cominform in 1948 after which it formed closer relations with the West. Following the death of Stalin, its relations with the Soviet Union were normalized but have subsequently been subjected to periodical strain, as at the time of the Soviet-led invasion of Czechoslovakia in August 1968, when Yugoslavia condemned Soviet actions and took active measures to strengthen its defences. Yugoslavia has for many years followed a policy of non-alignment in its foreign relations and holds a prominent place among the non-aligned countries.

President Tito has consistently attempted to put real power into the hands of the working people, encouraging the devolution of power from the Federation to the Constituent Republics and the system of workers' control in industry. Many difficulties have been encountered in the implementation of these policies during a period of rapid economic development. Political trials have been frequent, leading to the suspension or imprisonment of dissident intellectuals in universities and among the press. However, in November 1977 an amnesty for most political prisoners was announced. In industry the policy of workers' self-management continues to be reinforced, managers who disregarded this policy have been dismissed. Early in 1975 a Federal Council for the Defence of the Constitutional Order was formed to safeguard internal order further. The constitution adopted in February 1974 aimed at involving the working class directly in the exercise of political power at all levels, reducing the role of bureaucrats and professional politicians. A major role is envisaged for the League of Communists, the leadership of which is expected to be reorganized in 1978.

Government

Yugoslavia is a Socialist Federal Republic comprising the Republics of Serbia, Croatia, Macedonia, Montenegro, Slovenia and Bosnia-Herzegovina, as well as the autonomous provinces of Kosovo and Vojvodina. A collective Presidency, consisting of one representative of each republic and autonomous province and the President of the League of Communists, exercises the rights and duties of Head of State. In May 1974 President Tito was proclaimed President "with no limitation as to the duration of the mandate" by the SFRY Assembly. The Presidency, which is elected by the SFRY Assembly, is assisted by a Federal Executive Council, the administrative branch of government.

The SFRY Assembly is composed of two chambers. The Federal Chamber consists of 30 delegates from each of the six republics and 20 delegates from each of the two provinces, while the Chamber of Republics and Provinces consists of 12 delegates from each Republican Assembly and 8 from each Provincial Assembly. A delegate is chosen by each basic self-managing organization or community, a grouping of people in their place of work or residence. These delegates then choose further delegates for higher levels of government. Delegates are not to be managers, executives or career politicians, but ordinary working people, and they do not relinquish their jobs during their four-year term of office.

Defence

The Republic has no defensive alliances. Military service is compulsory, and lasts for 15 months in the army and air force, and 18 months in the navy. In 1977 the total strength of the armed forces was 260,000, comprising an army of 193,000, navy 27,000 and air force 40,000. There are 16,000 Frontier Guards, and a territorial defence force of 600,000. The system of Total National Defence, in case of war, covers all citizens from 15 to 65 years of age. The 1977 budget set defence expenditure at 30,000 million dinars.

Economic Affairs

The rapid development of heavy and light industry since the end of the Second World War has reduced the proportion of the working population employed in agriculture from 80 per cent to less than 40 per cent. In recent years, agricultural production has been helped by the extension of mechanization. The main crops are wheat, maize, sugar beet, sunflowers and potatoes. There are many forests, orchards and vineyards, and abundant livestock. Since record harvests in 1966, 1967 and 1969, wheat imports have ceased and the country is self-sufficient in chemical fertilizers. In the industrial sector there has been a marked increase in the production of electric power, crude oil and its derivatives, non-ferrous metals, machinery, motor cars, shipbuilding, electronics, paper, food and other consumer goods.

In 1965 extensive reforms were introduced with the aim of consolidating the leading role of the League of Communists.

reorientating the economy away from central control and establishing a free market economy. Yugoslavia has since experienced a sharp rise in imports and a growth in the visible trade deficit, as well as a high rate of inflation. These problems have been countered by devaluation of the dinar in January and December 1971, and by a series of freezes on wages and prices. Yugoslavia continues to have a large foreign trade deficit, and severe import restrictions were introduced in 1975 to counteract this trend. A deficit of U.S. \$2,500 million was recorded in 1976, two-thirds of which was with EEC countries.

The Five-Year Plan for 1971-75 envisaged an annual growth rate of 7.5 per cent in the material product, but an overall growth rate of only 5.5 to 6 per cent was achieved. This was sufficient to provide employment for a rising population and an increasing number of workers returning from temporary employment abroad. The dinar was devalued by 7 per cent in October 1974 because of a growing trade deficit caused by the rising price of imports.

The 1976-80 Plan aims at an average annual increase of 7 per cent in the GNP. Industry should achieve a growth rate of 8-9 per cent each year, with the emphasis being placed on producer goods. Agriculture is expected to expand by 4 per cent annually, and investment should rise by 8.5 per cent. Wages should increase by 6 per cent per year. In 1976 GNP went up by 3.6 per cent in real terms, and the industrial sector registered a growth of 3.4 per cent.

Yugoslavia has participated in certain activities of CMEA (Council for Mutual Economic Assistance) since 1965, and in 1976 trade agreements were signed with all European CMEA countries; as a result, Yugoslavia's CMEA trade should more than double by 1980. Trade with the Third World is also increasing. Yugoslavia became a full member of GATT (General Agreement on Tariffs and Trade) in 1966. The EEC has become one of Yugoslavia's most important trading partners, accounting, in 1970, for 35 per cent of its total trade and further co-operation was initiated in 1976.

Transport and Communications

Yugoslavia has 9,967 km. of railways, of which 2,649 km. have been electrified. There are 101,607 km. of road, of which 41,018 km. are asphalt, concrete or similar roads, and 35,980 km. are macadamized; both figures are increasing as many new roads are currently under construction. The state airline, Jugoslovenski Aerotransport, (JAT) provides internal and international services. Yugoslav shipping lines have a fleet of 352 vessels totalling 1,877,000 tons (1976). The principal Adriatic ports are Rijeka, Split, Ploče, Bar, Dubrovnik and Koper. The Danube is the chief inland waterway, the chief ports being Novi Sad and Belgrade.

Social Welfare

All employed persons and their families are covered by general social insurance schemes. This form of insurance is obligatory and is enforced by law. Insurance provides for health insurance, money and grants in kind in case of sickness, accidents at work or elsewhere, disablement, old-age and death. The social insurance funds are managed by the insured persons themselves organized in communal, republican and federal social insurance associations. Insured persons are entitled to medical care and services in

health institutions and at their homes, including compensation in money during sick leave, rehabilitation and preventive care. The duration of this form of insurance is unlimited. The right to most benefits is acquired on the day of insurance, i.e. the day of employment.

In 1975 there were 127,645 hospital beds, 3,822 general clinics and 2,678 dental clinics, as well as a wide network of medical guidance centres, children's clinics and anti-tubercular dispensaries. The number of doctors has increased from 14,354 in 1962 to 31,059 in 1975, but there is still a shortage in some rural areas.

The right to a retirement pension and its amount depend on the total of the contributions paid into the retirement insurance funds and on the period of time over which these payments were made. Insured persons are entitled to a full pension, which is equivalent to 85 per cent of their average monthly income during the last five years of employment, after a 40-year term of employment for men and 35-year term for women regardless of age. The right to a pension is also acquired upon reaching 60 years of age (55 for women) and a 20-year term of employment, or 65 years of age and a 15-year term of employment. Women and young children enjoy special protection under the health insurance scheme. Employed women are entitled to 180 days' paid leave before and after confinement. Confinements in hospital and maternity care are free of charge, whether the woman is employed or not. Women are entitled to shorter working hours until their child is 8 months old.

There is workers' self-management in Yugoslavia. A 42-hour week is guaranteed by the Constitution. All workers are entitled to annual leave which varies from 14 to 30 days, depending on the nature of their work.

Education

The entire educational system is organized at republican and local authority level. Elementary education is free and compulsory for all children between the ages of 7 and 15, when Yugoslav children attend the "eight-year school". Various types of secondary education are available to all who are able to qualify, but it is the vocational and technical schools which are most popular and attract the bulk of the country's youth. Alternatively, a child may attend a general secondary school (gymnasium) where he follows a four-year course which will take him up to university entrance. At the secondary level there are also a number of art schools, apprentice schools and teacher-training schools, which train teachers for the elementary schools over a period of five years. Those who have attended the technical schools may pursue their education further at one of the two-year post-secondary schools, which were created in response to the needs of industry and the social services for people trained above the secondary level. Higher education is run on a very open system and is available to all who can qualify, irrespective of their school background. Apart from the 18 universities and the post-secondary schools, there are also a number of schools of higher learning for teachers who have completed the courses at training schools. There are special facilities for adult education at evening schools, and in part-time studies.

Tourism

Tourist attractions include the mountains, the great lakes of Scutari, Prespa and Ohrid in the south, the

Federal capital of Belgrade and the other republican capitals, and, most particularly, the Adriatic resorts, where considerable hotel development has taken place in recent years.

The expansion of the tourist industry in Yugoslavia has been remarkable in recent years, and tourism is now an important source of foreign currency. In 1976, 5,572,000 foreign tourists visited the country.

Sport

The main sports are football, athletics, swimming, boxing, table tennis and basketball.

Public Holidays

1978: May 1st (Labour Day), July 4th (Fighters' Day), Republican Holidays*, November 29th and 30th (Republic Days).

1979: January 1st and 2nd (New Year).

*Each republic observes a holiday on the following dates:

July 7th (Serbia), July 13th (Montenegro), July 22nd (Slovenia), July 27th (Croatia and Bosnia-Herzegovina), August 2nd, October 11th (Macedonia).

Weights and Measures

The metric system is in force.

FINANCE

100 para = 1 Yugoslav dinar.

Coins: 5, 10, 20 and 50 para; 1, 2, 5 and 10 dinars.

Notes: 5, 10, 100, 500 and 1,000 dinars.

Exchange rates (October 1977): £1 sterling = 32.19 new dinars; U.S. \$1 = 18.14 new dinars;

100 Yugoslav dinars = £3.11 = \$5.51.

Note: From January 1966 to January 1971 the central exchange rate was U.S. \$1 = 12.50 new dinars (1 dinar = 8 U.S. cents). Between January and August 1971 the rate was \$1 = 15.00 dinars. From December 1971 to July 1973 it was \$1 = 17.00 dinars. In terms of sterling, the exchange rate was £1 = 30.00 dinars from November 1967 to January 1971; £1 = 36.00 dinars from January to August 1971; and £1 = 44.30 dinars from December 1971 to June 1972. Since July 1973 the dinar has been allowed to "float". The exchange rate against the U.S. dollar is adjusted from month to month. The average rate (dinars per U.S. dollar) was 16.189 in 1973; 15.913 in 1974; 17.386 in 1975; 18.193 in 1976. However, the value of foreign trade is still calculated according to the 1972 rate of U.S. \$1 = 17.00 dinars.

THE CONSTITUTION

(1974)

The Constitution of the Socialist Federal Republic of Yugoslavia (SFRY), adopted February 21st, 1974, is the fifth constitutional act promulgated in the new Yugoslavia. The first constitutional act establishing Yugoslavia as a federated state was adopted in the form of decisions taken by the Second Session of the Anti-Fascist Council of the National Liberation of Yugoslavia of November 29th, 1943. The first Constitution, promulgated in 1946, introduced the system of People's Democracy and state ownership of the basic means of production. The constitutional law adopted in 1953 brought an essential change in the statist concept of the organization of the state and society, and inaugurated the system of self-management in the economy, as well as in other spheres of the life of society. The Constitution enacted in 1963 raised the right of the working people to self-management to the level of a constitutional norm. A total of 42 amendments were made to that Constitution, in 1967, 1968 and 1971, consolidating the leading role of the working class in society and establishing new relations between the Federation and the constituent republics and provinces on the basis of full equality. These amendments, and particularly those of 1971, represented an introduction to the reform of the constitution which was completed with the promulgation of the new Constitution of the SFRY.

INTRODUCTION

The introductory section of the Yugoslav Constitution contains ten chapters dealing with basic principles. The first chapter states:

"The peoples of Yugoslavia, taking as their point of departure the right of every nation to self-determination, including the right of secession; on the basis of their will freely expressed in the common struggle in the National Liberation War and socialist revolution; and in line with their historical aspirations, aware that the further consolidation of their fraternity and unity is in the common interest, have, together with the nationalities with whom they live side by side, united into a federal republic of free and equal peoples and nationalities and created a socialist federal community of working people—the Socialist Federal Republic of Yugoslavia, in which, in the interest of each nation and nationality individually and collectively, they are implementing and assuring:

- socialist social relationships based on self-management by the working people and the protection of the socialist system of self-management;
- national freedom and independence;
- the fraternity and unity of the nations and nationalities;
- the integral interests of the working class and the solidarity of the workers and all working people;
- the possibility and freedom for the comprehensive development of the human personality and for rapprochement among men, nations and nationalities, in line with their interests and aspirations along the road of creating a richer culture and civilization for the socialist society;
- the unification and coordination of efforts to develop the material foundations of socialist society and prosperity for the people;
- the system of socio-economic relationships and the integral foundations of the political system for the purpose of pursuing the joint interests and assuring the equality of the nations and nationalities, and the working people; the integration of their own aspirations with the progressive aspirations of mankind.

The working people, the nations and nationalities exercise their sovereign rights in the socialist republics and in the socialist autonomous provinces in line with their constitutional rights, and in the Socialist Federal Republic of Yugoslavia where this is established by the Constitution of the SFRY as being in the common interest.

The working people, the nations and nationalities make their decisions at federal level in line with the principles of agreement between the republics and autonomous provinces; solidarity and mutuality; equitable participation by the republics and autonomous provinces in federal organs in accordance with this Constitution; and the responsibility of the republics and autonomous provinces for their own development and for the development of the socialist community as a whole".

It is stated in the second chapter that the inviolable foundation for the position and role of man is social ownership of the means of production; the emancipation of labour and the transcendence of historically conditioned socio-economic inequalities and dependence of people in labour; the right to self-management; the right of the working man to enjoy the fruits of his labour and the material progress of the social community; the economic, social and personal security of man; democratic political relationships, etc. The third chapter deals with social ownership, as a reflection of socialist socio-economic relationships among people; the fourth chapter with the working class and working people as the bearers of power and management of social affairs; the fifth chapter with the liberties, rights, duties and responsibilities of individuals and citizens; the sixth chapter with the determination of the working people and citizens, the nations and nationalities of Yugoslavia consistently to pursue a policy of peace and against war and aggressive pressures of any kind whatsoever; the seventh chapter with the international position and foreign policy of Yugoslavia inspired by peaceful coexistence and the principles of non-alignment; the eighth chapter with the League of Communists of Yugoslavia which, by its guiding ideological and political activity in conditions of socialist democracy and social self-management, represents the basic moving force and vehicle of political activity, and also with the role and activities of other socio-political organizations; the ninth chapter with the socio-economic and political system and the tenth chapter with the basic principles as a "component part of the Constitution and the basis and direction for interpreting the Constitution and the laws and for the activity of one and all"

PARTS I-II

Part one, with nine articles, is devoted to the Socialist Federal Republic of Yugoslavia as a "federal state, a state community of voluntarily united peoples and their socialist republics and the socialist autonomous republics of Kosovo and Vojvodina which are part of the Socialist Republic of Serbia, based on the government and self-management of the working class and all working people and on the socialist, self-management, democratic community of working people and citizens and equal nations and nationalities".

Part two is devoted to the social order. Chapter I consists of Articles 10 to 87 and deals with the socio-economic position of man in associated labour, the integration of labour and the means of social reproduction, the self-managed communities of interest, social planning,

information systems, socio-economic status and association of farmers, independent personal labour with means owned by citizens, legal property relations, goods of general interest and the protection of the human environment. Chapter II deals with the foundations of the socio-economic system and contains Articles 88 to 152 which regulate the position of the working people in the socio-political system, self-management in the organizations of associated labour, self-management in the self-managed communities of interest, self-management in the local communities, the position of the commune as a self-managed and basic socio-political community founded on the power and self-management of the working class and all working people, self-management agreements and social compacts, the protection by society of the rights of self-management and social property, the foundations of the assembly system which rests on the principle of delegates as a new form of direct participation by the working people in the management of society's affairs from the local communities to the federation. Chapter III from Articles 153 to 203 deals with the liberties, rights, duties and responsibilities of man and citizen, pursued "in mutual solidarity and through the fulfilment of the duties and discharge of responsibilities of each toward all and all toward each". Chapter IV from Articles 204 to 216 is dedicated to constitutionality and legality. Constitutionality and the rule of law are the concern of the courts, self-managed judicial organs, organs of the socio-political communities, organizations of associated labour and other self-managed organizations and communities and the bearers of self-management, public and other social functions. Chapter V from Articles 217 to 236 deals with the judiciary and public prosecutor and Chapter VI from Articles 237 to 243 with national defence. Article 237 states: "It is the inviolable and inalienable right and duty of the nations and nationalities of Yugoslavia, of the working people and citizens, to protect and defend the independence, sovereignty, territorial integrity and socio-political system of the SFRY, the latter having been established by the Constitution of the SFRY". Article 238 states that "no one has the right to recognize or sign capitulation, or to accept or recognize the occupation of the SFRY or any of its parts". The armed forces of the SFRY are an integral entity and consist of the Yugoslav People's Army, as the joint armed force of all the nations and nationalities and all working people and citizens; and of the territorial defence forces as the broadest form of organized armed resistance by the people.

PART III

Part three, from Articles 244 to 281, deals with relationships at federal level. "In the SFRY, the nations and nationalities and the working people and citizens exercise and assure: sovereignty, equality and national freedom, independence, territorial integrity, security and social self-

defence, the defence of the country and the international position and relations of the country with other states and inter-state organizations, the system of socialist self-management of socio-economic relationships, the integral foundations of the political system, the fundamental democratic freedoms and rights of men and citizens, solidarity and the social security of the working people and citizens and the integral market, and coordinate their joint economic and social development and other of their common interests." These common interests are pursued through the organs and organizations of the federation with the equitable participation and responsibility of the republics and autonomous provinces; through direct co-operation and agreement between the republics, autonomous provinces, communes and other socio-political communities, by self-management agreement, social compact and integration of organizations of associated labour and other organizations and self-managed communities of interest; through the activities of socio-political and other organizations and through free and multifaceted activities by the citizens.

PARTS IV-VI

Part four, dealing with the rights and duties, and the organization, of the federation, comprises Articles 282 to 397. Chapter 1 deals with the rights and duties of the SFRY Assembly as exercised by the Federal Chamber and the Chambers of Republics and Provinces; Chapter 2 with the Presidency of the SFRY which "represents the SFRY at home and abroad and discharges other rights and duties as established by the Constitution"; Chapter 3 with the President of the Republic and contains the express formulation that "in view of the historic role of Josip Broz Tito in the National Liberation War and socialist revolution, in the creation and development of the SFRY, in the advancement of the Yugoslav socialist society of self-management, in the achievement of fraternity and unity among the nations and nationalities of Yugoslavia, in the consolidation of the country's independence and its position in international relations, in the struggle for peace in the world, and in line with the expressed will of the working people and citizens, nations and nationalities of Yugoslavia—the SFRY Assembly may, on the proposal of the Assemblies of the Republics and Autonomous Provinces, elect Josip Broz Tito President of the Republic for an unlimited term of office"; Chapter 4 with the Federal Executive Council; Chapter 5 with the federal administrative organs; Chapter 6 with federal judicial organs, and Chapter 7 with the Constitutional Court of Yugoslavia.

Part five, from Articles 398 to 403, deals with the procedure of amending the Constitution; and Part six, Articles 404 to 406, with transitional and terminal provisions.

JUDICIAL SYSTEM

The Yugoslav Constitution states that judicial functions are to be discharged within a uniform system and that the jurisdiction of the courts shall be established and altered only by law. In general, court proceedings are conducted in public (exceptionally the public may be excluded to preserve professional secrets, public order or morals) in the national language of the region in which the court is situated. Citizens who do not know the language in which the proceedings are being conducted may use their own language.

The judicial system comprises courts of general jurisdiction, i.e. *communal courts, county courts, republican supreme courts, and supreme courts of autonomous regions* (which decide on appeals against the decisions of county courts), *the Federal Court*, and courts of specialized jurisdiction established to hear definite cases. Self-management courts decide specific disputes as laid down by the Constitution or Statute, also disputes from working people in organizations of associated labour or other self-managing organizations and communities. Economic cases and other legal matters of concern to the economy are heard by *economic courts* with the *Supreme Economic Court* at the head, and criminal offences committed by military persons or offences in any way connected with service in the army are heard by *military courts* with the *Supreme Military Court* at the head. Courts of arbitration, arbitration commissions, conciliation councils and other institutions may be set up to settle disputes between citizens or organizations.

Judges are elected or dismissed by the Assembly of the particular Republic and lay judges are elected or dismissed by the assembly of the particular district or town.

The powers of the Constitutional Court of Yugoslavia and the Federal Court are set out in the Constitution.

Constitutional Court of Yugoslavia. Decides on the conformity of laws with the Constitution.

President: NIKOLA SEKULIČ.

Number of members: 13.

Federal Court of Yugoslavia. This is the highest organ of justice in Yugoslavia. It decides on appeals against decisions of supreme courts of the Republics and supreme courts of autonomous regions, and gives guidance on the application of federal laws. Judges are elected or dismissed by the Federal Chamber of the SFRY Assembly.

President of the Federal Court of Yugoslavia: PERO KOROBAR.

Number of members: 13.

Office of the Public Prosecutor. The Federal Public Prosecutor is elected or dismissed by the Federal Assembly. Public prosecutors of the various republics are nominated by the Federal Public Prosecutor with the approval of the Executive Council of the particular Republic. All other public prosecutors are appointed by the public prosecutor of the Republic.

Federal Republic Prosecutor: Dr. VUKO GOZZE GUČETIĆ.

Office of Public Attorney. Represents proprietary interests of the federation, republics, districts and communities. There is a Federal Office, and in addition there are six republican offices, two offices in the autonomous regions, five town offices and 228 communal offices.

Federal Attorney-General: DRAGO DRAGOJEVIĆ.

Federal Social Attorney of Self-Management. Carries out his function within the framework of federal rights and duties.

Social Attorney of Self-Management: MILOVANOVIĆ MOMČILO.

Matters concerning the improvements and functioning of the judiciary system are controlled by the *Federal Council for the Judiciary*; President Dr. JOSIP BRNČIĆ.

RELIGION

The principle of the complete separation of Church and State was adopted after the events of 1945 and is incorporated in the constitution which also states that religious confession shall in no way be restricted and makes other provisions for the welfare of religious bodies. In this way, the Republic safeguards the freedom of faith and of religious assembly, provided the State laws are respected, and ensures full equality for each religious community, as well as the freedom of its activity.

Since 1956 the Yugoslav Press has enjoyed an organizational freedom that has enabled it to establish a position of independence and individuality. In that year, ownership of Yugoslav newspapers was transferred to societies controlled by their employees, who share in the profits. The Constitution guarantees newspaper publishers the right to exercise self-management, which includes the appointment of directors, editors and a board comprising a large number of people from public and political life, as well as representatives of the workers. This board has an important role in shaping the newspapers' policy. Legal provisions also impose certain obligations on the publisher, but the main effect of this system is that the Press is free from financial and administrative control by the State, and that keen competition has developed between newspapers with the need to attract more readers becoming more apparent.

Censorship is not imposed; editors are aware of their responsibilities and of the flexibility of the Press Law in force since 1960. This lays down the usual restrictions regarding the publication of false and distorted news, confidential information, and items harmful to foreign relations, to the government or to representatives of other countries. In 1957, Tito asserted, "We are not against the free expression of ideas, but we want to build Socialism. Everything must be subordinated to this end". A year later he went further: "During our country's revolutionary period of transition, the Press cannot be considered as an independent and autonomous factor in our society, since all the actions of society as a whole must converge towards one aim: the construction of Socialism."

There are now 24 dailies published in Yugoslavia, printed in Serbian (Cyrillic alphabet), Croatian (Roman), Slovene, Macedonian, Hungarian, Italian and Albanian. The most influential are those published in Belgrade and the capitals of the constituent republics. Despite a drastic decline in circulation (from 700,000 in the 1950s to about 60,000 in 1977), *Borba*, the organ of the Socialist Alliance, retains a significant amount of influence. The weekly *Komunist*, official organ of the League of Communists, has recently experienced a considerable growth in circulation and influence. Other important newspapers include *Politika* (Belgrade), *Vijesnik* (Zagreb), *Delo* (Ljubljana), *Oslobodjenje* (Sarajevo), *Nova Makedonija* (Skopje) and *Pobjeda* (Titograd). Evening papers have also increased greatly in popularity, notably *Večernje novosti* (Belgrade), with a circulation of 341,000.

The Yugoslav news agency, Tanjug, has had the monopoly of news distribution in Yugoslavia since 1958. It has reciprocal arrangements with several foreign news agencies, including Tass, Reuters, AFP and UPI.

BANKING

The Yugoslav credit and banking system is based on the provisions of the Constitution, of the Law on the National Bank of Yugoslavia (1976), of the law on the Basic Principles of banking and credit operations (1977), and other legislation relating to money and credit. The National Bank is the central bank of Yugoslavia and its powers and obligations are determined by law. Its functions include the issue of money, provision of credit to banks and government authorities, control of credits and bank activities, recommendation of legislation relating to the foreign exchange system and its implementation, management of gold and foreign exchange reserves, control of foreign exchange operations and other special activities.

The system of business banks in Yugoslavia differs from that of the Western countries, and resembles closely the Western commercial banks. They are mixed banks, providing short- and long-term credits to organizations and individuals, issue of securities, etc. Other financial institutions are savings banks, insurance institutes and savings and credit departments attached to farmers' co-operatives for savings deposits.

Payments operations, with the exception of external payments (which are handled by the National Bank), are performed by the Social Accounting Service, which keeps the accounts of all working organizations and carries out a number of other duties. It has 383 operating units. Since 1967 certain business banks have been permitted to carry on various kinds of foreign exchange operations. In order to do this they must fulfil certain conditions, according to which they are then granted either the "great charter"—authorizing them to perform payments transactions with foreign countries and obtain credits from abroad—or the "small charter", permitting them to operate residents' foreign exchange accounts only. In 1977 20 banks held the "great charter", and 18 were in possession of the "small charter".

Railways in Yugoslavia are owned by five self-managing enterprises, one in each republic (except Montenegro). The Community of Yugoslav Railways is the co-ordinating body. The total length of track is 9,967 km. (1977).

ROADS

There is now a network of good all-weather motor roads (totalling 101,607 km.), covering most of the country and including, in particular, the main inland route through Ljubljana, Zagreb, Belgrade, Niš and Skopje to the Greek frontier, the Adriatic highway linking Rijeka, Split, Dubrovnik and Titograd, and a number of intermediate roads.

MOTORISTS' ORGANIZATION

Auto-Moto Savez Jugoslavije (A.M.S.J.): Ruzveltova 18, B.P. 66, 11000 Belgrade; f. 1923; Fed. Cttee.; Pres. Ing. VANČO CVETKOVSKI; Vice-Pres. IVAN MEDVEDEC. ČEDO ŠČEPOVIĆ; Sec.-Gen. VUKAŠIN MARAŠ; publ. *Moto Revija* (monthly).

INLAND WATERWAYS

Savezni Komitet za Saobraćaj i Veze (*Federal Committee for Transport and Communications*): Bulevar Avnoja, 104-Beograd.

Navigable waterways are the rivers Danube 588 km., Sava 593 km., Tisa 164 km., Drava 75 km. (for vessels up to 1,500 tons-capacity) and Begej 77 km. (for vessels up to 650 tons-capacity); the canals Veliki bački and Malibački, 123 km. and 29 km. (for vessels up to 400 tons-capacity).

SHIPPING

The principal ports are Rijeka and Koper in the north, Šibenik, Split and Ploče along the central Dalmatian coast, Dubrovnik and Bar in the south. The rail link between Belgrade and Ploče was completed in 1966 and the port facilities at Ploče have undergone extensive expansion and modernization, allowing accommodation for vessels of up to 60,000 tons. A direct rail link between Belgrade and Bar, completed in 1976, provides a third major outlet to the Adriatic. The largest port is Rijeka, which handled 13,997,000 tons of the total goods traffic of 22,945,000 tons in 1976.

Jadrolinija (*Adriatic Lines*): Obala Jugoslovenske Mornarice 16, Rijeka; regular passenger and cargo services between Adriatic tourist centres and Yugoslav Islands; car-ferry service Ancona-Zadar, Dubrovnik-Bari and

to Yugoslav Islands; cruises in the Mediterranean and throughout the world; Man. Dir. JOSIP SUŠANJ.

Jugolinija (*Yugoslav Shipping Line*): 51001 Rijeka, P.O.B. 379; f. 1947; cargo and passenger services from the Adriatic to northern Europe, North, Central and South America, the Middle East, Asia and the Far East; fleet of 74 vessels totalling 805,000 g.r.t.; Man. Dir. JURE VUKASOVIĆ; Comm. Dir. FRANE VALENTIĆ.

Jugoslovenska Okeanska Plovidba (*Yugoslav Ocean Lines*): Kotor; regular service every 15 days between Yugoslav ports and Tampico (Mexico), U.S.A., Italy; Gen. Dir. STAROVIĆ SAVO.

Jugoslovenska Pomorska Agencija (*Yugoslav Shipping Agency*): Knez Mihajlova 22, P.O.B. 298, Belgrade; f. 1947; ship brokers and chartering agents for Yugoslav and foreign vessels; booking of passengers and cargoes for Yugoslav and foreign lines; container service; air passenger and cargo service; ferry boat service; brs. Zagreb, Ljubljana, Rijeka, Sarajevo, Skopje, Split, Novi Sad, Dubrovnik, Šibenik, Koper, Ploče, Zadar, Bar, Bakar, Bijela, Pula, Maribor, Bitola, Titograd, Priština; representative offices in New York, Hamburg, Piraeus, Genoa, London; Gen. Man. RADE KONČAR.

CIVIL AVIATION

There are international airports at Belgrade, Dubrovnik, Ljubljana, Maribor, Ohrid, Priština, Pula, Rijeka, Sarajevo, Skopje, Split, Titograd, Tivat, Zadar and Zagreb.

Jugoslovenski Aerotransport (JAT) (*Yugoslav Airlines*): P.O.B. 749, Birčaninova 1-III, Belgrade; f. 1947; 5,155 staff; mem. of IATA; services to Amsterdam, Athens, Baghdad, Berlin, Birmingham, Brussels, Budapest, Cairo, Copenhagen, Frankfurt/Main, Gothenburg, Istanbul, Kiev, Leningrad, London, Lyon, Malta, Manchester, Milan, Moscow, Munich, New York, Paris, Prague, Rome, Singapore, Sofia, Stockholm, Sydney, Tirana, Tripoli, Tunis, Vienna, Warsaw and Zurich; charter services to Africa, Europe and North America; internal services; fleet of four Boeing 707, five Boeing 727, thirteen DC-9 and four SE-210; Dir.-Gen. DRAGOSLAV RADISAVLJEVIĆ; Commercial Dir. Miodrag VASILJEVIĆ; Tech. Dir. Ing. VLADIMIR NIKOLIĆ; Air Yugoslavia Dir. ALEKSANDER AVEJIĆ; Operational Dir. MILAN RADOJČIĆ.

There are four charter operators in Yugoslavia:

Air Yugoslavia: Mese Pijade 1/III, Belgrade 11000; mainly flights to the U.S.A., Canada and Africa; Dir. ALEKSANDER AVEJIĆ.

YUGOSLAVIA.

Aviogenex: Juriša Gagarina 221, Belgrade 11000; f. 1968; charter flights to Europe and the Mediterranean area; passenger and cargo flights to the Middle East; fleet of five Tupolev Tu-134A; Gen. Man. MIROSLAV SPASIĆ.

Inex Adria Aviopromet (*Inex Adria Airways*): Titova 48, 61001 Ljubljana; f. 1960; charter and tourist flights; also domestic passenger service between Ljubljana and Belgrade; fleet of seven DC-9; Gen. Man. JANEZ NEDOG.

Pan Adria: Grgura Ninskog 2, 41000 Zagreb; f. 1961; internal passenger and cargo services; also international flights; fleet of five Fairchild FH-227B, three Convair CV-440, three Aero-Commander 500 and thirteen Piper Pawnee; Commercial Man. CEDOMIR BREGANT.

AFGHANISTAN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Afghanistan lies in the heart of Asia. Its neighbours are to the north the U.S.S.R., to the west Iran, to the north-east China and to the east and south Pakistan. The climate varies sharply between the highlands and lowlands; the temperature in the south-west in summer reaches 48.8°C (120°F) and in the winter in the Hindu Kush mountains of the north-east falls far below zero. Of the many languages spoken in Afghanistan the two main ones are Pashtu and Dari. The vast majority of Afghans are Muslims of the Sunni sect; there are also minority groups of Hindus, Sikhs and Jews. The national flag (proportions 3 by 2) has three horizontal stripes of black (a quarter of the depth), red (a quarter) and green (half the depth). In the upper left is the circular state emblem in yellow. The capital is Kabul.

Recent History

The last King of Afghanistan, Zahir Shah, reigned from 1933 to 1973. His country was neutral during both World Wars and remains a staunch advocate of non-alignment. In 1953 the King's cousin, Mohammad Daoud, became Prime Minister and, securing aid from the U.S.S.R., initiated a series of economic plans for the modernization of the country. Daoud resigned in 1963 and Dr. Mohammad Yusuf became the first Prime Minister not of royal birth. He introduced a new democratic constitution which combined western ideas with Islamic religious and political beliefs, but the King never allowed political parties to operate. Afghanistan made little progress under the succeeding Prime Ministers.

In July 1973, while King Zahir was in Italy, the monarchy was overthrown by a coup, in which the main figure was the former Premier, Mohammad Daoud. The 1964 constitution was abolished and Afghanistan declared a republic. Daoud took office as Head of State, Prime Minister, Foreign Minister and Minister of Defence.

A new constitution was adopted by the Loya Jirgah (Grand Assembly) in February 1977, providing for a presidential one-party system. In March 1977 President Daoud formed a new civilian government, ending three years and nine months of military rule. In a move apparently intended to retain the support of the armed forces, President Daoud appointed the army chief of staff, General Ghulam Haider Rasuli, as Defence Minister. Disenchantment within the armed forces with President Daoud, himself a former army strongman, had become apparent in 1976 when a plot to overthrow the President was discovered. A number of the alleged plotters were military personnel.

Because Afghanistan maintains that an autonomous area, to be known as Pashtunistan, should be created for the Pashtun and Baluch tribes in north-west Pakistan, relations with Pakistan have been strained. Trade and diplomatic relations between Afghanistan and Pakistan were suspended between 1961 and 1963, during the premiership of Mohammad Daoud, a particularly strong supporter of

Pashtunistan. When Daoud became President relations between the two countries worsened again. During 1975 there was hostile press and radio propaganda in each country against the other. In April 1976, however, Pakistan offered aid to flood and earthquake victims in Afghanistan, and later in the year there were friendly exchanges between President Daoud and Premier Bhutto of Pakistan.

In June 1977 the long-standing dispute between Iran and Afghanistan was resolved with the signing of a treaty in which the two countries agreed to share the waters of the Helmand river.

Government

Afghanistan is a republic comprising 26 provinces, each administered by an appointed governor. A Loya Jirgah (Grand Assembly), appointed from among notable elders by provincial governors, was convened in January 1977 and adopted a new constitution in February. The Assembly elected President Daoud to continue in office for six years and was then dissolved. The constitution provides for a new Loya Jirgah which will include the members of a Meli Jirgah (National Assembly), due to convene in November 1979, who are to be nominated by the only permitted political party, the National Revolutionary Party, and then elected by universal adult suffrage. Pending the formation of the Meli Jirgah, its powers are exercised by the Government, appointed by the President.

Defence

Every able-bodied Afghan has to serve two years in the army, which numbers 100,000 men. Its equipment and training are largely provided by the Soviet Union. The Afghan air force, which numbers 10,000, is equipped with supersonic jet aircraft. Police security forces come under the Ministry of the Interior. Para-military forces number 30,000 men.

Economic Affairs

Afghanistan is essentially a tribal society and 2.4 million of its people are nomadic. Agriculture, which provides employment for about 80 per cent of the labour force, is the mainstay of the economy. In 1970 it accounted for over half the G.N.P. and for 80 per cent of export earnings. Principal agricultural exports include livestock, wool and cotton, fresh and dried fruits, processed hides and skins and medicinal herbs. In years of normal production Afghanistan has not achieved self-sufficiency in food-grains. However, in 1970, because of better weather and increased use of new fertilizers and seeds, wheat and cotton production rose greatly.

The country is well-endowed with minerals: natural gas (with estimated reserves of over 100,000 million cubic metres), coal, salt, lapis-lazuli, beryl and talc are extracted. Other mineral deposits, such as petroleum, iron ore and copper, are to be explored, according to a seven-year plan launched in 1976. Petroleum products have been imported

Introductory Survey

at special low prices from Iran and the U.S.S.R. but it is planned to increase internal sources of energy by setting up hydro- and thermal electric power stations.

Industry still contributes less to G.N.P. than handicrafts such as carpet-making, and employs 0.7 per cent of the working population. The major industries include cotton textiles, chemical fertilizers, leather and plastic goods. In 1972 the Industrial Development Bank was set up and a seven-year plan (1976-83) provides for new industries in both public and private sectors. Plans for a railway to help carry Afghanistan's important mineral resources are listed as one of the most important ventures of the seven-year plan.

As well as carpets and rugs, Afghanistan exports fruit and vegetables to Pakistan and India, natural gas to the U.S.S.R. (its main trading partner) and karakul to the European fur markets.

Afghanistan has received foreign aid chiefly from the U.S.S.R. and the U.S.A., but substantial help has also come from the People's Republic of China, the EEC, Saudi Arabia and Iran. By mid-1975 Afghanistan had built up reserves of nearly U.S. \$120 million, but drew on these to meet its trade deficit of about U.S. \$10 million in 1976. In April 1977 an agreement on economic co-operation was signed with the Soviet Union, which takes approximately 40 per cent of Afghanistan's trade.

Transport and Communications

Afghanistan is a land-locked country and the most convenient access to the sea lies through Pakistan, or alternatively on the road and rail container route through the Soviet Union. A network of asphalted highways, connecting the main towns, has been built with Soviet and U.S. help. All-weather highways link Kabul with Kandahar and Herat in the south and west, Jelalabad in the east and Mazar-i-Sharif and the Oxus, on which there is water traffic, in the north. There are two international and 29 local airports. A feasibility study for the country's first railway, linking Kabul to Iran and Pakistan, was completed in 1977.

Social Welfare

Government officials in the main towns enjoy national health insurance and all officials are entitled to an old age pension. Most private companies have their own doctor and hospitals. There are over 60 public hospitals with some 3,200 beds. Disabled people are looked after in social welfare centres in the provincial capitals. China is to build a 250-bed hospital free.

Education

Free compulsory primary education for 8 years was introduced in 1975. By 1975/76 there were 3,429 primary

and village schools with 691,000 pupils. Another 125,000 attended 512 middle schools, and 62,600 pupils were taught at 197 lycées. There are two universities and a polytechnic.

Tourism

Afghanistan's attractions for the foreign visitor include: Bamian with its high statue of Buddha and thousands of painted caves; Bandi Amir with its suspended lakes; the Blue Mosque of Mazar; the walls of Kabul; Herat with its Grand Mosque and minarets; the towns of Kandahar and Girishk; Balkh (ancient Bactria), "Mother of Cities", in the north; Bagram, Hadda and Surkh Kotal (of interest to archaeologists); and the high mountains of the Hindu Kush.

Tourism is an important contributor to Afghanistan's foreign currency reserves, raising over \$10 million a year.

Visas are required for nationals of all countries to enter Afghanistan.

Sport

The traditional sports are wrestling and buzkashi, a game played by teams of hundreds of horsemen. Athletics and ball games are sponsored by the Ministry of Education.

Public Holidays

1978: March 21st (Nau-roz: New Year's Day, Iranian calendar), May 27th (Roze-Isteqlal, Independence Day), July 17th-19th (Jashyn-i-Jamhoriyat, Republic Celebrations), August 8th (first day of Ramadan), August 31st (Pashtunistan Day), September 6th-8th (Id ul Fitr, end of Ramadan), September 9th (Parliament Day), October 15th (Roze Nejat, Day of Deliverance), October 24th (United Nations Day), November 10th-13th (Id ul Adha, Celebration of the Sacrifice), December 12th (Ashura, Martyrdom of Imam Husayn).

1979: February 10th (Roze-Maulud, Birth and death of Prophet Mohamed).

Weights and Measures

The metric system has been officially adopted but traditional weights are still used. One "seer" equals 16 pounds.

Currency and Exchange Rates

100 puls = 2 krans = 1 afghani.

Exchange rates (October 1977):

£1 sterling = 79.85 afghanis;

U.S. \$1 = 45.00 afghanis.

THE CONSTITUTION

(Promulgated February 1977)

The Preamble of the Constitution states that the people of Afghanistan, adhering to the basic principles of the sacred religion of Islam, have resolved to consolidate their national life on the basis of liberty, progress, truth, justice and peace based on the principles of brotherhood and equality, and to found the philosophy of life and the destiny of the present and future generations of the country in accordance with the fundamental and economic objectives of Afghanistan's national and progressive revolution of Saratan 26, of the year 1352 (that is July 17th, 1973).

Fundamental Objectives

Objectives stated in the Constitution include: the defence of national independence, sovereignty and territorial integrity; the exercise of power by the people; the elimination of torture and discrimination; the institution of economic and social changes; the elimination of exploitation; the ensuring of the right to work; the provision of compulsory primary education and the development of free general vocational secondary education; the improvement of public health; and the support of just peace, the United Nations Charter and the Universal Declaration of Human Rights.

Economic Principles

Resources such as mines, forests and energy, large industries, communications, air and surface transport organizations, ports, banks, insurance, food procurement organizations and archaeological and historical objects are the nation's property and their administration shall belong to the State.

Limits on agricultural property shall be fixed by a Land Reform Law.

Taxes shall be collected on the basis of social justice in accordance with the provisions of the law.

The State

Afghanistan is a Republican, democratic, independent, unitary and indivisible State. National sovereignty belongs to the people.

The religion of Afghanistan is the sacred religion of Islam. Citizens who are not followers of Islam shall be free to practise their religion within the limits determined by the laws relating to public decency and public peace.

Pashtu and Dari shall be the official languages of Afghanistan.

The Armed Forces shall be at the service of the people under the orders of the Government. It is their duty to defend the Afghan territory and to participate in national activities through the High Council of the Armed Forces.

The administration of Afghanistan is based on the principle of centralization.

Rights and Obligations of the People

All Afghans, both women and men, have equal rights and obligations before the law.

Rights include: the right to vote from the age of 18; the right to travel and settle anywhere within Afghanistan and to travel abroad; inviolability of residence, property and communications, whether in written form or by telephone and telegraph, unless a search warrant has been issued by a competent court; freedom of thought and expression; the right to assemble for securing permissible and peaceful

objectives, without carrying weapons; the right to work and freedom of choice of work.

The accused is recognized to be innocent until found guilty by final judgement of a competent court.

The indebtedness of one person to another cannot cause the deprivation or limitation of the debtor's liberty. The method of recovering debts shall be covered by law.

No Afghan can be sentenced to exile in or outside of Afghanistan. No Afghan, accused of a crime, shall be extradited to a foreign state.

The imposition of forced labour is not permissible, even for the State. This shall not bar the application of laws which shall be promulgated for the regulation of collective activity to secure the public interest.

Every Afghan is obliged to pay tax and duty to the State, to defend the homeland and to adhere to the provisions of the Constitution.

The Meli Jirgah

The Meli Jirgah (National Assembly) of Afghanistan is where the will of the people is manifested and it represents the whole of the nation.

Members of the Meli Jirgah, 50 per cent of whom shall be composed of farmers and workers, are nominated by the Party and shall be elected by the people for a period of four years through free, universal, secret and direct elections. For this purpose Afghanistan shall be divided into electoral constituencies.

Members of the Meli Jirgah must have acquired the citizenship of Afghanistan at least ten years prior to their election. They must not have been punished by a court with deprivation of political rights. They must have attained the age of twenty-five.

The Meli Jirgah shall hold one ordinary session every year for four consecutive months beginning on the first of Qaus (November 22nd).

Within fifteen days from the beginning of the session, the Meli Jirgah shall elect from its members an Administrative Board consisting of a President, First and Second Vice-Presidents, a Secretary and an Assistant Secretary.

The Meli Jirgah shall adopt necessary decisions on laws drafted by the Government. The adoption of decisions on the budget, the ratification of international treaties and the dispatch of Afghan armed forces abroad are within the competence of the Meli Jirgah. A law is a resolution enacted by the Meli Jirgah and signed by the President of the Republic. During recess or the dissolution of the Meli Jirgah ordinances shall come into force after signature and proclamation by the President of the Republic. These ordinances shall be submitted to the Meli Jirgah for a decision within thirty days from its first meeting.

The Loya Jirgah

The Loya Jirgah (Grand Assembly) is the supreme manifestation of the power and will of the people. It is composed of the members of the Meli Jirgah, the members of the Central Council of the Party, the members of the Government and of the High Council of the Armed Forces, the members of the Supreme Court, five to eight representatives from each province and thirty members who shall be appointed through a decree of the President of the Republic. The President of the Republic is the chairman of the Loya Jirgah.

AFGHANISTAN

The Loya Jirgah shall be convened for decisions on the following: the amendment of the Constitution; the election and the acceptance of the resignation of the President of the Republic; the approval of declaration of war and armistice; any other important event.

The President of the Republic

The President of the Republic is the head of the State of Afghanistan and shall administer and guide those functions of the executive and of the Party which have been directly entrusted to him in the Constitution and the Charter of the Party.

The President of the Republic, after nomination by the Party, shall be elected by the Loya Jirgah with a two-thirds majority vote for a term of six years.

The President must be a citizen of Afghanistan and a Muslim, and must not be under forty years of age. Both the President and his spouse must be born of Afghan parents.

The President's powers and duties include: supreme command of the armed forces; declaring war and armistice with the advice of the Loya Jirgah; declaring a state of emergency and its termination; convening the Loya Jirgah and extraordinary sessions of the Meli Jirgah; dissolving the Meli Jirgah and decreeing new elections; guiding the country's foreign policy; appointing the Vice-President or Vice-Presidents of the Republic from amongst the members of the Party and also appointing the ministers from within and outside the Party.

In the event of the death or resignation of the President of the Republic, his functions shall be entrusted to the President of the Meli Jirgah, who cannot then be nominated as a candidate for election to the office of President of the Republic. The new President of the Republic must be elected within thirty days of the date the office became vacant.

The Government

The Government is the supreme executive of the State and consists of the Vice-President(s) of the Republic and the ministers, under the leadership of the President. The

The Constitution, The Government

Vice-President(s) of the Republic and the ministers are responsible to the President of the Republic, the Central Council of the Party and the Meli Jirgah.

The Judiciary

(See under the Judicial System.)

Emergency

A state of emergency may be declared by the President of the Republic. Should the state of emergency continue for more than four months, the agreement of the Meli Jirgah is imperative for its extension.

In a state of emergency the President may transfer all or part of the powers of the Meli Jirgah to the Government, transfer part of the jurisdiction of the Judiciary to military courts, suspend certain of the constitutional rights of the people, transfer the capital of Afghanistan to a place other than Kabul.

In a state of emergency the Constitution shall not be amended.

Amendment

The principle of adherence to the basic principles of Islam and the Republican Order shall not be amended.

Transitional Provisions

The President of the Republic shall convene the Meli Jirgah on the first of Qaus, 1358 A.H. (November 22nd, 1979). The period between the enforcement of this Constitution and the inauguration of the Meli Jirgah shall be considered the transitional period. During this period the powers of the Meli Jirgah shall belong to the Government. Ordinances enforced during the transitional period shall be presented for decision to the first session of the Meli Jirgah within thirty days of its convening.

During the transitional period the President shall establish and proclaim the High Council of the Armed Forces.

The President shall proclaim the establishment of the Supreme Court on the first day of Suratan, 1357 A.H. (June 22nd, 1978).

JUDICIAL SYSTEM

Under the Constitution, the President of the Republic is to proclaim the establishment of the Supreme Court on the first of Saratan, 1357 A.H. (June 22nd, 1978). In the transitional period until then the President is to adopt necessary measures to ensure the performance of the functions of the Supreme Court.

The Supreme Court is composed of nine justices appointed by the President of the Republic. These justices must have attained thirty-five years of age and have acquired Afghan citizenship at least ten years prior to their appointment. The President of the Republic appoints one of the Supreme Court justices, who must not be under forty years of age, as Chief Justice.

The Supreme Court regulates the organization and

functions of the lower courts, whose judges are appointed by the President of the Republic, on the recommendation of the Chief Justice.

Trials are held openly. The decision of the courts is final except in the case of a death sentence, in which instance the execution of the judgment of the highest court is subject to the endorsement of the President of the Republic.

If no provision exists in the Constitution or in the laws of the State for a case under consideration, the courts render judgment within the limitations set out in the Constitution by following the basic principles of the Hanafi jurisprudence of the Shariah of Islam.

RELIGION

The official religion of Afghanistan is Islam. The great majority of Afghans are Muslims, approximately 97 per

cent of them of the Sunni sect. There are small minority groups of Hindus, Sikhs and Jews.

ALGERIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Democratic and Popular Republic of Algeria borders on the Mediterranean to the north, Mali and Niger to the south, Tunisia and Libya to the east, and Morocco and Mauritania to the west. The climate on the coast is temperate, becoming more extreme in the Atlas mountains immediately to the south. The Sahara, further south, is hot and arid. Arabic is the official language but French is still widely used. There is a considerable Berber-speaking minority. Islam is the state religion. The national flag (proportions 3 by 2) has equal vertical stripes of green and white, with a red crescent moon and five-pointed red star superimposed in the centre. The capital is Algiers.

Recent History

Until 1962 Algeria was part of the French Republic, "attached" to metropolitan France. Economic and political power was in the hands of a large white-settler population. In 1954, the native Muslim majority began a war for national independence, led by the *Front de libération nationale* (FLN). In March 1962, despite resistance from the Europeans in Algeria, the French government agreed to a cease-fire and independence for Algeria. Over a million Muslims died in the war. Most of the white population left for France when independence was declared on July 3rd, 1962. In August the Algerian provisional government transferred its functions to the Political Bureau of the FLN, and in September a National Constituent Assembly was elected (from a single list of FLN candidates) and the Republic proclaimed. A new government was formed, with Ahmed Ben Bella, founder of the FLN, as Prime Minister.

A draft constitution, providing for a presidential regime with the FLN as the sole party, was adopted by the Constituent Assembly in August 1963. In September the constitution was approved by popular referendum and Ben Bella was elected President. Under his leadership economic reconstruction was begun and the foundation was laid for a single-party socialist state. However, the failure of the FLN to function as an active political force left real power with the bureaucracy and the army. In June 1965 the Minister of Defence, Col. Houari Boumedienne, deposed Ben Bella in a bloodless *coup* and took control of the state as President of a Revolutionary Council.

Boumedienne faced considerable opposition from the Left. In 1967 Col. Tahar Zbiri led an unsuccessful armed rising with the support of several leading politicians. By 1971, however, the government felt strong enough to adopt a more active social policy. French oil interests were nationalized and an agrarian reform programme was initiated.

In June 1975, Boumedienne announced a series of measures to consolidate the regime and his personal power, including the drawing up of a National Charter and a new Constitution, and the holding of elections for a President and National Assembly. These actions provoked a resurgence of opposition dormant since the 1960s. However, after the publication in April 1976 of the National Charter,

which lays down the principles and plans for creating a socialist system and maintaining Islam as the state religion, the administration encouraged public discussion and responded to criticisms by amending the Charter. In a referendum in June the Charter was adopted by 98.5 per cent of the electorate. A new Constitution (*see below*), embodying the principles of the Charter, was approved by another referendum in November, and on December 10th Boumedienne was elected President unopposed with over 99 per cent of the votes cast. The new formal structure of power was completed in February 1977 by the election of FLN members to the National Assembly.

Since independence Algeria has been one of the most prominent non-aligned states. It has supported national liberation movements, among them that of Palestine.

The annexation of the former Spanish Sahara by Morocco and Mauritania (*see* chapter on Morocco) embittered relations between the two countries and Algeria, which advocated independence for the territory. In January and February 1976 Algerian and Moroccan troops clashed in the Sahara, a border long-disputed by both countries, and in March Algeria recognized the Sahraoui Arab Democratic Republic proclaimed by Polisario, the Saharan liberation movement. Morocco and Mauritania broke off diplomatic relations with Algeria and, following a guerrilla raid into Mauritania in May 1977, there was a substantial military build-up in the area, drawing both France, with which Algeria's relations have deteriorated sharply, and Libya into the struggle.

Government

Under the 1976 Constitution Algeria is a socialist single-party state. The Head of State is a President elected for a six-year term by universal adult suffrage. The President presides over a Council of Ministers, appointed by himself, and a High Security Council. The President may appoint a Vice-President and a Prime Minister but executive power is essentially concentrated in his own hands. The President shares legislative power with a unicameral National Popular Assembly, with 261 members elected by universal adult suffrage for a five-year term. The President may dissolve the Assembly at any time and is empowered to legislate by decree when it is not in session. The country is divided into 31 wilayas, sub-divided into 691 communes. Each wilaya and commune has an elected assembly. All candidates for election, whether to local or national assemblies or to the Presidency of the Republic, are nominated by the FLN but the electorate may be offered a choice of candidates.

Defence

The National Popular Army, formerly FLN's military wing, is now Algeria's official army. The estimated strength of the armed forces in 1977 was 75,800, comprising an army of 67,000, a navy of 3,800 and an air force of 5,000. The 1977 defence budget was 1,000 million dinars. Both France and the Soviet Union provide military equipment and training.

ALGERIA

Military service is compulsory for six months, and there is a gendarmerie of 10,000.

Economic Affairs

About 85 per cent of the working population is employed in agriculture which accounted for 21 per cent of G.N.P. in 1963 but only 7 per cent in 1976. The main products are wine, olives and citrus fruit. The government has sought to encourage cereal production and dairy farming to replace the traditional dependence on wine exports. An agrarian reform programme has been under way since 1971. Land is being distributed among the rural population organized into co-operatives. Efforts to increase production have so far failed, and Algeria is forced to import considerable quantities of food stuffs.

Algeria is rich in minerals, notably iron ore, phosphates, petroleum and natural gas. The Government is committed to rapid industrialization based on these resources. Algeria is a relatively small oil producer but its reserves of natural gas, estimated at between 3 and 7 million million cubic metres, are among the world's largest, and ambitious development programmes have been undertaken at Arzew and Skikda. The high cost of these has led to an alarming growth of public indebtedness. Iron and steel and fertilizers are major industrial products. Large industrial building contracts were signed with Italy and other European countries in 1977.

Commerce and industry are dominated by state-controlled enterprises. The Government is committed to socialist company management by the workers, *gestion socialiste des entreprises*, introduced in 1974, but the problems of state capitalism have yet to be overcome.

During the period of the 1970-73 Four-Year Plan, GDP rose by about 10 per cent annually. After the large oil-price rise in 1973-74 the Government decided on a more intense investment programme which would use the increased revenue to push growth still faster. In 1974 Algeria for the first time achieved a large export surplus, but petroleum production fell in volume and natural gas production was slower to expand than had been expected. The following year there was a massive trade deficit. The second Four-Year Plan ended in 1977, G.D.P. having reached 29,700 million Algerian dinars. The third will be formulated from 1979 to allow time for a reassessment of economic priorities.

Algeria's development has so far been concentrated in capital-intensive production for export. Backward agricultural areas have been little affected by economic change, despite government projects to reduce regional inequalities. The French investment in transport, housing, etc. has not been sufficiently augmented and the reliance on the existing infrastructure has caused a general decline in urban living standards. Too few jobs have been created to cope with a population increase of 3.2 per cent a year. Nearly a million Algerians work abroad and about another million are unemployed or under-employed at home. The 1977 budget shifted the emphasis from heavy to light industry and increased investment in these neglected areas in order to diversify the economy away from its dependence on hydrocarbons.

Transport and Communications

There are about 4,000 km. of railway, excellent coastal

roads and good major roads over the mountains and into the Sahara. A Trans-Saharan Highway is under construction. Algiers is one of the principal ports on the Mediterranean. There are internal and international air services.

Social Welfare

Since January 1st, 1974, all Algerian citizens have the right to free medical attention. There is a great shortage of doctors and hospitals, but the public health budget rose in 1976 to 805 million dinars.

Education

Since independence, Algeria has pursued a policy of returning to its Arab-Islamic roots while remaining receptive to modern influences. Some 30 per cent of the annual budget is devoted to education and 80 per cent of Algerian children receive primary education. In keeping with the National Charter, the various primary and secondary schools were unified in 1976, private education was abolished and a nine-year *école fondamentale* introduced. This will gradually supercede the present system which is divided between elementary and middle cycles, and only allows 40 per cent of pupils to move from one cycle to the other. In 1976 there were 2,272,000 pupils in the primary cycle and 453,000 in the middle cycle; 50,000 students attended university and there were 90,000 teachers.

Tourism

The chief attractions for tourists are the Mediterranean coast, the Atlas mountains and the desert, and the climate. There were 296,516 tourist visits in 1975.

Visas are not required to visit Algeria by nationals of the following countries: Andorra, Bahrain, Denmark, Egypt, Finland, France and the French overseas territories, Guinea, Guyana, Iraq, Italy, Jordan, Kuwait, Lebanon, Liechtenstein, Mauritius, Norway, Oman, San Marino, Spain, Sweden, Switzerland, Syria, Tunisia, the Yemen Arab Republic and Yugoslavia.

Sport

Football is the most popular sport. Algeria also takes part in many athletic events, and sports of all kinds are being encouraged.

Public Holidays

1978: May 1st (Labour Day), June 19th (Ben Bella's Overthrow), July 5th (Independence), September 4th (Id ul Fitr), November 1st (Anniversary of the Revolution), November 11th (Id ul Adha), December 2nd (Muslim New Year), December 11th (Ashoura).

1979: January 1st (New Year), February 10th (Mouloud, birth of the Prophet).

Note: The European community observes the usual Christian holidays.

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centimes = 1 Algerian dinar.

Exchange rates (August 1977):

£1 sterling = 7.23 dinars;

U.S. \$1 = 4.15 dinars.

FINANCE

100 centimes = 1 Algerian dinar.

Coins: 1, 2, 5, 10, 20 and 50 centimes; 1 and 5 dinars.

Notes: 5, 10, 50, 100 and 500 dinars.

Exchange rates (August 1977): £1 sterling = 7.23 dinars; U.S. \$1 = 4.15 dinars.

100 Algerian dinars = £13.83 = \$24.10.

Note: The Algerian dinar was introduced in April 1964, replacing (at par) the new Algerian franc. From January 1960 the Algerian franc (equal to the French franc) was valued at 180 milligrammes of gold. Until August 1971 the dinar was thus valued at 20.255 U.S. cents (U.S. \$1 = 4.937 dinars). Between December 1971 and February 1973 the dinar's value was 21.991 U.S. cents (\$1 = 4.537 dinars); from February 1973 to January 1974 it was 24.435 U.S. cents (\$1 = 4.093 dinars). Since January 1974 the Algerian authorities have allowed the dinar to "float" on foreign exchange markets. The average exchange rate (dinars per U.S. dollar) was: 3.959 in 1973; 4.181 in 1974; 3.949 in 1975; 4.164 in 1976. In terms of sterling, the exchange rate between November 1967 and June 1972 was £1 = 11.849 dinars.

THE CONSTITUTION

(Approved by popular referendum, November 1976).

The preamble recalls that Algeria owes its independence to a war of liberation which will go down in history as one of the epic struggles in the resurrection of the peoples of the Third World. It emphasizes that the institutions established since June 1965 are intended to transform the progressive ideas of the revolution into real achievements, affecting daily life, and to develop the content of the revolution by thought and action towards a definitive commitment to socialism.

FUNDAMENTAL PRINCIPLES OF THE ORGANIZATION OF ALGERIAN SOCIETY

The Republic: The State is socialist. Islam is the state religion and Arabic is the official national language. National sovereignty resides in the people. The National Charter is the fundamental source of national policy and law. It is to be referred to on ideological questions and for the interpretation of the Constitution. The popular assemblies are the basic institution of the state.

Socialism: The irreversible option of socialism is the only path to complete national independence. The individual ownership of property for personal or family use is guaranteed. Non-exploitative private property is an integral part of the new social system. The cultural, agrarian and

industrial revolutions and socialist management of enterprises are the bases for the building of socialism.

The State: The State is exclusively at the service of the people. Those holding positions of responsibility must live solely on their salaries and may not, directly or by the agency of others, engage in any remunerative activity.

Fundamental Freedoms and the Rights of Man and the Citizen: Fundamental rights and freedoms are guaranteed. All discrimination on grounds of sex, race or occupation is forbidden. Law cannot operate retrospectively and a person is presumed innocent until proved guilty. Victims of judicial error shall receive compensation from the State.

The State guarantees the inviolability of the home, of private life and of the person. The State also guarantees the secrecy of correspondence, the freedom of conscience and opinion, freedom of intellectual, artistic and scientific creation, and freedom of expression and assembly.

The State guarantees the right to join a trade union, the right to work, to protection, to security, to health, to leisure, to education, etc. It also guarantees the right to leave the national territory, within the limits set by law. The Law lays down the conditions under which the fundamental rights and freedoms may be withdrawn from anyone who uses them to attack the Constitution, the essential

interests of the nation, the unity of the people and of the national territory, the internal and external security of the State, and the socialist revolution.

Duties of citizens: Every citizen must protect public property and safeguard national independence. The law sanctions the duty of parents to educate and protect their children, as well as the duty of children to help and support their parents. Women must participate fully in the building of socialism and national development.

The National Popular Army: The Army safeguards national independence and sovereignty. It participates in the development of the country and the building of socialism.

Principles of foreign policy: Algeria subscribes to the objectives of the United Nations, the Organization of African Unity and the Arab League. It supports Arab, Maghreb and African unity, on a basis of popular liberation. It is non-aligned and advocates peace and non-interference in the internal affairs of states. It fights against colonialism, imperialism and racial discrimination and supports the peoples of Africa, Asia and Latin America in their liberation struggles.

POWER AND ITS ORGANIZATION

Political power: The Algerian institutional system rests on the principle of the single-party state. The FLN is a vanguard force, guiding and organizing the people for the building of socialism. Party and state organs work in different frameworks and with different means to attain the same objectives. The decisive posts in the state organization are held by members of the party leadership.

The Executive: The President of the Republic is Head of State, Head of the Armed Forces and responsible for national defence. He must be of Algerian origin, a Muslim and more than 40 years old. He is elected by universal, secret, direct suffrage. His mandate is for six years, and is indefinitely renewable. The President embodies the unity of the political leadership of the party and the state. The presidential candidate is nominated by the party congress. The President presides over joint meetings of the party and the executive. Ministers are appointed by the President. The President presides over meetings of the Council of

Ministers. He may appoint a Vice-President and a Prime Minister, to whom he may delegate some of his powers. Should the Presidency fall vacant, the President of the National Popular Assembly temporarily assumes the office and organizes presidential elections within 45 days. He may not himself be a candidate in the election. The President presides over a High Security Council which advises on all matters affecting national security.

The Legislature: The National Popular Assembly prepares and votes the law. Its members are nominated by the party leadership and elected by universal, direct, secret suffrage for a five-year term. The deputies enjoy parliamentary immunity. The Assembly sits for two ordinary sessions per year, each of not more than three months' duration. The commissions of the Assembly are in permanent session. Both the President and the Assembly may initiate legislation. The Assembly may legislate in all areas except national defence. In the periods between sessions of the Assembly the President may legislate by decree, but all such legislation must be submitted to the Assembly in the following session.

The Head of State is empowered to dissolve the Assembly or call premature elections, having consulted a joint meeting of the party leadership and the Government.

The Judiciary: Judges obey only the law. They defend the socialist revolution. The right of the accused to a defence is guaranteed. The Supreme Court regulates the activities of courts and tribunals. The Higher Court of the Magistrature is presided over by the President of the Republic; the Minister of Justice is Vice-President of the Court. All magistrates are answerable to the Higher Court for the manner in which they fulfill their functions.

Surveillance of the State: Surveillance is intended to ensure the efficient functioning of state organs and their respect for the National Charter, the Constitution and the law. Popular surveillance is exercised by the elected assemblies. An Audit Office is established to examine all expenditure by state and party bodies.

Constitutional revision: The Constitution can be revised on the initiative of the President of the Republic by a two-thirds majority of the National Assembly. The basic principles of the Constitution may not be revised.

NATIONAL ASSEMBLY

The national assembly (*assemblée nationale populaire*) consists of 261 deputies elected by universal suffrage for a five-year term. In February 1977 elections were held for the first time under the new constitution. A single-party list of candidates was presented by the FLN, but the electorate was offered a choice of candidates within the list. Electoral participation was 78.5 per cent.

President of the National Assembly: RABAH BITAT.

There are two subsidiary levels of assemblies in Algeria. The communal assemblies (*assemblées populaires communales*) were created in 1967. They are headed by an elected president and are renewed by democratic vote every four years. The provincial assemblies (*assemblées populaires de wilayas*) were created in 1969 and are renewed every five years. The chief of the executive, the wali, is a government appointee. As for the national assembly, representatives are elected from a single list presented by the FLN.

POLITICAL PARTY

Government is based on a one-party system.

Front de Libération Nationale (FLN): place Emir Abdelkader, Algiers; f. 1954; socialist in outlook, the party is divided into a Secretariat, a Central Committee, Federations, Dairas and Kasmass; under the 1976 constitution, the party congress nominates the candidate for the Presidency of the Republic; Head MOHAMED CHERIF MESSADIA.

Under the aegis of the FLN there exists a number of mass political organizations, including *Jeunesse du Front de Libération Nationale* (JFLN) and the *Union Nationale des Femmes Algériennes* (UNFA).

There are several small opposition groups; all are

proscribed and in exile in France or in other Arab countries.

Frente Popular para la Liberación de Sakiet el Hamra y Río de Oro—POLISARIO: f. 1973 to gain independence for Western Sahara, first from Spain and then from Morocco and Mauritania; originally based in Mauritania but later moved to Algeria where it is supported by the Algerian Government; proclaimed the Sahraoui Arab Democratic Republic in February 1976; since recognized by ten countries in Africa and Asia; its main organs are a seven-member executive committee and a 21-member Political Bureau; Sec.-Gen. MOHAMED AZZEDINE; Deputy Sec.-Gen. BACHIR MUSTAPHA SAYED.

NATIONALIZED INDUSTRIES

A large part of Algerian industry is nationalized. The following are some of the most important nationalized industries:

Office Algérien des Pêches: 1 place de la Pêcherie, Algiers; f. 1969; state trawling and canned sea-food organization.

Société Nationale de Constructions Mécaniques (SONA-COME): 1 Route Nationale, Birkhadem, Algiers; f. 1967; sole manufacturer and importer of motor vehicles, agricultural equipment and allied products.

Société Nationale de Constructions Métalliques (SN METAL): 38 rue Didouche Mourad, Algiers; f. 1968; production of metal goods.

Société Nationale des Industries Textiles (SONITEX): 5 rue Abane Ramdane, Algiers; f. 1966; 16,000 employees; Dir. Gen. BENALY CHERIF.

Société Nationale des Industries du Liège et du Bois (SNLB): 1 rue Aristide Briand, Algiers; f. 1973; production of cork and wooden goods.

Société Nationale des Matériaux de Construction (SNMC): 17 rue Hamani, Algiers; f. 1968; building materials.

Société Nationale des Industries des Peaux et Cuirs (SONI-PEO): 100 rue de Tripoli, Hussein Dey, Algiers; f. 1967; hides and skins.

Société Nationale de Recherches et d'Exploitations Minières (SONAREM): 127 Blvd. Salah Bouakouir, Algiers; mining and prospecting; Dir.-Gen. MOHAMED AMIROUCHE.

Société Nationale de Semouleries, Meuneries, Fabriques de Pâtes Alimentaires et Couscous (SN SEMPAC): 6 blvd. Zirout Youcef, Algiers; f. 1965; semolina, pasta, flour and couscous.

Société Nationale de la Sidérurgie (SNS): 5 rue Abou Moussa, Algiers; f. 1963; steel, cast iron, zinc and products.

Société Nationale des Tabacs et Allumettes (SNTA): 40 rue Hocine Nourredine, Algiers; monopoly of manufacture and trade in tobacco, cigarettes and matches.

STATE TRADING ORGANIZATIONS

Since 1972 all international trading has been carried out by state organizations, of which the following are the most important:

Office Algérien Interprofessionnel des Céréales (OAIC): 5 rue Ferhat Bousaad, Algiers; f. 1962; monopoly of trade in wheat, rice, maize, barley and products derived from these cereals.

Office des Fruits et Légumes d'Algérie (OFLA): 21 rue Larbi Ben M'Hidi, Algiers; f. 1969; division of the Ministry of Agriculture and Agrarian Reform; collects the produce from worker-controlled farms, and exports vegetables, fresh and dried fruit and associated by-products of Europe.

Office National de Commercialisation (ONACO): 21 rue Larbi Ben M'hidi, Algiers; f. 1963; monopoly of bulk trade in basic foodstuffs except cereals; brs. in over 40 towns.

Office National de Commercialisation des Produits Viti-Vinicoles (ONCV): 112, Quai-Sud, Algiers; f. 1968; monopoly of importing and exporting products of the wine industry; Dir.-Gen. A. KARA TERKI.

Other state buying organizations exist for dairy products, wood and wood products, textiles, footwear and hides and skins, and more are being set up.

TRADE FAIR

Foire Internationale d'Alger: Palais des Expositions, Pins Maritimes, B.P. 571, Algiers; annual; fortnight in September.

OIL AND GAS

Sonatrach (*Société nationale pour la recherche, la production, le transport, la transformation et la commercialisation des hydrocarbures*): 80 Avenue Ahmed Ghermoul, Algiers; f. 1963; state-owned organization for exploration, exploitation, transport, refining and marketing of oil and gas and their products. In 1976 it accounted for 79.8 per cent of output and 78.5 per cent of exports, operating through a number of subsidiary companies formed in association with foreign oil companies; Pres. Dir.-Gen. SID AHMED GHOZALI.

TRANSPORT

RAILWAYS

Société Nationale des Transports Ferroviaires: 21-23 blvd. Mohammed V, Algiers; f. 1976 to replace Société Nationale des Chemins de Fer Algériens; 4,074 km. of track, of which 319 km. are electrified, daily passenger

services from Algiers to the principal provincial cities and a service to Tunis; Dir.-Gen. SADDEK BENMEHD JOUBA.

ROADS

There are about 82,000 km. of roads and tracks, of which 18,500 km. are main roads and 19,000 km. are secondary roads. The total is made up of 55,000 km. in the north, including 24,000 km. of good roads, and 27,000 km. in the south, including 3,200 km. with asphalt surface. The French administration built a good road system, partly for military purposes, which since independence has been allowed to deteriorate in parts, and only a small percentage of roads are surfaced. New roads have been built linking the Sahara oil fields with the coast, and the trans-Saharan highway is a major project. Algeria is a member of the Trans-Saharan Road Committee, organizing the building of this road, now renamed the "Road of African Unity". The first 360-km. stretch, from Hassi Marroket to In Salah, was opened in April 1973, and work has begun on the next section, which will include 420 km. inside Algeria and run into Niger.

Société Nationale des Transports Routiers: 27 rue des 3 Frères, Bouaddon, Algiers; f. 1967; holds a monopoly of goods transport by road; Dir.-Gen. HAOUSSINE EL-HADJ.

Société Nationale pour le Transport des Voyageurs: 27 rue des 3 Frères, Bouaddon, Algiers; f. 1967; holds monopoly of passenger transport by road.

MOTORISTS' ORGANIZATION

Touring Club d'Algérie: 1 rue El Idrissi, Algiers.

SHIPPING

Algiers is the main port, with 23-29 metres anchorage in the Bay of Algiers, and anchorage for the largest vessels in Agha Bay. The port has a total quayage of 8,380 metres. There are also important ports at Annaba, Arzew, Bedjaia, Djidjelli, Ghazaouet, Mostaganem, Oran and Skikda. Petroleum and liquid gas are exported through Arzew, Bedjaia and Skikda. Algerian crude petroleum is also exported through the Tunisian port of La Skhirra.

Compagnie Nationale Algérienne de Navigation (CNAN): quai d'Ajaccio, B.P. 280, Algiers; f. 1964; State-owned company managing its own fleet and vessels on time charter; concerned in the transport of oil, gas, wine, early fruit and other goods; 63 vessels; agencies and monopoly of handling facilities in all Algerian ports; office in Marseilles and reps. in Paris, all French ports and the principal ports in many other countries.

Office National des Ports: 2 rue d'Angkor, B.P. 830, Algiers; f. 1971; responsible for management and growth of port facilities and sea pilotage; Dir.-Gen. M. HARRATI.

Société Nationale de Manutention (SONAMA): Môle Bologhine, Quai 23, Alger/Port; monopoly of port handling.

Transport, Tourism, Atomic Energy, Universities

CIVIL AVIATION

Algeria's main airport, Dar el Beïda at Algiers, is a class A airport of international standing. At Constantine, Annaba and Oran are smaller modern airports able to accommodate jet aircraft, and there are also 65 aerodromes of which 20 are public, and a further 135 air-strips connected with the oil industry.

Air Algérie: 1 place Maurice Audin, B.P. 858, Algiers; f. 1946; internal services and extensive services to Europe, North, Central and West Africa, the Middle East and Asia; fleet of 6 Boeing 727, 13 Boeing 737, 4 Convair 640, 5 Nord 262, 18 Grumman AG-CAT, 2 Piper Pawnee, 5 Beechcraft 80, 8 Beechcraft 70, 1 King Air, 1 Cherokee 6B; Pres. MOHAMED BOUZADA; Asst. Dir. LARBI HAMLAOUT; Admin. Dir. ABDELMALEK BOUDJELLAL.

FOREIGN LINES

The following foreign airlines operate services to Algiers: Aeroflot, Air France, Air Niger, Alitalia, Aviaco, Balkan, British Caledonian, CSA, EgyptAir, Interflug, Iraqi Airways, Libyan Arab Airlines, Lot, Lufthansa, Sabina, Saudi Arabian Airlines, Swissair, TAAG, Tarom.

TOURISM

Office National Algérien du Tourisme (ONAT): 25-27 rue Khélifa Boukhalfa, Algiers.

Société Nationale Algérienne de Tourisme et d'Hôtellerie (SONATOUR): 8 rue du Dr. Saadane, Algiers (general affairs); 5 blvd. Ben Boulaid, Algiers (commercial affairs).

THEATRE

Théâtre National Algérien: 10 rue Hady Oman, Algiers; performances in Arabic and French in Algiers and all main cities.

ATOMIC ENERGY

Centre des Sciences et de la Technologie Nucléaires (CSTN): B.P. 1017, Alger-Gare; f. 1958 as Institut d'Etudes Nucléaires d'Alger; research into nuclear physics, solid and electronic physics; two Van de Graaff accelerators, 3 MeV and 2 MeV; one Sames accelerator 600 KeV and one isotope separator of the Saclay type; Dir. A. BENNINI.

UNIVERSITIES

Université d'Alger: Algiers; 1,530 teachers, 17,086 students.

Université d'Oran: Oran; 557 teachers, 6,790 students.

ANGOLA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The People's Republic of Angola lies on the west coast of Africa. The Cabinda district is separated from the rest of the country by the estuary of the River Congo and Zairian territory. Angola is bordered by Zaire to the north, Zambia to the east and Namibia to the south. The climate is tropical, locally tempered by altitude. Tribal dialects and Portuguese are spoken. Most of the population follow traditional beliefs although there is a large minority of Roman Catholics and other Christian faiths. The flag (proportions 3 by 2) has two equal horizontal bands of red and black. Superimposed in gold are a five-pointed star, half a cogwheel and a machete. The capital is Luanda.

Recent History

Formerly a Portuguese colony, Angola became an overseas province in 1951. Small nationalist groups began to form in the 1950s. There was an unsuccessful nationalist rebellion in 1961. Severe repression followed and there was a lull in nationalist activity until 1966. After a new wave of fighting, nationalist guerrilla groups were able to establish military and political control in large parts of eastern Angola and to press westward. Three major nationalist organizations were formed: the *Movimento Popular de Libertação de Angola* (MPLA), the *Frente Nacional de Libertação de Angola* (FNLA) and the *União Nacional para a Independência Total de Angola* (UNITA).

Following the April 1974 *coup d'état* in Portugal, Angola's right to independence was recognized but negotiations were slow to take place because of a lack of nationalist unity and the violence caused by a minority of white settlers who still wanted white minority rule. Negotiations between the Portuguese government and the nationalist groups began in September and, following the formation of a common front by these groups, it was agreed in January 1975 that Angola would become independent in November 1975.

A transitional government of representatives of the MPLA, FNLA, UNITA and Portuguese government was set up. However, violent clashes between the MPLA and the FNLA occurred in March as a result of the groups' ideological and tribal differences. Ceasefire agreements were signed in March, May and June but they had little effect on the violent fighting which continued throughout the country.

In the second half of 1975 the MPLA, supported by the U.S.S.R. and Cuba, controlled Luanda, parts of the coast and the districts east of the capital; the FNLA, aided by the U.S.A. and some West European countries, held the northern Angola; and UNITA held the central regions of northern Angola and most of southern Angola. The Huambo and Bié and most of southern Angola. The FNLA and UNITA formed a united front to fight the Communist-backed MPLA.

Cabinda, the oil-rich enclave separated from Angola by Zaire, was taken over from the FNLA by the MPLA at the end of 1975. There is an active secessionist movement comprising three competing factions of the *Frente de Libertação do Enclave de Cabinda* (FLEC).

The Portuguese government proclaimed Angola independent from November 11th, 1975, and transferred sovereignty to "the Angolan people" and not to any of the liberation movements. The MPLA proclaimed the People's Republic of Angola and the establishment of a government, with its seat in Luanda, under the presidency of Dr. Agostinho Neto. The FNLA and UNITA proclaimed the People's Democratic Republic of Angola and a coalition government, based in Nova Lisboa (renamed Huambo). The involvement of South African troops in the south, ostensibly to safeguard the Cunene hydro-electricity scheme, and of an estimated 15,000 Cuban troops, caused an international furore.

However, by the end of February 1976 the MPLA, aided by Cuban technical and military expertise, had effectively gained control of the whole country. South African troops were withdrawn from Angola in March but Cuban troops remained to counter guerrilla activity by the remnants of the defeated UNITA forces. In late 1976 and 1977 there were reports of renewed UNITA activity, possibly with South African support, in southern Angola and also of a resurgence of FNLA and FLEC resistance in the north. Relations with Zaire, which supported these movements during the civil war, deteriorated further in February 1977 when President Mobutu accused Angola of instigating the invasion of Shaba province by former Katangese gendarmes. Angola is one of the "front-line" states supporting the liberation of Rhodesia.

Disagreements within the Government were revealed by an attempted coup led by Nito Alves (the former Minister of the Interior) in May 1977. The uprising, which was not confined to Luanda, had some support from units of the Angolan army but was crushed within a few hours. Among the estimated 200 dead were several senior MPLA officials, including Saydi Mingas, the Minister of Finance. Numerous arrests and a purge of state and party officials followed. The task of national reconstruction was severely hampered by these security considerations, although at the MPLA Congress in December 1977 measures were taken to activate the paralysed sectors of the economy, extend and consolidate the state sector, give priority to solving the problems of food, health and the education of the masses, solve the housing problem, restructure the state apparatus and combat illiteracy. Many people's power organizations and workers' committees were set up throughout the country. The Government signed many friendship agreements with other countries, including a 20-year co-operation agreement with the Soviet Union and receives considerable military and economic assistance from Cuba.

Government

According to the 1975 constitution (amended in October 1976), the MPLA is responsible for the country's political, economic and social leadership. The MPLA's supreme organ is the Congress, which normally meets every four years. The Congress elects the MPLA's President and Central Committee (15 full members and 10 alternates to

supervise the movement's work. At a congress held in December 1977, the MPLA was renamed the Marxist-Leninist Angola Workers' Party and transformed into a Marxist-Leninist vanguard party. Amendments to the constitution may be made only by the MPLA Central Committee. The Committee elects a Political Bureau (10 members, including the President) to be its executive organ.

The supreme organ of state is to be the elected People's Assembly but, until the Assembly is established, legislative power is held by the Council of the Revolution. The Head of State is the President of the Republic, who is also President of the MPLA, Commander-in-Chief of the armed forces and Chairman of the Council of the Revolution and the Council of Ministers. The President appoints the Government to exercise executive authority. There are plans to create an executive committee of the Council of Ministers (composed of the President, the Prime Minister, three Deputy Prime Ministers, the Minister of Defence and the Director of National Security) to exercise the highest executive authority. The first MPLA Congress was held in December 1977. An important local administration system has been established.

Defence

In July 1977 the Angolan army had a strength of 30,000, the air force 800 and the navy 700. There is compulsory conscription for both sexes between the ages of 18 and 35. In addition there are an estimated 15,000 Cuban troops stationed in Angola.

Economic Affairs

The principal crops are coffee (the second largest export commodity), sugar cane, maize and wheat. Livestock is of little significance. Forestry is important in the Cabinda and Moxico districts.

Angola is very rich in minerals, especially diamonds, petroleum and iron ore, and there are also deposits of copper, manganese, phosphates and salt. In 1975 deposits of uranium were discovered on the border with Namibia.

Between 1966 and 1974 Angola's annual economic growth rate averaged 6 per cent but the two-year civil war severely disrupted the economy. Agricultural production fell dramatically in 1974-76. Production of the principal cash crop, coffee, plummeted from 3.2 million bags in 1973/74 to an estimated one-third of that total in 1976/77 because of the neglect of the coffee plantations in the north. It was estimated that it would take at least four years before the plantations would reach maximum yield. However, the huge increase in world market prices between 1975 and 1977 should help to offset the fall in export volume. Other agricultural exports usually include sisal, cotton, maize, tobacco, bananas and palm oil. However, shortages compelled the Government to import an estimated £40 million of food in 1976. The Government is partly reorganizing agriculture on a co-operative and state-run plantation basis.

Crude petroleum is the major earner of foreign exchange, accounting for nearly 50 per cent of export earnings in 1974. Around 85 per cent of production comes from offshore fields in Cabinda which produced an average of 140,000 barrels per day before the civil war and in September 1976 was reported to have reached 123,000 barrels per

day. Onshore production is reported to have reached 30,000 barrels per day compared with the average of 25,000 in 1975. Proven reserves in Angola are estimated at 1,300 million barrels. In May 1976 a national oil company, Sonangol, was set up to supervise production and distribution and in the following February the Angolan oil company, Angol, was nationalized. There are two refineries, one at Luanda handling 21,700 barrels per day and one in Cabinda handling 2,800, but the bulk of the oil is exported in its crude form.

Diamonds are the country's second most valuable mineral. Normally Diamang, in which the Government took a controlling interest in September 1977, produces around 8 per cent of the world's diamonds but only 460,000 carats were mined in 1975, about a quarter of the 1974 output. It is reported that production had fallen to one-fifth of its pre-war levels by 1976, because of the intensification of the civil war and increased smuggling.

The other main mineral is iron ore, the production of which reached 5.6 million metric tons in 1974. However, production was virtually halted in August 1975 when the Cassinga mines were partially destroyed. Angola has great hydro-electricity potential and when the Cunene scheme in the south is completed it will supply Angola and Namibia with hydro-electricity and vast supplies of water for irrigation projects in the area.

The economy has been severely affected by the exodus of over 300,000 Portuguese, creating a severe shortage of skilled workers, although the Cuban Government is sending technicians in order to alleviate the situation. In November 1977 Cuba agreed to double the number of technicians to 5,000 in 1978. The Government plans to increase its control over national resources by nationalizing with indemnity any industry essential to the economy. However, although by November 1977 the banks, all foreign-owned land and about 90 per cent of small enterprises had been nationalized, many had already been abandoned by their Portuguese owners. The economy is to be divided into three sectors, the state, co-operative and private.

Another obstacle to economic recovery is the shortage of imported raw materials but the many economic agreements signed with other countries should improve this situation. A centralized import agency, Importang, was established in 1977. Distribution is another problem, and emphasis is being laid on the repair and improvement of the transport system. In 1976 widespread labour unrest and a rash of strikes and wage demands in the face of falling productivity generated immense inflationary pressures and led to the Government's suspension of all wage negotiations and the introduction of prison sentences for acts of economic sabotage.

Security and transportation problems, allied to the shortage of skilled labour, continue to hamper Angola's recovery from the civil war. A National Planning Commission has been set up to draft a National Plan. The Government is seeking economic assistance from capitalist and non-capitalist countries.

Transport and Communications

The Portuguese developed an extensive transport and communications network but much of this was destroyed during the civil war. While many bridges have been rebuilt with Cuban assistance, there remains a severe

ANGOLA

shortage of road vehicles. The Benguela railway, of particular importance for Zambian trade, has been closed to international traffic since August 1975, although domestic services from Benguela to Luso have been operating. Internal air transport is well developed. The main harbours are Lobito, Luanda and Moçâmedes.

Social Welfare

Medical care is free, but hampered by a shortage of trained personnel and medicines. Cuba provides assistance. War veterans are cared for by the Ministry of Defence.

Education

There is a shortage of teachers and equipment but Cuban aid should help to alleviate this problem. Primary

education is compulsory. There is a university at Luanda.

The Government is pledged to extend education to all and plans to reduce drastically the 80 per cent illiteracy rate. A National Literacy Commission is to be established to direct the literacy campaign.

The metric system is in force.

FINANCE

100 lwei = 1 kwanza.

Coins: 50 lwei; 1, 2, 5 and 10 kwanza.

Notes: 20, 50, 100, 500 and 1,000 kwanza.

Exchange rates (April 1977): £1 sterling = 66.6 kwanza; U.S. \$1 = 38.7 kwanza.

1,000 kwanza = £15.01 = \$25.82.

Note: The kwanza was introduced in January 1977, replacing (at par) the Angolan escudo, itself at par with the Portuguese escudo. Between September 1949 and August 1971 the official exchange rate (par value) was U.S. \$1 = 28.75 escudos (1 escudo = 3.478 U.S. cents). From December 1971 to February 1973 the central rate was \$1 = 27.25 escudos. In terms of sterling, the exchange rate was £1 = 69.00 escudos from November 1967 to August 1971; and £1 = 71.006 escudos from December 1971 to June 1972. Since March 1973 the Portuguese escudo has been allowed to "float". The average exchange rate (escudos per U.S. dollar) was: 24.67 in 1973; 25.41 in 1974; 25.55 in 1975; 30.22 in 1976. Figures in this Survey may still be expressed in terms of escudos.

THE CONSTITUTION

(The Constitution was promulgated in November 1975 and amended in October 1976.)

BASIC PRINCIPLES

The People's Republic of Angola shall be a sovereign, independent and democratic state. All sovereignty shall be vested in the Angolan people. The *Movimento Popular de Libertação de Angola (MPLA)*, their legitimate representative, shall be responsible for the political, economic and social leadership of the nation. The people shall be guaranteed broad effective participation in the exercise of political power through the development of people's power organizations.

The People's Republic of Angola shall be a unitary and indivisible State. Economic, social and cultural solidarity

shall be promoted between all the Republic's regions for the common development of the entire nation and the elimination of regionalism and tribalism.

Defence

Under the leadership of the MPLA and with its President as Commander-in-Chief, the People's Armed Forces for the Liberation of Angola (FAPLA) shall be institutionalized as the national army of the Republic. It shall be the responsibility of FAPLA to defend the country and to participate alongside the people in production and hence in national reconstruction. The Commander-in-Chief of FAPLA shall appoint and dismiss high-ranking officers.

Religion

The Republic shall be a secular state and there shall be complete separation of the State and religious institutions. All religions shall be respected.

The Economy

Agriculture shall be regarded as the base and industry as the decisive factor in the Republic's development. The Republic shall promote the establishment of just social relations in all sectors of production, furthering and developing the public sector and fostering co-operatives. It shall recognize, protect and guarantee private activities and property, including that of foreigners, provided that they are useful to the country's economy and in the interests of the Angolan people. The fiscal system shall be guided by the principle of graduated direct taxation.

Education

The Republic shall vigorously combat illiteracy and obscurantism and shall promote the development of education and of a true national culture.

FUNDAMENTAL RIGHTS AND DUTIES

The State shall respect and protect the human person and human dignity. The life, liberty, personal integrity, good name and repute of every citizen shall be protected by law. All citizens shall be equal before the law and enjoy the same rights. They shall be subject to the same duties, without any distinction based on colour, race, ethnic group, sex, place of birth, religion, level of education, or economic or social status.

It shall be the right and duty of every citizen to participate in the defence of the country and to defend and extend the revolution. All citizens over the age of 18 shall have the right and duty to take an active part in public life, to vote and be elected or appointed to any State organ. It shall be the duty of every elected citizen to account for the discharge of his mandate to the electors who have chosen him, who shall at any time have the right to revoke his mandate.

There shall be freedom of expression, assembly and association provided that the basic objectives of the Republic are adhered to. Every citizen has the right to a defence. Individual freedoms, namely the inviolability of the home and the privacy of correspondence, are guaranteed. Freedom of conscience and belief shall be inviolable. Work shall be the right and duty of all citizens. The State guarantees medical and health care and the right to assistance in childhood, motherhood, disability, old age, etc. It also guarantees access to education and culture.

STATE ORGANS**President of the Republic**

The President of the Republic shall be the President of the MPLA. As Head of State he shall represent the Angolan nation. He shall have the following specific functions:

- to preside over the Council of the Revolution and direct its proceedings;
- to nominate, swear in and dismiss members of the Government;
- to preside over the Council of Ministers;
- to declare war and make peace, as authorized by the Council of the Revolution;
- to nominate, swear in and dismiss the Provincial Commissioners;
- to sign, promulgate and publish the laws of the Council of the Revolution, Government decrees and statutory decrees;
- to direct national defence;
- to decree a state of siege or state of emergency;

to pardon and commute sentences;

to indicate from among the members of the Political Bureau who shall replace him in his absence or when temporarily prevented from exercising his functions;

to discharge all the other functions conferred on him by the Council of the Revolution.

In the case of the death, resignation or permanent incapacity of the President, the Central Committee shall appoint from among its members a temporary replacement.

People's Assembly

The People's Assembly shall be the supreme State body. A special law shall establish its composition and its system of election and also its jurisdiction and manner of functioning.

Council of the Revolution

Pending the institution of the People's Assembly, the Council of the Revolution shall be the supreme organ of the State.

The Council of the Revolution shall comprise the members of the MPLA Central Committee; the Minister of Defence, Chief of General Staff, the National Political Commissioner or their deputies; Government members appointed by the Political Bureau of the MPLA for this purpose (to a maximum of three non-members of the Central Committee); Provincial Commissioners appointed for this purpose by the President of the Republic; Commanders and Political Commissars of the Military Regions. Its chairman shall be the President of the Republic.

The Council shall exercise the following duties:

- to discharge legislative functions which it may delegate to the Government;
- to conduct the country's domestic and foreign policy, defined by the MPLA Central Committee;
- to approve the General State Budget and the National Plan drawn up by the Government;
- to authorize the President to declare war and make peace;
- to decree amnesties.

Government

The Government shall comprise the President of the Republic, the Prime Minister, the Deputy Prime Ministers, the Ministers and the Secretaries of State.

The Government shall have the following functions:

- to guarantee the safety of persons and property;
- to draw up and implement the General State Budget once it is approved by the Council of the Revolution.

The Government may exercise by decree the legislative functions delegated to it by the Council of the Revolution.

Judiciary

The organization, composition and competence of the Courts shall be established by law. Judges shall be independent in the discharge of their functions.

Local Administration

The People's Republic of Angola shall be administratively divided into *Provincias* (Provinces), *Concelhos* (Councils), *Comunas* (Communes), *Circulos* (Circles), *Bairros* (Neighbourhoods) and *Povoações* (Villages).

Local administration shall be guided by the combined principles of unity, decentralization and local initiative.

In a Province, the Provincial Commissioner shall be the direct representative of the Government. The Government shall be represented in the District by the Local Commissioner, and in the Commune by the Commune Commissioner, who shall be appointed on the recommendation of the MPLA. The administrative bodies of the District,

Commune, Neighbourhood and Village shall be, respectively, the Local Commission, the Commune Commission, and the People's Neighbourhood or Village Commission.

The local authorities shall have legal personality and shall enjoy administrative and financial autonomy. The structure and jurisdiction of the administrative bodies and other organs of local administration shall be established by law.

FINAL AND TRANSITORY PROVISIONS

Pending the establishment of the Assembly with constitutional powers, an amendment to the Constitution may be made only by the MPLA Central Committee. Laws and regulations may be repealed or amended if they conflict with the spirit of the present law or the Angolan revolutionary process. All treaties, agreements and alliances to which Portugal has committed Angola which are contrary to the interests of the Angolan people shall be reviewed.

ANTARCTIC TREATY CONSULTATIVE MEETINGS

Meetings of delegations from all the signatory nations of the Antarctic Treaty are held from time to time to discuss scientific and political matters. The representatives elect a Chairman and Secretary. Committees and Working Groups may be established as required.

SUMMARY OF TREATY

Article 1. Antarctica shall be used for peaceful purposes only.

Article 2. Freedom of scientific investigation and co-operation.

Article 3. Exchange of information and personnel.

Article 4. 1. Nothing contained in the present Treaty shall be interpreted as:

- (a) a renunciation by any Contracting Party of previously asserted rights of or claims to territorial sovereignty in Antarctica;
- (b) a renunciation or diminution by any Contracting Party of any basis of claim to territorial sovereignty in Antarctica which it may have whether as a result of its activities or those of its nationals in Antarctica, or otherwise;
- (c) prejudicing the position of any Contracting Party as regards its recognition or non-recognition of any other State's right of or claim or basis of claim to territorial sovereignty in Antarctica.

2. No acts or activities taking place while the present Treaty is in force shall constitute a basis for asserting, supporting or denying a claim to territorial sovereignty in Antarctica or create any rights of sovereignty in Antarctica. No new claim, or enlargement of an existing claim, to territorial sovereignty in Antarctica shall be asserted while the present Treaty is in force.

Article 5. Any nuclear explosions in Antarctica and the disposal there of radioactive waste material shall be prohibited.

Article 6. Geographical limits and rights on high seas.

Article 7. Designation of observers and notification of stations and expeditions.

Article 8. Jurisdiction over observers and scientists.

Article 9. Consultative meetings.

Articles 10-14. Upholding, interpreting, amending, notifying and depositing the Treaty.

ARGENTINA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Argentine Republic occupies almost the whole of South America south of the Tropic of Capricorn and east of the Andes. It has a long Atlantic coastline stretching from Uruguay and the River Plate to Tierra del Fuego. To the west lie Chile and the Andes mountains, to the north are Bolivia, Paraguay and Brazil. Argentina also claims the Falkland Islands, the Falkland Islands Dependencies and part of Antarctica. The climate varies from sub-tropical in the north to sub-arctic in Patagonia, generally with moderate summer rainfall. The language is Spanish. Over 90 per cent of the population are Roman Catholic and about 2 per cent Protestant. The national flag (proportions 2 by 1) has three horizontal stripes of light blue, white and light blue. The state flag (proportions 3 by 2) has the same design with, in addition, a gold "Sun of May" on the white stripe. The capital is Buenos Aires.

Recent History

In June 1966 a military coup overthrew Argentina's civilian administration and began nearly seven years of government by the armed forces. In 1972 the President, Lt-Gen. Alejandro Lanusse, announced that the military regime intended to restore civilian rule.

In the elections of March 1973 the Frente Justicialista de Liberación obtained a large majority in Congress, and its candidate, Dr. Héctor Cámpora, became President, taking office in May. Cámpora resigned in July to make way for the election in September of Lt-Gen. Juan Perón Sosa, President from 1946 to 1955 and a considerable influence on subsequent Argentine politics even though he had been in exile in Spain for 18 years.

General Perón and his wife Mariá Estela Martínez de Perón were sworn in as President and Vice-President respectively in October. A purge of the left-wing elements of the Peronist movement was one of the first acts of the new administration.

General Perón died in July 1974 and was succeeded as President by his widow, who was unable to control the upsurge in violence between left- and right-wing groups. The Government moved further to the right and Señora Perón's right-hand man, José López Rega, became increasingly influential. Assassinations and kidnappings increased until in November 1974 a state of siege was declared. The left-wing *Montoneros* guerrillas were officially outlawed in September 1975 but violence continued unabated. Over 700 people were killed by terrorists in 1975. The Government's economic austerity programme and the soaring rate of inflation caused widespread strikes and dissension among industrial workers. This increasingly chaotic situation resulted in demands for the resignation of President Perón, all of which culminated in an unsuccessful coup by a section of the air force.

In early 1976 several liberal ministers left the cabinet and in February President Perón forced a recess of Congress until May, thus postponing an investigation into her alleged misuse of public funds. On March 24th the military, led by Lt-Gen. Jorge Rafael Videla, Commander of the

army, overthrew the President and installed a three-man junta. Five days later Gen. Videla was sworn in as President. The junta dissolved Congress, suspended all political and trade union activity and removed most government officials from their posts. Several hundred people were arrested and Señora Perón was put into preventive detention.

Although the Government sought to reduce political violence, over 100 murders occurred in the month following the military takeover, and more than 1,000 were killed during 1976 as a whole. In an effort to contain such violence the Government launched a successful anti-guerrilla offensive and reformed the penal code to reintroduce the death penalty for kidnapping, subversion and terrorism. However, certain right-wing groups, notably the *Triple A*, still exist and in December 1977 it was reported that 25,000 people had disappeared since March 1976.

There has been considerable dissension within the army about an eventual return to democracy and President Videla has been severely criticized by various hard line Generals for advocating a dialogue with civilians in order to restore national unity. Widespread labour unrest continues and in late 1977 a strike by railway workers over the Government's economic policies sparked off further strikes and go-slows within the state-controlled sector, which were harshly dealt with by the armed forces.

Government

Argentina is a Republic composed of a Federal District, twenty-two Provinces and the National Territory of Tierra del Fuego, Antarctica and the South Atlantic Islands (United Kingdom jurisdiction over the Falkland Islands, their Dependencies and part of Antarctica is disputed by Argentina). There is also a dispute between Argentina and Chile over the ownership of three islands in the Beagle Channel.

After the military takeover in 1976 Congress was dissolved and the supreme national organ became the *Junta Militar*, with the President holding executive powers. A commission was established to advise the junta on legislative matters. Each Province is administered by an appointed Governor.

Defence

A period of national service is compulsory between the ages of 20 and 45, either one year being spent in the army or air force or fourteen months in the navy. The total strength of the regular armed forces in 1977 was 120,000, of which the army had 80,000 with a further 250,000 trained reservists, the navy had 32,000 and the air force 17,000 men. Defence expenditure for 1977 amounted to 466,240 million pesos.

Economic Affairs

Argentina is primarily an agricultural country and its prosperity is traditionally dependent on foreign trade in meat, wool and cereals. However, since the 1974 EEC ban

on beef imports, exports have been considerably reduced. Efforts to find new markets have been quite successful and it is hoped that the 1977 revised EEC beef import arrangements will improve the situation. Cereals, mainly maize and wheat, are the principal export. The 1976/77 wheat harvest was the biggest in Argentina's history. Argentina is the world's fifth largest producer of wine and the fruit and sugar industries are growing in importance.

Industry is concerned mainly with meat-processing, meat-packing and other animal by-products. There has been rapid growth in the plastics, textile, steel, engineering and chemical industries and Argentina now manufactures almost all kinds of consumer goods, including passenger cars and machine tools.

Argentina has sufficient petroleum reserves to satisfy 85 per cent of domestic requirements and, with increased national and foreign offshore exploration, it is hoped that Argentina will become self-sufficient in oil by 1985. The 1977-78 Energy Plan calls for an investment of U.S. \$24,000 million, with priority given to reducing the generation of thermal energy from 70 to 46 per cent by 1985 and to increasing the generation of hydro-electricity from 5 to 42 per cent and that of nuclear energy from 10 to 12 per cent.

When the military government took over in March 1976 they were faced with many problems, including a negative growth rate, declining industrial and agricultural production, little investment, a large balance of payments deficit and soaring inflation. In April it introduced a recovery programme, including a reduction in the fiscal deficit by sacking over 300,000 public employees and returning many state enterprises to private capital and administration; tax reforms; gradual liberalization of the exchange market; promotion of exports; a new foreign investment law; large-scale investment in the agricultural sector; better prices and lower duties for grain and meat exporters; expansion of the energy and mining sectors and a price policy ruled by market forces rather than government controls.

These measures had some success in 1976 in solving the short-term balance of payments, budgetary and foreign debt problems at the expense of a recession which had an adverse effect on some productive sectors; the overall growth rate fell by 2.9 per cent. The external position improved due to a low level of imports and increased exports. However, inflation continued to be a pressing problem, reaching 347.5 per cent.

The economy began to improve considerably in 1977 and in the first half of the year the growth rate was 4.7 per cent. In the second quarter the manufacturing sector registered a growth rate of 1.6 per cent, the first positive rate in two years. This was accompanied by a 25.3 per cent increase in gross fixed investment. The overall balance of payments results for January-June showed a surplus of \$740 million against one of \$266 million in the first half of 1976; this was mainly due to a favourable trade balance of \$1,064 million, with exports increasing by 67 per cent over the comparable 1976 period. The foreign debt stood at \$9,738 million at the end of 1976 and gross reserves at June 30th, 1977, totalled \$2,732 million, compared with \$914 million in March 1976. Inflation continued to be a major problem, with the rate at 155.8 per cent for the year ending September

1977, compared with a government target of under 100 per cent for the year as a whole.

In 1978 the Government plans to keep investment within reasonable limits; many activities are to be left to the private sector and state enterprises, especially the railways are to be rationalized. Medium- and long-term plans include the development of energy, telecommunications, transport and fisheries.

Argentina is a member of the Latin American Free Trade Association, the Inter-American Development Bank and the Latin American Economic System (SELA).

Transport and Communications

Argentina's transport network is concentrated in the east central provinces. In 1976 there were 39,780 km. of railways. Main railways connect with Chile, Bolivia, Brazil and Paraguay and run parallel with branches of the Pan American Highway. In 1976 Argentina had 433,000 km. of roads, of which 41,400 km. were paved. In 1976 two road links between Argentina and Uruguay were opened. River steamers operate on the Plate, Paraguay, Paraná and Uruguay rivers. Internal air services are well developed and Aerolíneas Argentinas, as well as many foreign airlines, operate international schedules.

Social Welfare

Social welfare benefits are provided to wage-earners through trade unions and employers' associations. Pensions, retirement grants, family allowances and the minimum wage are increased regularly to keep pace with inflation. A new pension scheme came into operation in 1976. It provides for a maximum retirement grant of 15 times the minimum wage. Obligatory contributions for those over 16 years of age came into force in November 1976.

Education

The adult literacy rate of 93 per cent (1970) is regarded as the highest in Latin America. Education is free from pre-school to university level and compulsory for all children at primary and intermediate levels, from the ages of six to fourteen. Secondary education covers a five-year period, and university courses range from one to six years. There are 13 national universities, two provincial universities and 23 private universities.

Tourism

Argentina has yet to exploit fully its superb tourist attractions. The principal ones are the Andes mountains, the lake district of Bariloche, where there is a National Park, the Atlantic beaches, the Iguazú falls, the Pampas, the city of Buenos Aires and Tierra del Fuego. In 1976 over one million tourists visited Argentina, mainly from the other Latin American countries.

Visas are not required to visit Argentina by nationals of the following countries: Austria, Belgium, Denmark, France, Federal Republic of Germany, Luxembourg, the Netherlands, Norway, Sweden, Switzerland, the U.K. and all American countries except Cuba.

Sport

The most popular sport is football, followed by horse racing, polo, rugby, motor racing and basket-ball.

FINANCE

100 centavos = 1 Argentine peso.

Coins: 1, 5, 10, 20 and 50 centavos; 1, 5 and 10 pesos.

Notes: 1, 5, 10, 50, 100, 500, 1,000 and 10,000 pesos.

Exchange rates (December 1977): £1 sterling = 1,043.6 new pesos; U.S. \$1 = 569.5 new pesos.

10,000 Argentine pesos = £9.58 = \$17.56.

Note: The new peso was introduced in January 1970, replacing the old peso (official exchange rate: U.S. \$1 = 350 old pesos since March 1967) at the rate of 1 new peso = 100 old pesos. From January to June 1970 the exchange rate remained at U.S. \$1 = 3.50 new pesos. Between June 1970 and April 1971 the rate was \$1 = 4.00 new pesos. After six more devaluations the official rate was fixed at \$1 = 5.00 new pesos in August 1971. The next month a two-tier system was introduced, with a commercial rate (remaining at \$1 = 5.00 pesos until March 1975) and a financial rate, beginning at \$1 = 6.70 pesos (selling rate). The financial rate was revised several times and stood at \$1 = 9.98 pesos from August 1972 to March 1975, when the commercial rate was fixed at \$1 = 10.00 new pesos, with financial rates of \$1 = 15.05 pesos (buying) or 15.10 pesos (selling). The peso has since been devalued on several occasions. In August 1975 a special financial rate was introduced and in November the commercial rate was discontinued, leaving the two financial rates in operation. In January 1976 a free rate (beginning at \$1 = 150.0 pesos) was added. In March a new official rate of \$1 = 140 pesos was established, the financial rates were discontinued but the free rate (then \$1 = 258.0 pesos) remained. In November 1976 the official rate was abolished, leaving all transactions to be settled on the free market. The average market rate (pesos per U.S. dollar) was: 3.78 in 1970; 4.62 in 1971; 8.17 in 1972; 9.35 in 1973; 8.87 in 1974; 27.39 in 1975; 149.67 in 1976. In terms of sterling the official exchange rate was £1 = 8.40 new pesos from November 1967 to June 1970; £1 = 9.60 new pesos from June 1970 to April 1971; and £1 = 13.03 new pesos (commercial rate) from December 1971 to June 1972.

THE CONSTITUTION

Since the military took over on March 24th, 1976, the 1853 constitution, with amendments, remains partially in force. All major changes to the constitution are incorporated in the *Acta para el Proceso de Reorganización Nacional*, *Propósitos y Objetivos Básicos del Proceso de Reorganización Nacional* and the *Estatuto para el Proceso de Reorganización Nacional*, all promulgated on March 24th, 1976. These new laws substantially alter the legislative and executive system. The summary below is an amalgamation of the constitution and new laws.

Declarations, rights and guarantees

Each province has the right to exercise its own administration of justice, municipal system and primary education. The Roman Catholic religion, being the faith of the majority of the nation, shall enjoy State protection; freedom of religious belief is guaranteed to all other denominations. All the inhabitants of the country have the right to work and exercise any legal trade; to petition the authorities; to leave or enter the Argentine territory, to use or dispose of their properties, to associate for a peaceable or useful purpose; to teach and acquire education, and to express freely their opinion in the press without censorship. The State does not admit any prerogative of blood, birth, privilege or titles of nobility. Equality is the basis of all duties and public offices. No citizens may be detained, except for reasons and in the manner prescribed by the law; or sentenced other than by virtue of a law existing prior to the offence and by decision of the competent tribunal after the hearing and defence of the person concerned. Private residence, property and correspondence are inviolable. No one may enter the home of a citizen or carry out any search in it without his consent, unless by

a warrant from the competent authority; no one may suffer expropriation, except in case of public necessity and provided that the appropriate compensation has been paid in accordance with the provisions of the laws. In no case may the penalty of confiscation of property be imposed.

The *Acta* states that the Chiefs of Staff of the army, navy and air force establish a *Junta Militar* which assumes all political power. The following officials are removed from their posts: the President; governors and vice-governors; federal interventors; members of Congress, provincial legislatures, municipal councils, the Supreme Court and provincial courts; and the Attorney-General. All political and trade union activity is suspended.

The basic objectives and aims for national reorganization are to restore essential values, eliminate subversion, promote economic development, strengthen political sovereignty, uphold Christian moral values and tradition, enforce national security, promote general welfare and set up an education system in accordance with the needs of the country. The Junta has stated that it intends to restore a democratic representative and republican government when the *Proceso de Reorganización Nacional* has been completed.

Junta Militar

The Junta Militar comprises the Chiefs of Staff of the army, navy and air force. It shall be the supreme organ of State and its members shall remain in office for a maximum of three years. The Junta holds a mixture of legislative and executive powers and is responsible for the general running of the country. It may meet when one of its members

ARGENTINA

requests it to do so but to meet in full session all members must be present. Decisions shall be made by simple majority.

The Junta has the following powers: to appoint and dismiss the President and to appoint his successor by a means not yet established. It may also appoint and dismiss members of the Supreme Court, the Attorney-General and the Public Prosecutor. It is the Commander-in-Chief of all the armed forces, may declare war or a state of siege, authorize the executive to declare war or make peace, authorize the formation of provincial militias, allow foreign troops on to Argentine soil and give instructions to the executive regarding the functioning of provincial governments.

President of the Republic

The President must have been born on Argentine soil or be the son of an Argentine national, belong to the Catholic faith, be over 30 years of age and be a high-ranking military officer. He is appointed and dismissed by the Junta Militar. In the case of death, temporary absence or illness, executive power shall be assumed by the Minister of Planning.

The President shall have the following powers: to issue instructions and regulations necessary for the implementation of laws; to approve and promulgate laws; to grant pardons and commute sentences; to appoint and dismiss Ministers; to negotiate treaties; to appoint high-ranking officers of the armed forces on the proposal of the Chiefs of Staff; to supervise the collection of taxes; to regulate foreign trade; to fix import and export duties; to levy taxes for a specified time whenever the defence, common safety or general welfare of the State so requires; to contract loans on the nation's credit; to regulate the internal and external debt and the currency system of the country; to fix the budget and provide for whatever is conducive to the prosperity and well-being of the nation; to fix territorial limits; to establish national security; to negotiate, sign and ratify treaties and concordats; to ratify appointments made by the Junta Militar to the posts of judge of Supreme Court, Attorney-General and Public Prosecutor; to appoint members of the lower courts and to issue instructions to the provincial governments and to appoint governors.

Comisión de Asesoramiento Legislativo

The CAL is a deliberative body and acts as an adviser to

The Constitution, The Government

the Junta Militar and President on legislative matters. It comprises nine officers of the three branches of the armed forces. Its president is elected from among its members in yearly rotation in the manner established by the Junta. Its secretary shall come from the same branch of the armed forces as the current president. It shall have eight working committees responsible for defence and foreign affairs; the interior and justice; social welfare and labour; education; the budget, finance, industry and natural resources; agriculture and livestock; public works and transport; energy, fuel and communications. Decisions shall be made by absolute majority.

Bills must be approved by the relevant working committee and a plenary session of the CAL before they can be approved and promulgated by the executive. A bill must first be considered to be of fundamental importance by the working committee and the CAL before it can be dealt with. If the executive does not agree with the CAL on any issue, the bill is passed to the Junta for final decision.

The preparation of bills is the responsibility of the Government, the President and the Chiefs of Staff. They are then passed to the CAL via the President or the Junta, which can also prepare laws.

Judiciary

Judicial power is exercised by the Supreme Court and all other competent tribunals. The members of the Supreme Court are appointed and dismissed by the Junta Militar. Judges of the lower courts are appointed by the President.

The executive is to pass a law by which a special court shall be established to institute legal proceedings against high officials who have committed any crimes whilst in office. This was previously the responsibility of the legislature.

In the provinces, the provincial governors shall appoint the members of the provincial courts who shall enjoy those guarantees established in the provincial constitutions.

Provincial Government

The twenty-two provinces retain all the power not delegated to the Federal Government. They are governed by their own constitutions and must adapt their action to comply with the Junta's basic objectives and aims and the *Estatuto para el Proceso de Reorganización Nacional*. The President appoints the provincial governors.

Immediately after the military takeover in March 1976 the Junta Militar froze the assets of, and intervened in, the CGE (Confederación General Económica, an employers' organization) and the CGT, and prohibited another important labour organization, *Las 62 Organizaciones*. The Junta also suspended the *Fuero Sindical* (Special Labour Law) as being unconstitutional and temporarily suspended the right to strike or any action which could interrupt or reduce production both on the part of workers and management. Prison sentences were established for anyone found guilty of stopping industrial production. In 1977 the CGE was dissolved.

TRANSPORT

RAILWAYS

It is government policy to rationalize the railways. In 1977 the number of employees was reduced by over 20,000. By eliminating branch lines and disused stations, and concentrating on trunk lines, the volume of freight transported by rail has increased by 20 per cent since March 1976 with the result that the railway's budget deficit has been reduced by 60 per cent.

Ferrocarriles Argentinos (FA): Avda. Ramos Mejía 1302, 1104 Buenos Aires; f. 1948; autonomous body consisting of representatives of the Government, railway unions and managers of the various lines, Pres. Gen. TOMÁS JOSÉ CABALLERO.

AUSTRALIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Commonwealth of Australia occupies the whole of the island continent of Australia in the South Pacific and the offshore island of Tasmania to the south-east. Australia's nearest neighbour is Papua New Guinea. In the summer there are tropical monsoons in the northern part of the continent (except for the Queensland coast), but the winters are dry. Both the north-west and north-east coasts are liable to experience tropical cyclones between December and April. In the southern half of the country, winter is the wet season; rainfall decreases rapidly inland. Very high temperatures are experienced during the summer months over the arid interior and for some distance to the south, as well as during the pre-monsoon months in the north. In the past 100 years Australia has suffered at least seven major droughts affecting most of the country. More than 98 per cent of the population are of European origin. English is the official language. Over 88 per cent of the population were Christian in 1966. The national flag (proportions 2 by 1) is blue with a Union Jack in the upper hoist, a large seven-pointed white star in the lower hoist and five smaller white stars in the form of the Southern Cross in the fly. The capital, Canberra, lies in one of two enclaves of Federal Territory known as the Australian Capital Territory.

Recent History

Since the Second World War Australia has taken an important place in Pacific and Asian affairs and has strengthened its political and economic ties with India, South-East Asia and Japan. The country co-operates more closely than formerly with the U.S.A., and contributed troops to the war in Viet-Nam until 1972. As a founder-member of the Colombo Plan it has given much aid in money, materials and training to Asian countries. In June 1976 Australia signed a Basic Treaty of Friendship and Co-operation with Japan.

In 1966 Sir Robert Menzies resigned after sixteen years as Prime Minister, and was succeeded by Harold Holt, who died the next year. His successor, Senator John Gorton, resigned after a vote of no confidence and William McMahon was Prime Minister from March 1971 until December 1972, when, after 23 years in office, the Liberal-Country Party Coalition was defeated by the Labor Party, led by Gough Whitlam.

In May 1974 elections were held for both Houses after a crisis concerning supply funds split the Parliament and led to the dissolution of both Houses. Labor was returned but lost its majority in the Senate and had its majority in the House of Representatives reduced. In June the Liberal and National (formerly National Country) Parties formed a joint Opposition.

In mid-1975 the Whitlam government narrowly survived accusations of unorthodox international loan-raising activities. Opposition to the Government's monetary policy became more strenuous in October when the Senate exercised a constitutional right in blocking Budget Bills concerning money supply. An impasse developed in which

the Opposition was in theory prepared to delay supply indefinitely and the Government was not willing to consent to a general election over the issue. The Senate received further support for its policy of deferment and proposed a general election to be held before mid-1976, which Mr. Whitlam rejected. On November 11th the Governor-General, Sir John Kerr, intervened and took the unprecedented step of dismissing the Government and installing a caretaker ministry, under Malcolm Fraser, the Liberal leader, to govern until elections. Despite widespread strikes and demonstrations in favour of Mr. Whitlam, the elections in December produced a large Liberal majority and Mr. Fraser formed a coalition government with the Country Party. His subsequent policies encountered strong opposition from trade unions, particularly over the proposed restructuring of the Medibank national health service founded by the Whitlam Government. Mr. Fraser called a general election for December 1977 and his coalition was returned with a greatly increased majority. The Labor Party suffered heavy losses to the new Australian Democratic Party, and Mr. Whitlam resigned as leader of his party.

Although the Government is to retain control of uranium, it has agreed to give the Northern Territory "responsible self-government" by July 1979; power is being gradually transferred from Canberra to Darwin.

The Aboriginal Land Rights Act was passed in January 1977 as part of a scheme to establish aboriginal land trusts. These trusts will hold title to land in the Northern Territory on behalf of the traditional owners and will be administered by land councils.

Government

Australia comprises six states and two federally-administered territories. Executive power is vested in the Queen and exercised by her appointed representative, the Governor-General. He normally acts on the advice of the Federal Executive Council, led by the Prime Minister. The Governor-General appoints the Prime Minister and, on the latter's recommendation, other Ministers.

Legislative power is vested in the Federal Parliament. This consists of the Queen, represented by the Governor-General, and two chambers elected by universal adult suffrage (voting is compulsory). The Senate has 64 members (10 from each State and two from each of the federal territories) elected by proportional representation for six years, with half the Senators retiring every three years. The House of Representatives has 124 members elected for three years (subject to dissolution) from single-member constituencies. The Federal Executive Council is responsible to Parliament.

Each State has a Governor, representing the Queen, and its own legislative, executive and judicial system. The State Governments are autonomous except for certain powers placed under the jurisdiction of the Federal Government. All except Queensland have an Upper House, the Legislative Council, and a Lower House, the Legislative Assembly or House of Assembly. The chief ministers of the

AUSTRALIA

Introductory Survey

States are known as Premiers, as distinct from the Federal Prime Minister.

Defence

Australia's defence policy is based on collective security and it is a member of the British Commonwealth Strategic Reserve and ANZUS, with New Zealand and U.S.A. Australia's armed forces numbered 69,350 at June 1977 (army 31,800, navy 16,200, air force 21,650). The estimated expenditure on defence for 1976/77 is \$A2,200 million. Service in the armed forces is voluntary.

Economic Affairs

Australia's traditional reliance on the agricultural sector has been eroded by the phenomenal oil and mineral discoveries of recent years. Some 70 per cent of Australia's oil requirements are now met by domestic sources. In 1972/73 agriculture contributed around 8 per cent of Gross Domestic Product (G.D.P.) and the share of agricultural products in total export trade declined to about 50 per cent in the mid-1970s, with wool, wheat, meat, sugar and dairy products remaining major export items. Gold, silver, lead, zinc and copper have long been exploited, but recent discoveries of vast deposits of oil, natural gas, coal, nickel, iron ore and bauxite have transformed the economy. The Northern Territory contains over 20 per cent of the world's known reserves of low-grade uranium. In 1977 the Fraser Government, despite public opposition, agreed to lift the ban on the uranium export industry, subject to stringent nuclear safeguards and export conditions. In 1975/76 minerals accounted for 28 per cent of export revenue. Many of these minerals are being exploited as raw materials for Japan's industries. The pattern of Australia's dependence on foreign trade has thus undergone a change, with Japan overtaking Western countries as the major market, currently providing one-fifth of imports and taking one-third of Australian exports.

Manufacturing industries contributed 25 per cent of G.D.P. in 1974/75, but employment in this area declined to under 1.3 million, mainly in iron and steel and engineering. Other important industries are food processing, machinery, motor vehicles, chemicals, electrical and electronic equipment. Domestic sources of energy are coal, gas, hydro- and thermal-electricity. Oil and natural gas production totalled 24.5 million and 6.4 million cubic metres respectively during 1976/77.

Australia has been experiencing inflation and unemployment in recent years, and the Australian dollar has been under pressure. Inflation dropped to about 10 per cent in 1977, from about 13 per cent in 1976, but unemployment rose to 5.5 per cent from a level of 4.7 per cent at the end of 1976. In the 1975/76 and 1976/77 budgets the Fraser Government has been following a policy of wage restraint and cuts in public spending. In 1975/76 there was a trade surplus of A\$1,300 million.

Transport and Communications

Australia has a well developed transport system with 40,750 km. of railway, 837,866 km. of roads and over 133,000 km. of scheduled air routes. In the thinly populated areas of Central and Western Australia air trans-

port is extremely important and Australia has pioneered services such as the Flying Doctor Service to overcome the problems of distance. Australia is well served by international shipping and air lines. Its civil aviation industry is expanding rapidly and in 1975/76 Australia's domestic airlines carried over nine million passengers.

Social Welfare

Australia provides old age pensions, invalid, maternity, sickness and unemployment benefits and children's allowances. In July 1975 a new government health insurance scheme was introduced. Reciprocal welfare agreements operate between Australia and New Zealand and the United Kingdom. About 25 per cent of Federal budget expenditure is allocated to welfare.

Education

Education is the responsibility of each of the six States and the Federal Government. It is free and compulsory from the ages of 6 to 15. In 1976 there were 2,335,431 children enrolled in government primary and secondary schools, and some 624,819 attending private schools. Special services have been developed to meet the needs of children living in the outback, notably Schools of the Air, using two-way receiver sets. A system of one-teacher schools also helps meet these needs. Australia has 19 universities with (in 1977) 158,411 students.

Tourism

Australian tourism is developing with quicker and cheaper air transport. The main attractions are swimming and surfing on the Pacific beaches, sailing from Sydney and other harbours, skin-diving along the Great Barrier Reef, winter sports in the Australian Alps and summer sports in the Blue Mountains. Over half a million tourists visited Australia in 1976.

Visas are not required by citizens of New Zealand.

Sport

Australians play tennis, cricket and a number of codes of football. They are enthusiastic followers of horse-racing and they also pursue water sports.

Public Holidays

1978: March 24th-27th (Easter), April 25th (Anzac Day), June 5th* (Queen's Official Birthday), December 25th (Christmas Day), December 26th (Boxing Day†).

1979: January 1st (New Year's Day), January 26th (Australia Day).

* June 12th in Queensland; October 9th in Western Australia.

† Boxing Day is not a public holiday in South Australia.

There are also numerous State holidays.

Weights and Measures

The imperial system of weights and measures is gradually being replaced by the metric system.

FINANCE

100 cents=1 Australian dollar (\$A).

Coins: 1, 2, 5, 10, 20 and 50 cents.

Notes: 1, 2, 5, 10, 20 and 50 dollars.

Exchange rates (October 1977): £1 sterling=\$A1.576; U.S. \$1=88.8 Australian cents.

\$A100=£63.44=U.S. \$112.57.

Note: The Australian dollar was introduced in February 1966, replacing the Australian pound (exchange rate: £A1=U.S. \$2.24 from September 1949) at the rate of \$A2=£A1. From February 1966 to August 1971 the exchange rate remained at \$A1=U.S. \$1.12 (U.S. \$1=89.29 Australian cents). Between December 1971 and December 1972 the par value of the Australian dollar was U.S. \$1.216 (U.S. \$1=82.24 Australian cents), though the effective mid-point exchange rate was \$A1=U.S. \$1.191. Revaluations were made in December 1972 (\$A1=U.S. \$1.275), in February 1973 (\$A1=U.S. \$1.4167) and in September 1973 (\$A1=U.S. \$1.4875). This last valuation remained in effect until September 1974, when the direct relationship with the U.S. dollar was ended and the Australian dollar was linked to a weighted "basket" of the currencies of Australia's main trading partners. The Australian dollar's value immediately fell to U.S. \$1.31, representing an effective devaluation by 11.9 per cent. The currency maintained its weighted value until November 1976, when it was devalued by 17.5 per cent. From December 1976 it was frequently revalued by a small margin. The average value of the Australian dollar was: U.S. \$1.134 in 1971; U.S. \$1.192 in 1972; U.S. \$1.423 in 1973; U.S. \$1.441 in 1974; U.S. \$1.310 in 1975; U.S. \$1.225 in 1976. In terms of sterling the exchange rate was £1=\$A2.143 (\$A1=9s. 4d. or 46.67p) from November 1967 to December 1971; and £1=\$A2.188 from December 1971 to June 1972.

THE CONSTITUTION

PARLIAMENT

The legislative power of the Commonwealth is vested in a Federal Parliament, consisting of the Queen, represented by the Governor-General, a Senate, and a House of Representatives. The Governor-General may appoint such times for holding the sessions of the Parliament as he thinks fit, and may also from time to time, by Proclamation or otherwise, prorogue the Parliament, and may in like manner dissolve the House of Representatives. This power is limited by strict, although unwritten, constitutional understanding, and it is rare for such decisions to be made at the sole discretion of the Governor-General. After any general election Parliament must be summoned to meet not later than thirty days after the day appointed for the return of the writs.

THE SENATE

The Senate is composed of ten Senators from each State, two Senators representing the Northern Territory and two representing the Australian Capital Territory. The Senators are directly chosen for a period of six years by the people of the State, voting as one electorate, and are elected by proportional representation. They retire by rotation, half from each State on June 30th of each third year. The Senate may proceed to the dispatch of business notwithstanding the failure of any State to provide for its representation in the Senate.

If a Senator vacates his seat before the expiration of his term of service, the Houses of Parliament of the State for which he was chosen shall, in joint session, choose a person to hold the place until the expiration of the term or until the election of a successor. If the State Parliament is not in session, the Governor of the State, acting on the advice of the Executive Council, may appoint a Senator to hold office until Parliament reassembles, or until a new Senator is elected.

THE HOUSE OF REPRESENTATIVES

In accordance with the Constitution, the total number of members of the House of Representatives must be as nearly as practicable double that of the Senate. The number in each State is in proportion to population, but under the Constitution must be at least five. The House of Representatives is composed of 124 members, which includes two members for the Australian Capital Territory and one member for the Northern Territory.

Members are elected by universal adult suffrage and voting is compulsory. Qualifications for Commonwealth franchise are possessed by any British subject, not under 18 years of age, subject to certain disqualifications (e.g. if of unsound mind), who has lived in Australia for six months continuously.

Members are chosen by the electors of their respective electorates by the preferential voting system.

The duration of the Parliament is limited to three years.

Qualification for membership of the House of Representatives is possessed by any British subject 18 years of age or over who has resided in the Commonwealth for at least three years and who is, or is qualified to become, an elector of the Commonwealth.

THE EXECUTIVE GOVERNMENT

The executive power of the Federal Government is vested in the Queen, and is exercised by the Governor-General, assisted by an Executive Council of Ministers of State, known as the Federal Executive Council. These

Ministers are, or must become within three months, members of the Federal Parliament.

THE JUDICIAL POWER

The judicial power of the Commonwealth is vested in the High Court of Australia, in such other Federal Courts as the Australian Parliament creates, and in such other courts as it invests with Federal jurisdiction.

The High Court consists of a Chief Justice and not fewer than two other Justices, appointed by the Governor-General in Council. It has both an original and an appellate jurisdiction.

The High Court's original jurisdiction extends to all matters arising under any treaty, affecting representatives of other countries, in which the Commonwealth of Australia or its representative is a party, between States or between residents of different States or between a State and a resident of another State, and in which a writ of *mandamus*, or prohibition, or an injunction is sought against an officer of the Commonwealth of Australia. It also extends to matters arising under the Constitution or involving its interpretation, and to any other matters empowered by the Australian Parliament.

The appellate jurisdiction extends to appeals from all judgments, decrees, orders and sentences of its own Justices exercising original jurisdiction, of any other Federal Court or court exercising Federal jurisdiction and of the Supreme Court of any State or any other State court from which an appeal lies to the Queen in Council.

The Australian Industrial Court is composed of a Chief Judge and eleven other Judges. The Australian Conciliation and Arbitration Commission comprises a President, Deputy Presidents and a number of Conciliation Commissioners. Jurisdiction in bankruptcy and insolvency is administered by the Federal Court of Bankruptcy or State Courts of Insolvency, or State Courts exercising Federal jurisdiction. There is a Supreme Court in the Australian Capital Territory and in the Northern Territory. State courts, including courts of summary jurisdiction, are invested with Federal judicial power, principally to deal with offences created by Federal statutes.

THE STATES

The Australian Constitution safeguards the Constitution of each State by providing that it shall continue as at the establishment of the Commonwealth, except as altered in accordance with its own provisions. When a State law is inconsistent with a law of the Commonwealth, the latter prevails, and the former is invalid to the extent of the inconsistency. However, the legislation of the Australian Parliament is limited in the main to those matters which are listed in section 51 of the Constitution, while the States possess, as well as concurrent powers in those matters, residual legislative powers enabling them to legislate in any way for "the peace, order and good Government" of their respective territories.

The States may not, without the consent of the Commonwealth, raise or maintain naval or military forces, or impose taxes on any property belonging to the Commonwealth, nor may the Commonwealth tax State property. The States may not coin money.

The Commonwealth may not enact any law for establishing any religion or for prohibiting the exercise of any religion, and no religious test may be imposed as a qualification for any office under the Commonwealth.

The Commonwealth is charged with protecting every State against invasion, and, on the application of a State Executive Government, against domestic violence.

AUSTRALIA

The Constitution

Provision is made under the Constitution for the admission of new States and for the establishment of new States within the Commonwealth.

ALTERATION OF THE CONSTITUTION

Proposed laws for the amendment of the Constitution must be passed by an absolute majority in both Houses of Parliament, and not less than two or more than six months after its passage through both Houses the proposed law must be submitted in each State to the qualified electors.

In the event of one House twice refusing to pass a proposed amendment which has already received an absolute majority in the other House, the Governor-General may, notwithstanding such refusal, submit the proposed amendment to the electors. If, in a majority of the States a majority of the electors voting approve the proposed law and if a majority of all the electors voting also approve, it shall be presented to the Governor-General for Royal Assent.

No alteration diminishing the proportionate representation of any State in either House of the Parliament, or the minimum number of representatives of a State in the House of Representatives, or increasing, diminishing or altering the limits of the State, or in any way affecting the provisions of the Constitution in relation thereto, shall become law unless the majority of the electors voting in that State approve the proposed law.

NEW SOUTH WALES

The executive power is vested in the Governor, appointed by the Crown, who is assisted by a Cabinet.

The legislative power is vested in a Parliament of two Houses, the Legislative Council and the Legislative Assembly. The former consists of sixty members, elected at a joint sitting of both Houses of Parliament, for a term of twelve years, fifteen members retiring every three years. The Legislative Assembly consists of ninety-nine members, and sits for three years.

VICTORIA

The legislative authority is vested in a bicameral Parliament: the Upper House, or Legislative Council, of forty members, (to be increased to forty-four in 1979), elected for six years, and the Lower House, or Legislative Assembly, of eighty-one members, elected for three years. One-half of the members of the Council retire every three years.

In the exercise of the executive the Governor is assisted by a Cabinet of responsible Ministers. Not more than five members of the Council and not more than thirteen members of the Assembly may occupy salaried office at any one time.

The State has eighty-one electoral districts, each returning one Member, and twenty-two electoral provinces, each returning two Members.

QUEENSLAND

Legislative power rests with a unicameral Parliament composed of eighty-two members elected from eighty-two districts for a term of three years.

SOUTH AUSTRALIA

The Constitution vests the legislative power in a Parliament elected by the people and consisting of a Legislative Council and a House of Assembly. The Council is composed of twenty-two members, half of whom retire every three years. Their places are filled by new members elected under a system of proportional representation, with the whole State as a single electorate. The executive has no authority to dissolve this body.

The forty-seven members of the House of Assembly are elected for three years from forty-seven electoral districts.

The executive power is vested in a Governor, appointed by the Crown, and an Executive Council consisting of twelve responsible Ministers.

WESTERN AUSTRALIA

The administration is vested in the Governor, a Legislative Council and a Legislative Assembly.

The Legislative Council consists of thirty-two members, each of the sixteen provinces returning two members. Election is for a term of six years, one-half of the members retiring every three years.

The Legislative Assembly consists of fifty-five members, elected for three years, each representing one electorate.

The entire management and control of the unalienated lands of the Crown in Western Australia is vested in the State Legislature.

TASMANIA

The executive authority is vested in a Governor, appointed by the Crown and acting upon the advice of a Legislative Council and House of Assembly. The Council consists of nineteen members who sit for six years, retiring in rotation. There is no power to dissolve the Council. The House of Assembly has 35 members elected for four years.

NORTHERN TERRITORY

The Northern Territory is administered on behalf of the Commonwealth Government by the Administrator and the Department of Northern Australia in Darwin. In addition, the Legislative Assembly of 19 elected members is given the power to make Ordinances for the peace, order and good government of the Northern Territory.

AUSTRALIAN CAPITAL TERRITORY

The Australian Capital Territory, within which the Seat of Government is situated, is administered by the Federal Government. Under legislation passed by the Parliament the Governor-General is given power to make Ordinances for the peace, order and good government of the Territory. There is established in the Territory an elected Legislative Assembly, consisting of 18 elected members, which may advise the Government on matters affecting the Territory.

JUDICIAL SYSTEM

The judicial power of the Commonwealth is vested in a Federal Supreme Court, the High Court of Australia, consisting of a Chief Justice and six Justices and such other courts as the Federal Parliament may create. Parliament can also vest certain Federal jurisdiction in State courts. The High Court has original jurisdiction in all matters arising under treaties or affecting representatives of other countries, and in certain matters in which the Commonwealth or the States are concerned. It also hears and determines appeals from judgments of its own Justices exercising original jurisdiction, and generally, either as of right or by way of special leave, from judgments of any other Federal Court or of the Supreme Court of any State. Appeals may be made from State courts to the Judicial Committee of the Privy Council in the United Kingdom in non-Federal matters. Each State has a Supreme Court as well as a combination of lesser courts.

In February 1977 the Federal Court of Australia was established. The Court has assumed, in two divisions, the jurisdiction previously exercised by the Australian Industrial Court and the Bankruptcy Court. It also hears appeals from State and Territory Courts in certain areas of Federal law, chiefly administrative.

THE PRESS

Australia's legislation relating to the Press varies in different States.

Under the law concerning contempt of court, since the court takes jurisdiction from the time the accused is arrested, to publish names or photographs before proceedings begin may draw heavy penalties. Though accurate reporting of a case while it is being tried is privileged, and has been known to extend to a degree of scandal, a judge is empowered to ban all reports until the conclusion of the case.

Each state has its legislation against obscene publications, which is particularly severe in the State of Queensland, whose broadly defined Objectionable Literature Act of 1954 covers a wide range of offences.

The libel law ranges from seditious libel for matter liable to cause a breach of the peace, or for excessive abuse of government officials, to defamatory libel. Certain government agencies have privilege.

The total circulation of Australia's daily newspapers was very high in 1972 at about 5,282,000 copies per issue, or 408 for every 1,000 inhabitants. Weekly papers are even more popular as they more successfully penetrate to the remoter parts of the country, whereas metropolitan dailies meet competition from small local papers. The circulation of newspapers has traditionally been almost entirely confined to the state in which each is produced. The only exceptions, which may fairly claim a national circulation, are the dailies *The Australian* and *Australian Financial Review*, and the weeklies, *The Bulletin*, the *National Times* and the *Nation Review*.

The main newspaper centres are Sydney, where the morning *Daily Telegraph* competes with the *Sydney Morning Herald*, and the evening *Daily Mirror* competes with *The Sun*, and Melbourne, where *The Age* competes with *The Sun News-Pictorial*, both morning papers. Perth, Adelaide and Brisbane each have only one major morning and one major evening paper.

Among the daily papers most respected for their serious news treatment should be mentioned the *Sydney Morning Herald*, *The Age* (Melbourne), *The Australian*, *The Canberra Times* and the *Australian Financial Review*. The most popular dailies include Melbourne's *Sun News-Pictorial* (625,000) and *Herald* (436,000), Sydney's *Daily Telegraph* (326,000), *Sun* (328,419) and *Daily Mirror* (389,078), *Sydney Morning Herald* (269,165) and Brisbane's *Courier Mail* (269,000), and Adelaide's *Advertiser* (235,600).

All newspapers in the state capitals are owned by limited companies. The trend towards concentration of ownership has led to the development of three principal groups of newspapers. Economic conditions have necessitated the extension of the activities of newspaper companies into related spheres, magazine and book publishing, radio and television, etc. The main groups are as follows:

The Herald and Weekly Times Group: 44 Flinders St., Melbourne, Vic. 3000; Chair. KEITH D. MACPHERSON: controls *The Herald* and *The Sun News-Pictorial* (Melbourne), *The Bendigo Advertiser*, *The Geelong Advertiser*, *West Australian Daily News* (Perth), *Kalgoorlie Miner*, *Papua New Guinea Post-Courier*, *Fiji Times*, and also has holdings in several magazines and radio and television companies.

The John Fairfax Group: 235 Jones St., Broadway, P.O.B. 506, Sydney, N.S.W. 2001; Chair. J. O. FAIRFAX: with its subsidiary Associated Newspapers Ltd., controls *The Sydney Morning Herald*, *The Sun*, *National Times*, *Australian Financial Review* and the *Sun-Herald* (Sydney), *The Canberra Times* (Canberra) and *Illawarra Mercury* (Wollongong); also has radio and television interests.

News Ltd.: 2 Holt St., Surry Hills, Sydney, N.S.W. 2010; Chair. Sir NORMAN YOUNG; Chief Exec. RUPERT MURDOCH; controls *Adelaide News* (Adelaide), *The Australian*, *Daily Mirror* and *Sunday Mirror* (Sydney), *The News* (Darwin), *Sunday Sun* (Brisbane), *The Sydney Daily Telegraph* and *Sunday Times* (Perth) and *Truth* (Melbourne); also has a 50 per cent share with Herald and Weekly Times Group in the *Sunday Mail* (Adelaide); also publishes suburban and country newspapers.

Also of some importance are the following:

Consolidated Press Group: 168 Castlereagh St., Sydney; controls *The Maitland Mercury*, and magazines including *The Australian Woman's Weekly* and *The Bulletin*.

David Syme & Co. Ltd., Melbourne: of which John Fairfax Ltd. owns 53 per cent; publishes *The Age* and other newspapers in Victoria.

AUSTRALIAN EXTERNAL TERRITORIES

CHRISTMAS ISLAND

NORFOLK ISLAND

COCOS (KEELING) ISLANDS

OTHER TERRITORIES

CHRISTMAS ISLAND

Christmas Island covers an area of about 135 square kilometres and lies 360 kilometres south of Java Head in the Indian Ocean. The nearest point on the Australian coast is North West Cape.

Administration was transferred from Singapore to Britain on January 1st, 1958, pending final transfer to Australia. It became an Australian territory on October 1st, 1958. The island has no indigenous population. At June 30th, 1977, the total population was 3,255 (1,839 Chinese, 956 Malays, 378 Europeans and 82 others). Residents consist of employees of the British Phosphate Commissioners and the Administration and their families. The recovery of phosphates is the sole economic activity, and exports were 995,650 metric tons of phosphate rock, 123,260 tons of phosphate dust and 15,285 tons of citraphos dust for the year ending June 30th, 1977.

Administrator: F. C. BOYLE.

Supreme Court: Judge: The Hon. Mr. Justice E. A. DUNPHY.

Christmas Island Broadcasting Station: Lower Drumsite; daily broadcasting service by Radio VLU 2.

There were 2,000 radio sets in 1975.

Christmas Island Phosphate Commission: 515 Collins St., Melbourne, Vic. 3000, Australia. The British Phosphate Commissioners are the managing agents for the Christmas Island Phosphate Commission. Commissioners: M. C. TIMBS (Australia), W. D. BREMNER (New Zealand), W. B. MARSTON, O.B.E. (Commissioner jointly for Australia and New Zealand). On behalf of the governments of Australia and New Zealand, the Commission controls the Christmas Island mining operation and the distribution of phosphate from Christmas Island (Indian Ocean), Ocean Island, Nauru and other sources to Australia and New Zealand.

Transport: Australian Government charter aircraft operate a three-weekly service from Perth. The British Phosphate Commissioners conduct a cargo-shipping service to Singapore and Australian ports. They also operate flights from Singapore and Malaysia to Christmas Island.

NORFOLK ISLAND

Norfolk Island is about 8 km. long and 4.8 km. wide and was discovered by Captain Cook in 1774. The island was used as a penal settlement from 1788 to 1813 and again from 1825 to 1855. It was a separate Crown Colony until 1897, when it became a Dependency of New South Wales. In 1913 it was transferred to the Australian Government.

In November 1976 a report by the Nimmo Royal Commission was tabled in Parliament in Canberra. The Report recommends that Norfolk Island be politically integrated into mainland Australia, thus making the islanders part of the electorate of Canberra. Following an appeal made by the Norfolk Island Council in February 1977, the UN Committee on Decolonization has advised

the islanders that it is unable to take up their case against possible incorporation into Australia. Two-thirds of the island's electorate have signed a declaration stating that they wish the island to remain a distinct and separate Australian Territory with its own system of laws, benefits and taxes.

Area: 3,455 hectares; Estimated population (June 30th, 1977): 1,825.

About 405 hectares are arable. The main crops are Kentia palm, cereals, vegetables and fruit. The Administration is increasing the area devoted to Norfolk Island pine and hardwoods. Seed of the Norfolk Island pine is exported. Tourism is the island's main industry. In 1976/77 there were 18,844 visitors.

STATISTICS

Imports (year ending June 30th, 1977): \$A6,472,245, mainly from Australia.

Exports (1977): \$A800,912.

Budget (year ending June 30th, 1977): Revenue \$A1,678,827; Expenditure \$A1,584,344.

THE GOVERNMENT

ADMINISTRATION

Administrator: DESMOND O'LEARY.

The Administrator is appointed by the Governor-General of Australia. The Norfolk Island Council acts as an advisory body to the Administrator, who is its Chairman. The eight members are elected by adult franchise. Legislation must be referred to the Council for its advice.

JUDICIAL SYSTEM

Supreme Court of Norfolk Island; appeals lie to the High Court of Australia.

Judges: The Hon. Sir PERCY JOSKE, C.M.G., The Hon. Mr. Justice E. A. DUNPHY.

PRESS AND RADIO

Norfolk Island News: Collins Head Rd.; f. 1975; weekly; Proprietor and Editor E. HOWARD.

Norfolk Island Government Gazette: Kingston; weekly.

Norfolk Islander: "Greenways Press", Queen Elizabeth Ave.; f. 1965; weekly; circ. 1,100; Co-Editors Mr. and Mrs. THOMAS LLOYD.

Norfolk Island Broadcasting Service: Norfolk Island Administration; broadcasts about 45 hours of programmes a week; Broadcasting Officer Mrs. K. M. LECREN.

There were 1,150 radio receivers in 1975.

FINANCE, TRADE AND TOURISM

Banking: There are branches of the Commonwealth Trading Bank, the Commonwealth Savings Bank of Australia, the Bank of New South Wales Trading Bank and the Bank of New South Wales Savings Bank.

AUSTRALIAN EXTERNAL TERRITORIES

Trade Association: Norfolk Island Chamber of Commerce;
Pres. R. C. H. IRVINE; Sec. G. C. DUVALL; 92 mems.
Tourism: Norfolk Island Tourist Bureau, Burnt Pine.

TRANSPORT

There are about 80.5 km. of roads, including 33 km. of sealed road. Regular air services operate between Sydney and Auckland and Norfolk Island, and between Brisbane, Lord Howe Island and Norfolk Island. There are also regular shipping services from Sydney and New Zealand. A small tanker from Nouméa (New Caledonia) delivers petroleum products to the island.

COCOS (KEELING) ISLANDS

The Cocos (Keeling) Islands are 27 in number and lie 2,768 kilometres north west of Perth in the Indian Ocean. The islands, which have an area of 14 square kilometres, form two low-lying coral atolls, densely covered with coconut palms. The population on June 30th, 1977, was 444, comprising 125 Australian Administration employees and their families on West Island and 319 Cocos Malays on Home Island, the only inhabited islands in the group. The Cocos Malays are descendants of the original labourers brought to the islands in the early nineteenth century by John Clunies Ross.

The islands were declared a British possession in 1857 and came successively under the authority of the Governor of Ceylon (1878) and the Governor of the Straits Settlements (1886); they were annexed to the Straits Settlements and incorporated with the Settlement (later Colony) of Singapore in 1903. Administration of the islands was transferred to the Commonwealth of Australia in November 1955.

An Administrator, appointed by the Governor-General of Australia and responsible to the Minister for Administrative Services, is the senior government representative in the islands.

The Australian Government has, in recent years, sought to lessen the degree of dependence of the Home Islanders on the Clunies Ross Estate which for over a century has exercised almost complete control over the economy, employment and welfare of the islanders. In 1975 negotiations for the purchase of the Estate's lands by the Australian Government broke down but in 1976 officials reaffirmed their intention to carry through the takeover, and protracted discussions began. In addition to concern for the islanders' welfare Australia is interested in the development of its military base on West Island, which it purchased in 1951.

In June 1977 the Australian Government announced a number of policy decisions aimed at ensuring the political, social and economic advancement of the Cocos Islanders. The major decisions were that the inhabitants of the Territory should have the right to their own land on Home Island; that there should be a form of representative local government; the principle of freedom of movement and association was endorsed without reservation, there should be improvement in education and living standard generally; and provision of Australian citizenship to all residents wishing to become Australian citizens be simplified.

Cocos (Keeling) Islands, etc.

Administrator: C. I. BUFFETT, M.B.E.

Supreme Court, Cocos (Keeling) Islands: Judge: The Hon. Mr. Justice E. A. DUNPHY.

Radio Cocos: daily broadcasting service from 15.30 to 23.30 by Radio VKW, West Island.

There were 650 radio receivers in 1975.

The main economic activity is the production and export of copra, which is controlled by the Clunies Ross Estate. Total exports in 1975/76 were 423 metric tons.

Australian Government charter aircraft carry passengers, supplies and mail to and from the Cocos every three weeks. Cargo vessels deliver supplies, usually at six-monthly intervals.

OTHER TERRITORIES

AUSTRALIAN ANTARCTIC TERRITORY

The AUSTRALIAN ANTARCTIC TERRITORY was established by Order in Council, proclaimed in August 1936, subsequent to the Australian Antarctic Territory Acceptance Act (1933). It consists of the portion of Antarctica (divided by the French territory of Adélie Land) lying between longitudes 45°E and 136°E, and between longitudes 142°E and 160°E. The Australian National Antarctic Research Expeditions (ANARE) maintains three permanent scientific stations, Mawson, Davis and Casey, in the territory. The area of the territory is 6,120,000 sq. kilometres.

HEARD ISLAND AND McDONALD ISLANDS

These islands are situated 4,000 km. south-west of Perth, Western Australia, and have been administered by the Australian Government since 1947, when it established a scientific research station on Heard Island (which functioned until 1955). The area is 370 sq. kilometres. There are no permanent inhabitants, but Australian expeditions visit the island from time to time. Heard Island is about 44 kilometres long and 20 wide. The McDonald Islands, with an area of about one sq. kilometre, lie approximately 40 km. to the west of Heard Island.

CORAL SEA ISLANDS TERRITORY

The Coral Sea Islands Territory was created in May 1969 and is composed of a number of islands situated east of Queensland between the Great Barrier Reef and 157° 10'E longitude. The islands had been acquired by the Commonwealth by acts of sovereignty over a number of years. All are very small and they include Cato Island, Chilcott Islet in the Coringa Group, and the Willis Group. Three members of the Commonwealth Bureau of Meteorology are stationed on one of the Willis Group, but the remainder of the islands are uninhabited.

The Act constituting the Territory did not establish an administration on the islands but provides means of controlling the activities of those who visit them. The possibility of exploration for oil on the continental shelf and the increasing range and scope of international fishing enterprises made desirable such an administrative framework and system of law. The Governor-General is empowered to make ordinances for the peace, order and good government of the Territory, and the Supreme Court and Court of Petty Sessions for Norfolk Island have jurisdiction in relation to the Territory.

THE BAHAMAS

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Commonwealth of the Bahamas consists of about 700 islands and over 2,000 cays and rocks extending from off the Florida coast of the U.S.A. to just north of Cuba and Haiti. The climate is mild and sub-tropical. English is the official language. The population is mainly Christian, the largest denominations being the Anglicans, Baptists, Roman Catholics and Methodists. The flag has three equal horizontal stripes of blue, gold and blue, with a black triangle at the hoist extending across half the width of the flag. The capital, Nassau, stands on the island of New Providence.

Recent History

As a British colonial territory, the Bahamas were given increased responsibility for their own affairs in 1964 and 1968, and in 1969 the constitution was modified to give the Government some control of external affairs. In the general election in 1968 the Progressive Liberal Party (PLP), led by Lynden Pindling, won a majority in the House of Assembly. In the elections of September 1972, which were dominated by the issue of independence, the PLP maintained its majority, and on July 10th, 1973, the Bahamas became an independent nation within the Commonwealth. The Bahamas was admitted to the United Nations in September 1973. In the elections of July 1977, which were fought on the issues of unemployment and corruption, the PLP again retained its majority.

Government

There is a 16-member Senate, nine members appointed by the Governor-General on the advice of the Prime Minister, four by the Leader of the Opposition and three after consultation with the Prime Minister. Together with the 38-member House of Assembly, elected for five years (subject to dissolution) by universal adult suffrage, it forms a bi-cameral Parliament to which the Cabinet is responsible. Executive power is vested in the Queen, represented by a Governor-General who is advised by the Cabinet.

Defence

The Royal Bahamas Police Force is a semi-military organization. A defence force was established in 1977.

Economic Affairs

The economy is dependent on tourism, which accounts for over 70 per cent of G.N.P. The Government has introduced a programme of diversification in agriculture, finance and industry to lessen this dependence. A Bahamas Agricultural Corporation has been established to promote large-scale farming and the fishing industry. A five-year agricultural and fishing programme on the island of Andros was initiated in 1973 by the U.S. Agency for International Development as a joint venture with the Bahamas Government. In 1977 the Government declared an economic and fishing zone within 200 nautical miles (370 km.) of the islands' coastline.

Industrial development is based on the oil industry although the cement, pharmaceuticals and spirits indus-

tries are also expanding. The Government aims to attract light manufacturing and assembly industries and the Bahamas Development Corporation makes funds available by participating in ventures with foreign investors or with local concerns. The economy has suffered from the oil crisis. The oil transshipment terminal completed in 1974 is dealing with only 36 million barrels per year, compared with its capacity of 150 million, and a 500,000-barrel oil refinery is operating at half capacity. Legislation intended to develop the islands as an international shipping centre by allowing foreign-owned vessels to register under the Bahamian flag was approved in November 1976.

Although the Government is committed to retaining the Bahamas' status as a tax haven, recent measures to "Bahamianize" the companies registered in the Bahamas have resulted in higher stamp, property, immigration and company registration fees. Of the 15,000 companies registered in 1976, 90 per cent were foreign. Legislation taxing all undeveloped properties held by foreigners or foreign-owned companies has also been approved.

Transport and Communications

Inter-island transport is by aircraft and boat and on the larger islands there are excellent roads for motor traffic. A 225-mile submarine 1,380-channel telecommunications system has been installed between the Bahamas and the U.S.A., and there are radio telephone connections between the islands.

Social Welfare

The health service is centralized in Nassau, although cottage hospitals and health centres exist in several of the Family Islands. A Flying Doctor Service supplies medical attention to islands not already provided for. A National Insurance Scheme supplies death, sickness and injury benefits and there is a government-supported old age pension scheme.

Education

The Bahamas contribute financially to the University of the West Indies, and in 1974 over 700 Bahamian students were registered at universities and colleges overseas. There is an extensive primary and secondary school education system. Education is free and compulsory between the ages of five and fourteen. In 1975 education received B\$27.7 million, representing 22 per cent of the total budgetary expenditure.

Tourism

The mild climate and beautiful beaches attract many tourists to the Bahamas and tourism is the principal source of income. In 1976, 1,403,640 tourists visited the islands.

Nationals of Commonwealth countries may visit the Bahamas without visas. Nationals of the following countries may visit without a visa for eight months: Belgium, Denmark, Finland, Greece, Iceland, Italy, Liechtenstein, Luxembourg, Netherlands, Norway, San Marino, Spain, Sweden, Switzerland, Turkey, U.S.A.;

B\$100 = £56.35 = U.S. \$100.00.

Note: The Bahamian dollar was introduced in May 1966, replacing the Bahamian pound (at par with the pound sterling) at the rate of B\$1 = B£0.35 or 7 shillings. The new currency had an initial value of 98 U.S. cents (U.S. \$1 = B\$1.0204), which remained in effect until February 1970. Since February 1970 the Bahamian dollar has been at par with the U.S. dollar, despite two devaluations of U.S. currency (in December 1971 and February 1973). In terms of sterling, the exchange rate was £1 = B\$2.4490 (B\$1 = 8s. 2d.) from November 1967 to February 1970; £1 = B\$2.40 (B\$1 = 8s. 4d. or 41.67p) from February 1970 to August 1971; and £1 = B\$2.6057 (B\$1 = 38.38p) from December 1971 to June 1972.

THE CONSTITUTION

Parliament consists of the Queen, represented by a Governor-General, a nominated Senate and an elected House of Assembly. The Governor-General appoints the Prime Minister and the Cabinet on the advice of the Prime Minister. The Cabinet has not fewer than eight other ministers, of which one is the Attorney-General. The Governor-General appoints a Leader of the Opposition.

The Senate (upper house) consists of 16 members of whom nine are appointed by the Governor on the advice of the Prime Minister, four members on the advice of the

Opposition Leader, and three on the Prime Minister's advice after consultation with the Opposition Leader. The House of Assembly (lower house) has 38 members. A Constituencies Commission reviews numbers and boundaries at intervals of not more than five years and can recommend alterations for approval of the House. The life of Parliament is limited to a maximum of five years.

The constitution provides for a Supreme Court and a Court of Appeal.

JUDICIAL SYSTEM

The Bahamas Court of Appeal, the Supreme Court, the Magistrates' Courts and the Juvenile Courts are the main courts of the Bahamian judicial system.

All Courts, apart from the Juvenile Courts which are concerned only with criminal matters, have both a criminal and civil jurisdiction. All but the Supreme Court are of limited jurisdiction. The Magistrates' Courts are presided over by a lay Commissioner, or by a professionally qualified Stipendiary and Circuit Magistrate in New Providence and Grand Bahama.

Whereas all magistrates are empowered to try offences which may be tried summarily, a Stipendiary and Circuit Magistrate may, with the consent of the accused, also try certain less serious indictable offences. But a Stipendiary

and Circuit Magistrate may, in no case, pass a sentence of imprisonment of more than two years for any one offence or impose a fine in excess of B\$1,500. For the lay magistrate these limits are lower.

All magistrates may make maintenance orders, and, in certain circumstances, orders for separation and custody of children. Where title to land is not in dispute and the value of the land is B\$142.85 or less they may hear and determine the case.

A lay magistrate has a jurisdiction of up to B\$285.71 for matters of contract or tort. But when a case is remitted to him by the Supreme Court the limit is B\$428.56. The limit for a Stipendiary and Circuit Magistrate is B\$571.42.

Appeals in all matters lie to the Court of Appeal, with further appeal in certain instances to the Judicial Committee of the Privy Council in the United Kingdom.

Justices of the Supreme Court: Sir LEONARD J. KNOWLES, C.B.E., JAMES A. SMITH, T.D., C.B.E., SAMUEL GRAHAM, C.M.G., O.B.E., KENNETH POTTER, Q.C.

Justices of the Court of Appeal: Sir MICHAEL HOGAN, C.M.G., Q.C., B.A., LL.D., Sir WILLIAM DUFFUS, Prof. TELFORD GEORGES, Sir ALASTAIR BLAIR-KERR.

BAHRAIN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The State of Bahrain consists of a group of islands situated midway down the Arabian Gulf about 18 miles from the east coast of Saudi Arabia. The climate is cool and temperate from December to the end of March, becoming very hot and humid during the summer months. In August and September temperatures can rise to 44°C (111°F). The official language is Arabic, but English is widely spoken. Bahrain is a predominantly Muslim country, the population being divided between the Sunnis and Shi'ites. The national flag (proportions 5 by 3) is scarlet, with a vertical white stripe at the hoist, the two colours separated by a serrated line. The port of Manama is the capital.

Recent History

Bahrain was a British Protected State from 1816 until 1971. In 1971 the British Government withdrew troops "east of Suez" and on August 15th, 1971, the Amir, Sheikh Isa, declared Bahrain an independent sovereign state, declining to join any federation of Gulf Emirates. Shortly afterwards Bahrain became a member of the United Nations and the Arab League. In August 1975 the arrest of left-wing dissidents was followed by the dissolution of the National Assembly, and by December 1977 no resumption of parliamentary life had taken place.

Government

Bahrain is an independent sovereign state ruled by an Amir through an appointed Cabinet. In August 1975 the National Assembly was dissolved (*see* National Assembly, p. 1598).

Defence

The Bahrain Defence Force consists of 2,300 men. In December 1971 Bahrain agreed to the U.S. Middle East fleet using part of the naval base formerly used by Britain. One year's notice of the termination of this facility was given to the U.S. Government during the October 1973 Arab-Israeli war. This was not implemented in 1974, but Bahrain took over the base in July 1977.

Economic Affairs

The traditional occupations of cattle breeding, agriculture and fishing are still practised throughout the islands. The main crops are vegetables, lucerne, other fodder crops and some dates. The Bahrain Fishing Company, jointly British and Bahraini owned, has now been operating successfully for several years.

Oil in commercial quantity was found in 1932 and has since been developed by the Bahrain Petroleum Company. Bahrain became a member of OAPC in May 1970. Although Bahrain's production of crude oil is relatively small it has a large refinery which processed 77.8 million barrels in 1976.

Important new communications facilities and port installations have improved Bahrain's transit trade. Storage and refrigeration facilities, a slipway and marine

engineering workshops have been installed at Mina Sulman. Bahrain has a free zone in which many British, American and local concerns have their headquarters. The ALBA aluminium smelter has an annual capacity of 120,000 tons (planned to be increased to 180,000 tons) and an OAPC dry dock, capable of accepting tankers of 400,000 d.w.t., was opened in December 1977.

In October 1975 the Government began to license "Off-shore Banking Units" (*see* Banking section), and by October 1977 40 "OBUs" were in operation.

Transport and Communications

Roads are good and there is a national bus system. Muharraq Airport is just over three miles from the centre of Manama and is the destination of one of the Concorde services from London. The port of Mina Sulman is being further developed, and the congestion evident in 1976 was eliminated in 1977.

Tourism

There are several archaeological sites of importance. Entry visas are required by all non-Bahrainis, except holders of British passports.

Social Welfare

The State-run medical service provides comprehensive in-patient and out-patient treatment. There are also dentists, doctors and opticians in private practice. A Social Security Law covering pensions, industrial accidents, sickness, unemployment, maternity and family allowances was introduced in October 1976.

Education

Education is free in Bahrain. In 1975/76, 41,751 children were receiving primary education in 1,099 classes. There were 8,533 pupils at intermediate level and 8,819 at secondary and technical level. The amount allocated to education in the 1976/77 budget was B.D. 11.4 million.

Public Holidays

1978: September 2nd-4th (Id ul Fitr), November 10th-12th (Id ul Adha), December 1st (Muslim New Year), December 8th-9th (Ashoura), December 16th (National Day).

1979: January 1st (New Year's Day), February 10th (Mouloud, Birth of the Prophet).

The metric system is being introduced.

Note: The Bahrain dinar was introduced in October 1965, replacing the Persian Gulf Indian rupee at the rate of 1 dinar = 10 rupees = 15 shillings sterling (£1 = 1.333 dinars). Until August 1971 the dinar was valued at U.S. \$2.10 (\$1 = 476.19 fils). Between December 1971 and February 1973 the dinar was worth U.S. \$2.28 (\$1 = 438.60 fils). In February 1973 the dinar's official parity was fixed at \$2.5333 (\$1 = 394.74 fils) but the market rate of exchange was 1 dinar = \$2.5284 (\$1 = 395.5 fils) from January 1975 to May 1976 and 1 dinar = \$2.5275 (\$1 = 395.6 fils) since May 1976. In terms of sterling, the value of the Bahrain dinar between November 1967 and June 1972 was 17s. 6d. (87½ new pence), the exchange rate being £1 = 1.143 dinars.

THE CONSTITUTION

A 108-article constitution was ratified in June 1973. It states that "all citizens shall be equal before the law" and guarantees freedom of speech, of the Press, of conscience and religious beliefs. Other provisions include the outlawing of the compulsory repatriation of political refugees. The constitution also states that the country's financial comptroller should be responsible to Parliament and not to the Government, and allows for national trade unions "for legally justified causes and on peaceful lines". Compulsory free primary education and free medical care are also laid down in the constitution. The constitution provides for a National Assembly, composed of the members of the Cabinet and 30 members elected by popular vote, although this was dissolved in August 1975.

NATIONAL ASSEMBLY

In accordance with the 1973 constitution elections to a National Assembly took place in December 1973. About 30,000 electors elected 30 members for a four-year term. Since political parties are not allowed, all 114 candidates stood as independents, but in practice the National

Assembly was divided about equally between conservative, moderate and more radical members. In addition to the 30 elected members, the National Assembly contained the members of the cabinet. In August 1975 the Prime Minister resigned because, it was said, the National Assembly was preventing the government from carrying out its functions. The Amir invited the Prime Minister to form a new government and two days later the National Assembly was dissolved by Amiri decree.

Numerous shipping services link Bahrain and the Gulf with Britain and with Europe (Strick Line, V.N.S. "Kerk" Line, Hansa Line, Nationale Compagnie Havraise Peninsulaire and Compagnie Maritime Belge, Kuwait Shipping Company, Iraqi Maritime Transport Corporation, Lauro Line, Yugo-Linea, Polish Ocean Lines); with the East and West Coasts of U.S.A. (Concordia Line, Nedlloyd Line); with Pakistan, India, Japan and the Far East and Australia (P & O, British & India Steam Navigation Company, Maersk Line, Everett Johnson Line, "K" Line of Japan, etc.). Though predominantly cargo operators, most of the foregoing lines have some passenger accommodation available; the British India Line operates a mail service between Bombay, Karachi, Bahrain and other Gulf Ports, and also carries passengers; the Mogul line operates mail and passenger services between Bombay and the Gulf, and the Pan Islamic Steamship Co. between Karachi and the Gulf ports.

The deep water harbour of Mina Sulman was opened in April 1962; it has ten berths capable of taking vessels of draughts up to 10 metres. In the vicinity are two slipways able to take vessels of up to 1,016 tonnes and 73 metres in length, with services available for ship repairs afloat. Further development for Mina Sulman is planned, for completion in 1979. A trawler basin is the centre of a flourishing shrimping industry, the packaged produce being exported primarily to Europe, North America and Japan.

A dry dock project, backed by OAPEC, was ready for use in October 1977. Known as Arab Shipbuilding and Repair Yards (ASRY), the yard can take tankers of up to 500,000 deadweight tons and was opened in December 1977.

CIVIL AVIATION

Bahrain Airport has a first-class runway, capable of taking the largest aircraft in use, and it was the destination of British Airways' first Concorde service. A new jumbo jet airport terminal was opened in December 1971 and expansion is still in progress.

Gulf Air: P.O.B. 138, Bahrain; f. 1950; jointly owned by the governments of Bahrain, Qatar, United Arab Emirates and Oman; services linking Bahrain, Doha, Abu Dhabi, Dubai, Sharjah, Salalah and Muscat with London, Amsterdam, Paris, Larnaca, Beirut, Cairo, Kuwait, Dharan, Shiraz, Bandar Abbas, Karachi, Bombay, Basra, Baghdad, Amman and Athens; fleet consists of four TriStars, five VC-10, four BAC 1-11, three F27, four Skyvans, two Islanders, two Beechcraft B80; five Boeing 737 were due to be delivered in June 1977.

Bahrain is served by the following foreign airlines: Air India, Alia, British Airways, Ethiopian Airlines, Iran Air, Iraqi Airways, KLM, Kuwait Airways, MEA, Pan American World Airways, PIA (Pakistan), Qantas, Saudia, TWA, Singapore International Airlines, UTA, Cathay, Pacific.

questions of cross-border terrorism and of the Farakka barrage, which was built by India to divert water from the Ganges to a tributary in India, which would clear excess silt from the port of Calcutta. This deprived Bangladesh of water for irrigation and river transport. After many unsuccessful talks, the two countries signed a five-year agreement on the sharing of the Ganges water in November 1977, bringing the 25-year dispute to an end.

Government

Since August 1975 Bangladesh has been governed under martial law. Parliament was dissolved in November 1975.

Defence

Military service is voluntary. In 1977 the army had a total strength of 65,000; the navy 3,000; the air force 3,000. The para-military forces included an Armed Police Reserve of 36,000, and the Bangladesh Rifles of 12,000. Budget expenditure on defence was estimated at 746 million taka for 1976/77.

Economic Affairs

Agriculture, in which 80 per cent of the population is employed, accounts for over half of Gross Domestic Product (G.D.P.). The land is fertile but crops are often destroyed by floods, cyclone and drought, and disruptions caused by the war of secession further depressed production after 1971.

Production of rice, which is grown on 80 per cent of cultivated land, fell sharply after independence and did not regain former levels until 1974. Better weather and availability of more fertilizers led to a record rice crop in 1975, totalling over 13 million tons (in terms of milled rice), and in 1976/77 12.8 million tons of rice were produced. However, self-sufficiency in rice is unlikely to be achieved, in view of the population growth rate of over 2 per cent a year, continuing fragmentation of land and frequent natural disasters.

Jute and tea are the main cash crops. Bangladesh supplies about 90 per cent of world raw jute exports. Because of competition from synthetic substitutes for jute, the area of land under jute cultivation was gradually reduced from 2.5 million acres in 1969/70 to 1.5 million acres in 1976/77, but increased world demand halted this trend in 1977, when 1.8 million acres were planted with jute. Output of tea in 1976/77 rose to 32,000 tons, of which 70 per cent was exported. Potatoes, sugar cane, tobacco, spices and tropical fruits are also produced.

Industry accounts for under 10 per cent of G.D.P. About 20 per cent of the industrial labour force is employed in the jute-based industries. Other major products are cotton textiles, chemicals and sugar. Production fell in nearly all the main industries after independence in 1971, because of damage to plant during the war, the departure of the largely non-Bengali financier and managerial class and the loss of many skilled Bengali workers. Most organized industry was nationalized and state corporations were set up for the major commodities. Gen. Zia's Government changed industrial policy, encouraging private investment. In January 1976 it promised to pay compensation to foreign investors, whose assets had been nationalized in 1971, on condition that the money was reinvested in Bangladesh. Many tea plantations and state-owned industrial units were returned to the private sector during 1976 and 1977.

Jute and jute-based exports provide most of export earnings. Foodgrains and oil are the major imports. Trade patterns were disrupted by the separation from Pakistan, to which the tea crop had largely been exported before the war. However, during 1976 direct trade links were re-established with Pakistan: shipping and banking arrangements were agreed and a joint trade committee was set up between the two countries.

Although exports have increased and imports remained steady, Bangladesh still needs U.S. \$1,000 million a year in aid. Foreign aid is to finance 75 per cent of development in 1977/78, and with such aid Bangladesh intended to launch a \$229 million rural development programme.

The country's first Five-Year Plan (1973-78), introduced by Sheikh Mujib, aimed at an annual growth of 5.5 per cent in G.D.P. and an annual increase of 2.5 per cent in per capita income. In the first year of the plan G.D.P. increased by 9.4 per cent, but a decline in agricultural and in manufacturing output resulted in a growth rate of only 2 per cent for 1974/75. In the following year, mainly due to a 17 per cent rise in foodgrain output and a 13 per cent increase in the production of raw jute, G.D.P. grew by 11.4 per cent. In 1976/77 G.D.P. grew by 3 per cent. The Government is against deficit financing and consumer prices declined by 10 per cent in 1976. Although rising in 1977, they remained below the 1975 level.

Transport and Communications

Of some 3,900 miles of roads, about 2,400 are metalled. The railway system consists of about 1,750 route miles. Inland water transport is also of major significance and there are about 5,000 miles of navigable waterways, on which are located five major river ports. The chief seaports are Chalna and Chittagong and a modern one is being developed at Mangla. *Bangladesh Biman*, the national airline, operates internal services between major towns and international ones from the airports in Dacca and Chittagong.

Social Welfare

The Government's main task after independence was to prevent epidemics and widespread malnutrition and to treat and rehabilitate war victims. The number of hospital beds has increased from 8,000, before independence, to 13,000. Half the doctors practising in Bangladesh are based in Dacca. A five-year health programme costing 1,660 million taka began in July 1973 with particular priority being given to the popularization of birth control.

Education

Education is not compulsory but the Government provides free primary schooling for five years. Some pilot schemes for compulsory attendance in primary schools are in progress. Secondary schools and colleges in the private sector vastly outnumber Government institutions: in 1976 Government high schools comprised about 2 per cent of the country's total, while only 48 colleges, out of a total of 626, were Government-owned. There are six universities, including one for agriculture and one for engineering.

Educational reform is designed to help meet the manpower needs of the country, and most importance is given to primary, technical and vocational education. About 20 per cent of the population is literate, and in 1975 only 20 per cent of girls received any education.

Weights and Measures

The imperial system of measures is in force pending the introduction of the metric system. The following local units of weight are also used:

1 maund = 82.27 lb.

1 seer = 2.057 lb.

1 tola = 180 grains.

Currency and Exchange Rates

100 paisa = 1 taka.

Exchange rate: (October 1977):

£1 sterling = 26.00 taka;

U.S. \$1 = 15.16 taka.

FINANCE

100 paisa = 1 taka.

Coins: 1, 2, 5, 10, 25 and 50 paisa.

Notes: 1, 5, 10, 100 and 500 taka.

Exchange rates (October 1977): £1 sterling = 26.90 taka; U.S. \$1 = 15.16 taka.

1,000 taka = £37.17 = \$65.97.

Note: The taka was introduced in January 1972, replacing the Pakistan rupee. At the same time the currency was devalued by 34.6 per cent, so that the taka would be at par with the Indian rupee. Until May 1975 the link with India was retained and Bangladesh maintained an official exchange rate against sterling at a mid-point of £1 = 18.9677 taka. Before the "floating" of the pound in June 1972 this was equivalent to a rate of U.S. \$1 = 7.279 taka. In May 1975 the currency was devalued by 36.8 per cent against sterling, the new exchange rate being £1 = 30.00 taka. This remained in effect until April 1976, when a new rate of £1 = 28.10 taka was introduced. This was adjusted to £1 = 26.70 taka in June 1976 and to £1 = 25.45 taka in November 1976. In January 1977 the rate reverted to £1 = 26.70 taka but has since been adjusted again. The average market rate of the taka per U.S. dollar was 7.595 in 1972; 7.742 in 1973; 8.113 in 1974; 12.019 in 1975; 15.347 in 1976.

THE CONSTITUTION

(Promulgated November 1972; amended 1973, 1974, 1975, 1977.)

Note: A state of emergency was proclaimed in December 1974 and fundamental constitutional rights such as freedom of speech and of associations were suspended. Martial law was imposed in August 1975 and Parliament was dissolved in November 1975.

SUMMARY

Fundamental Principles of State Policy

The 1977 amendment to the Constitution, which was initially based on the fundamental principles of nationalism, socialism, democracy and secularism, replaced secularism with Islam. The amendment states that the country shall be guided by "the principles of absolute trust and faith in the Almighty Allah, nationalism, democracy and socialism". The Constitution aims to establish a society free from exploitation in which the rule of law, fundamental human rights and freedoms, justice and equality are to be secured for all citizens. A socialist economic system is to be established to ensure the attainment of a just and egalitarian society through state and co-operative ownership as well as private ownership within limits prescribed by law. A universal, free and compulsory system of education shall be established. In foreign policy the State shall endeavour to consolidate, preserve, and strengthen fraternal relations among Muslim countries based on Islamic solidarity.

Fundamental Rights

All citizens are equal before the law and have a right to its protection. Arbitrary arrest or detention, discrimination based on race, age, sex, birth, caste or religion and forced labour are prohibited. Subject to law, public order and morality, every citizen has freedom of movement, of assembly and of association. Freedom of conscience, of speech, of the Press and of religious worship are guaranteed.

GOVERNMENT

The President

The President is the constitutional Head of State and is elected for a term of five years. He is eligible for re-election. The supreme control of the armed forces is vested in the President. He appoints the Vice-President, the Prime Minister and other Ministers as well as the Chief Justice and other judges. The outgoing President has the right to nominate his successor.

The Executive

Executive authority shall rest in the President and shall be exercised by him either directly or through officers subordinate to him in accordance with the Constitution.

There shall be a Council of Ministers to aid and advise the President. All ministers shall hold office during the pleasure of the President.

The Legislature

Parliament (*Jatiya Sangsad*) consists of a unicameral legislature. It comprises 300 members and, for ten years, an additional 15 women members. Members of Parliament, other than 15 women members, are directly elected on the basis of universal adult franchise from single territorial constituencies. Persons aged 18 and over are entitled to vote. The parliamentary term lasts for five years unless sooner dissolved by the President. War can be declared only with the assent of Parliament. In the case of actual or imminent invasion, the President may take whatever action he may consider appropriate.

BANGLADESH

THE JUDICIARY

The Judiciary comprises a Supreme Court with High Court and an Appellate Division. The Supreme Court consists of a Chief Justice and such other judges as may be appointed by the President. The High Court division has such original appellate and other jurisdiction and powers as are conferred on it by the Constitution and by other law. The Appellate Division has jurisdiction to determine appeals from decisions of the High Court division. Subordinate courts, in addition to the Supreme Court, have been established by law.

The Constitution, The Government, Parliament

Elections

An Election Commission supervises elections for the Presidency and for Parliament, delimits constituencies and prepares electoral rolls. It consists of a Chief Election Commissioner and other Commissioners as may be appointed by the President. The Election Commission is independent in the exercise of its functions. Subject to the Constitution, Parliament may make provision as to elections where necessary.

PARLIAMENT

Parliament was dissolved in November 1975, following the imposition of martial law. A general election is to be held in December 1978.

POLITICAL PARTIES

In August 1975 the then President, Mushtaq Ahmed, banned all political parties and disbanded the Bangladesh Awami League. In August 1976 the Government permitted political activities to be resumed, with some restrictions laid down in a Political Parties Regulation. This states that, before it may operate, every political party must submit its manifesto to the Government for approval. Any party which, in a general election, fails to win at least 10

seats in Parliament, will be dissolved and the seats declared vacant. Twelve parties have come into existence since 1976, but little order had been established amongst them by late 1977. The main opposition party is the Jatyto Samajtantrik Dal (Socialist Nationalist Party). Party leaders changed frequently. No list of parties is therefore available.

BARBADOS

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Barbados is the most easterly of the Caribbean islands, lying about 200 miles north-east of Trinidad. There is a rainy season from July to November and the climate is cool during the rest of the year. The mean annual temperature is about 26°C (78°F). The language used is English and the majority of the population are Anglicans. The national flag (proportions 3 by 2) has three equal vertical stripes of blue, gold and blue. On the gold band is the head of a black trident. The capital is Bridgetown.

Recent History

A former British colony, Barbados achieved internal self-government in 1961 and full independence in 1966. Barbados was a member of the West Indies Federation from 1958 until its dissolution in 1962. In 1964 it was agreed that Bridgetown should become the capital of a proposed East Caribbean Federation, to include the Windward and Leeward Islands, but the Federation was never established. However, some common services, particularly transport and education, are shared with other Caribbean territories.

In the general election of September 1976 the Barbados Labour Party led by Mr. J. M. G. M. Adams won a large majority over the Democratic Labour Party, which had been in power since 1961 under the leadership of Errol Barrow. The election was fought on the issues of unemployment, wasteful spending and corruption. The Barbados Labour Party is committed to retaining a system of free enterprise and Mr. Adams stated that there would be no significant changes in foreign policy. The Government is giving priority to the economy and to reducing unemployment.

Government

The British monarch, represented by a Governor-General, is head of state, and executive power is in the hands of a Cabinet consisting of a Prime Minister and not fewer than five other Ministers. Parliament consists of a Senate of 21 members, appointed by the Governor-General, and a House of Assembly with 24 members elected by universal adult suffrage for five years (subject to dissolution). The Cabinet is responsible to Parliament.

Defence

There is a small local volunteer force, the Barbados Regiment, and it was announced in 1977 that a professional defence force would be established.

Economic Affairs

Sugar and tourism are the dominant sectors of the Barbados economy. Sugar production has fallen steadily since independence due to the sale of arable land for development, adverse weather conditions and the reluctance of young workers to enter the sugar industry. In 1975 the Government passed a Sugar Export Levy Act which increased the value of the 1975 crop by B\$28.4 million despite the poor crop yield. However, sugar production continued to fall in 1976 and, with a drop in world sugar prices, receipts were substantially lower. Output rose in 1977. In an effort to lessen the dependence on sugar, the

production of crops such as sea island cotton and onions has been developed. Production of cotton was doubled in 1975. An Agricultural Development Corporation was set up in 1974.

Tourism has also been affected by the world recession. The steady expansion which had been maintained since the 1960s slowed in 1974 and in 1975 the number of visitors dropped below the 1974 record total. However, the number of visitors increased in 1977, when tourism contributed about 23 per cent of G.D.P. The Government plans to increase tourist promotion and to set up training centres for hotel staff.

Government policy is to reduce dependence on agriculture and tourism and to diversify industry. It aims to attract light manufacturing industries and subsidiaries of North American companies through tax incentives. In 1977 a five-year industrial development plan was elaborated, which seeks to encourage the pharmaceutical, ceramics, glass and electronic manufacturing industries. Further economic measures include the introduction of import restrictions on various luxury goods, with the aim of reducing the balance of payments deficit, which was B\$39.2 million in 1976.

Barbados has the most developed infrastructure in the Caribbean and the Government plans to deal with the unemployment problem, which is serious outside the harvest season, by continuing to develop and modernize. Bridgetown deep-water port is being expanded, a flour mill and grain terminal are to be built, and the fish-landing centres are being modernized.

With Guyana and Antigua, Barbados set up in 1967 the Caribbean Free Trade Association (Carifta), and in 1973 was a founder-member of the Caribbean Community (CARICOM).

Transport and Communications

The situation of the island and its good harbour and airport facilities make it a natural entrepôt for the eastern Caribbean. There are 1,020 miles of roads, mostly bitumenized; the airport can handle jet aircraft; and the harbour at Bridgetown has moorings for eight ocean-going ships. Both the airport and port are being extended.

Social Welfare

Estimated expenditure on health services was B\$36.9 million in 1974-75. There are one government and three private (acute short-stay) hospitals, 15 day nurseries and seven children's homes. There is a government building scheme of group housing for lower income families and a National Insurance and Social Security Scheme was set up in 1967. A National Health Service is to be introduced in 1978.

Education

Education is free and the minimum school-leaving age is 16. The State provides for approximately 86 per cent of those eligible for primary and secondary education. The literacy rate is 97 per cent. There are ten comprehensive schools, ten grammar schools, a community college, a teacher training college, a technical institute and a poly-

technic. At the Barbados branch of the University of the West Indies an in-service training programme for graduate teachers in secondary schools is run at the School of Education.

Tourism

The natural attractions of the island consist chiefly of the healthy climate and varied scenery. In addition, there are many facilities for outdoor sports of all kinds. Bathsheba on the east coast is a well-known health resort. Revenue from tourism has increased from B\$13 million in 1960 to \$165.3 million in 1976.

Visas are not required by nationals of Commonwealth countries and Italy, by nationals of the U.S.A. (for periods not exceeding six months) and by nationals of Austria, Belgium, Colombia, Denmark, Finland, the Federal Republic of Germany, Greece, Iceland, Israel, Liechtenstein, Luxembourg, the Netherlands, the Netherlands Antilles, Norway, Peru, Spain, Surinam, Sweden, Switzerland, Tunisia and Turkey (for periods not exceeding three months), and by Venezuela nationals in possession of return tickets.

Sport

Sporting facilities cover golf, tennis, cricket, football, rugby, hockey, polo, riding, horse racing, motor racing, fishing, swimming, surfing and boating. Cricket is especially popular. A new National Stadium was opened in 1970.

Public Holidays

1978: March 24th-27th (Easter), May 1st (May Day), May 15th (Whit Monday), July 3rd (Caricom Day), August 2nd (Emancipation Day), October 4th (United Nations Day), November 30th (Independence), December 25th-26th (Christmas).

1979: January 2nd (New Year).

Weights and Measures

The imperial system of weights and measures is used, with the exception of the U.S. gallon (231 cubic inches).

Currency and Exchange Rates

100 cents = 1 Barbados dollar (B\$).

Exchange rates (October 1977):

£1 sterling = B\$3.556.

B\$100 = £28.123 = U.S. \$49.905.

Note: The Barbados dollar was introduced in November 1973, replacing the East Caribbean dollar (EC\$) at par. The East Caribbean dollar, replacing (at par) the West Indian dollar, was introduced in Barbados and other islands in October 1965, with an exchange rate of £1 sterling = EC\$4.80 (EC\$1 = 4s. 2d. or 20.83p). This valuation in terms of sterling remained in effect until July 1975, when the Barbados dollar was linked to U.S. currency with a central exchange rate of U.S. \$1 = B\$2.00 and a market rate of U.S. \$1 = B\$2.0038. Previously the rate had been U.S. \$1 = EC\$2.00 from November 1967 to August 1971; and U.S. \$1 = EC\$1.842 from December 1971 to June 1972. The average exchange rate (B\$ per U.S. \$) was 1.959 in 1973; 2.053 in 1974; 2.020 in 1975.

THE CONSTITUTION

The Constitution came into force in November 1966. Under its terms protection is afforded to individuals from slavery and forced labour, from inhuman treatment, deprivation of property, arbitrary search and entry, and racial discrimination; freedom of conscience, of expression, assembly, and movement are guaranteed.

Her Majesty's representative in Barbados is the Governor-General, who appoints the Prime Minister and, on the advice of the Prime Minister, appoints Ministers and some Senators.

The executive consists of the Prime Minister, appointed by the Governor-General as being the person best able to command a majority in the House of Assembly, and not fewer than five other Ministers. Provision is also made for a Privy Council, presided over by the Governor-General.

Parliament consists of two houses, the Senate and the House of Assembly. The Senate has 21 members, 12 appointed by the Governor-General on the advice of the Prime Minister, 2 on the advice of the Leader of the Opposition, and 7 as representatives of such interests as the Governor-General considers appropriate. The House of Assembly has 24 members, elected by universal adult suffrage for a five-year term. The minimum voting age is 18.

The Constitution also provides for the establishment of a Judiciary and a Legal Service, and Service Commissions for the Judicial Service, the Public Service and the Police Service. These Commissions are exempt from legal investigation; they have executive powers to deal with appointments, dismissals and disciplinary control of the services for which they are responsible.

BENIN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The People's Republic of Benin is a narrow stretch of territory in West Africa, flanked by Nigeria and Togo. The climate is tropical in the north, with one rainy season and a maximum temperature of 46°C (115°F), and equatorial in the south, with average temperatures of 20°–34°C (68°–93°F) and two rainy seasons. French is the official language but each tribe has its own tongue. The majority of the people follow traditional beliefs and customs. Christians, mainly Roman Catholics, make up 15 per cent of the population and Muslims 13 per cent. The national flag is green and bears a five-pointed red star. The capital is Porto-Novo.

Recent History

Benin, called Dahomey until 1975, was formerly part of French West Africa. It became a self-governing republic within the French Community in December 1958, and an independent state in August 1960. Since independence there have been five successful coups involving the army. Hubert Maga was overthrown in 1963 by Gen. Christophe Soglo, who installed Justin Ahomadegbé and Souru Apithy in a coalition. They were ousted by Soglo himself in 1965, but he in turn was toppled in 1967. Lt.-Col. Alphonse Alley presided over the return to civilian rule and a strong presidential constitution was adopted. The disqualification of the main presidential candidates resulted in the annulment of the 1968 elections and Dr. Emile Zinsou was appointed President. Deposed in 1969, he was succeeded by a Military Directorate. The 1970 elections led to violence and a Presidential Council was formed consisting of the three candidates, MM. Maga, Apithy and Ahomadegbé, with the post of President rotating. In October 1972 the army, led by Major (now Lt.-Col.) Mathieu Kerekou, overthrew the Council and established a military Government.

In December 1975, Dahomey's "colonial" name was changed to an "authentic" title, the People's Republic of Benin. Kerekou intended to establish a Marxist-Leninist regime and to this end a sole party, the Benin People's Revolutionary Party, was founded in December 1975. Secularization of the country has so far entailed the state takeover of all primary schools, and religious holidays have been abolished. Meanwhile, much of the economy has been nationalized and the legal system has come under review. This has not been achieved without opposition, including three alleged attempted coups, in two of which the supporters of Dr. Zinsou and the Togolese authorities were accused of complicity, in January and October 1975. Popular unrest was most evident following the shooting by security forces of Capt. Michel Aikpe, Minister of the Interior, under mysterious circumstances in June 1975. Relations with Togo improved during 1976 and 1977.

In January 1977 there was an airborne attack on Cotonou by "imperialist mercenaries" which was defeated by government troops with some losses. One mercenary was captured, and damage was estimated at U.S.\$28 million. Investigations by both an OAU and a UN committee named the raiders as Moroccan-trained mercenaries

hired by the Dahomey Liberation and Rehabilitation Front and their leader as Gilbert Bourgeaud, an adviser to President Bongo of Gabon. Morocco and Gabon strongly denied the allegations. The raid was followed by a xenophobic spate of arrests of foreigners in Benin, and the boycotting of the OAU meeting at Libreville in the summer of 1977. In January 1978 the French ambassador was recalled, and Michel Alladaye, the Foreign Minister, accused France of involvement in subversion against Benin.

Government

Benin is ruled by a military government of army officers. A 69-member National Council of the Revolution (CNR), headed by a National Political Bureau, is responsible for the development of the revolution. Nearly half the members of the CNR are civilians. In 1977 it was announced that the CNR would be replaced by an elected National Revolutionary Assembly.

Defence

Citizens of both sexes are liable for military service between the ages of 18 and 51 years. The army strength in 1976 was 2,100, the air force 150 and in addition there were paramilitary forces numbering 1,000 men. France provides technical assistance and equipment. In 1977 a central organization, the Headquarters People's Armed Forces of Benin, was established to unify the police, customs, armed forces and gendarmerie.

Economic Affairs

Over 75 per cent of Benin's working population is employed in agriculture, which accounts for about 30 per cent of G.D.P., while crop processing is the basis of the country's industry, contributing 9 per cent to G.D.P. Benin is almost self-sufficient in foodstuffs, palm products being the main exports. Limestone is the only mineral exploited, but oil has been discovered offshore and a domestic hydro-electric scheme is being planned jointly with Togo. Heavily dependent on foreign aid, especially from France, to subsidize the budget and permanent balance of payments deficit (which reached 20,000 million francs CFA in 1976), Benin's foreign capital receipts are being eroded to pay compensation to recently nationalized companies. Benin is a member of several African regional economic organizations and is a signatory to the Lomé Convention.

Transport and Communications

Transport services are few; three short sections of railway run inland from Cotonou, and the coast road links Togo in the west and Nigeria in the east. The main port is Cotonou.

Education

Following legislation in 1975, the State has taken control of all education, which is to be free, public, compulsory and secular. Secondary school pupils and students must undertake nine months' teaching and three months' military and ideological training. The University of Benin was founded in 1970.

Tourism

There is little tourism but safaris can be arranged to the two National Parks and the numerous hunting reserves. *Visas* are not required by French nationals.

Sport

There is little organized sport but football is generally popular. Big game hunting is possible for tourists.

Public Holidays

1978: May 1st (Labour Day), August 1st (National Day), October 26th (Félés Revolution), November 30th (Félés Revolution), December 31st (Harvest Day).

1979: January 1st (New Year).

All religious holidays have been abolished and are to be replaced by five secular public holidays.

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (October 1977):

1 franc CFA = 2 French centimes;

£1 sterling = 429.75 francs CFA;

U.S. \$1 = 241.75 francs CFA.

Notes: 50, 100, 500, 1,000 and 5,000 francs CFA.

Exchange rates (October 1977): 1 franc CFA=2 French centimes;

£1 sterling=429.75 francs CFA; U.S. \$1= 241.75 francs CFA.

1,000 francs CFA=£2.33=\$4.14.

Note: Between December 1958 and August 1969 the value of the franc CFA was 3.6 milligrammes of gold, equal to 0.4051 U.S. cent (U.S. \$1=246.853 francs CFA). Since January 1960 the franc CFA has been equivalent to 2 French centimes (1 French franc=50 francs CFA). In August 1969 the franc CFA was devalued (in line with the French franc) to 3.2 milligrammes of gold, the exchange rate being 1 franc CFA=0.3601 U.S. cent (\$1=277.71 francs CFA) until August 1971. From December 1971 to February 1973 the official rate was 1 franc CFA=0.3909 U.S. cent (\$1=255.785 francs CFA). Since March 1973 the French authorities have ceased to maintain the franc-dollar rate within previously agreed margins. As a result, the value of the franc CFA has fluctuated on foreign exchange markets in line with the French franc. The average market rates of francs CFA per U.S. dollar were: 252.2 in 1972; 222.7 in 1973; 240.5 in 1974; 214.3 in 1975; 239.0 in 1976. In terms of sterling, the exchange rate between August 1969 and June 1972 was £1=666.503 francs CFA (1 franc CFA=0.15004p).

THE CONSTITUTION

From his assumption of power in 1972 to September 1973 President Kerekou governed through a Military Council of the Revolution, based on the "revolutionary movement of national liberation". From 1973 to August 1977 the country was governed by institutions which included civilians, the highest of which was the National Council of the Revolution, directed by a National Political Bureau. On May 23rd, 1977, a Fundamental Law was announced by the Parti de la Révolution Populaire du

Bénin (PRPB) as preparation for the "people's democratic revolution". In August the National Revolutionary Council was announced to be about to be disbanded; in its place a National Revolutionary Assembly would be elected, comprising people's commissioners elected directly, who would in turn elect the President and Head of State. According to a draft Constitution, the Council would also pass laws submitted to it by the Executive Council.

THE GOVERNMENT

(December 1977)

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Bhutan lies in the Himalayas, with the People's Republic of China to the north and India to the south. Average monthly temperature ranges from 4.4°C (40°F) (mean January) to 17°C (62°F) (mean July). Rainfall is heavy, averaging over 300 cm. (120 inches) in a year. The official language is Dzongkha, spoken mainly in western Bhutan. Written Dzongkha is based on the Tibetan script. The State religion is Mahayana Buddhism of the Drukpa Kargyu sect. The national flag (proportions 5 by 4) is divided diagonally to form two triangles, one yellow and the other maroon, with a white dragon superimposed in the centre. The capital is Thimphu.

Recent History

The first hereditary King of Bhutan was installed on December 17th, 1907. An Anglo-Bhutanese Treaty signed in 1910 placed all Bhutan's foreign relations under the supervision of the Government of British India. When India became independent, that treaty was replaced by the Indo-Bhutan Treaty of Friendship of 1949, under which Bhutan agrees to seek the advice of the Government of India with regard to its foreign relations, but remains free to decide whether or not to accept such advice. Bhutan has asserted itself as a fully sovereign, independent state, becoming a member of the UN in 1971 and of the non-aligned movement in 1973.

King Jigme Dorji Wangchuk, installed in 1952, established a Royal Advisory Council in 1965 and formed the country's first Cabinet in 1968. He died in July 1972 and was succeeded by the Western-educated 17-year-old Crown Prince, Jigme Singye Wangchuk. The new King stated his wish to maintain the Indo-Bhutan Treaty and to further strengthen friendship with India.

When Chinese authority was established in Tibet in 1959, Bhutan granted asylum to about 4,000 Tibetan refugees. Because it had been discovered that many refugees were engaged in spying and subversive activities, the Bhutan Government decided in 1976 to disperse them in small groups, introducing a number of Bhutanese families into each settlement. Anxious not to spoil its relations with China, Bhutan rejected the Dalai Lama of Tibet's demands that Bhutan should accept more refugees and that he should maintain a liaison office in Bhutan.

Government

Bhutan is an absolute monarchy. The system of government is unusual in that power is shared between the monarchy (assisted by the Royal Advisory Council), the Council of Ministers, the National Assembly (*Tsogdu*) and the monastic head (*Jey Khempo*) of Bhutan's 6,000 Lamas. The National Assembly, which serves a three-year term, has 150 members, including 110 indirectly elected by village headmen, 10 representing monastic bodies and 30 appointed officials.

Defence

The strength of the Royal Bhutanese Army, which is

under the direct command of the King, is classified information. As well as the regular standing army, there is a large militia. Army training facilities are provided by an Indian military training team. Though India is not directly responsible for the country's defence, the Indian Government has indicated that any act of aggression against Bhutan would be regarded as an act of aggression against India.

Economic Affairs

The economy is predominantly agrarian. Forests cover about 70 per cent of the country's area, and further afforestation is envisaged. Timber and fruit, including apples, are exported. There is some small-scale industry, producing, for example, textiles, soap, slate and steel furniture. Centres for the production of traditional handicrafts, such as bamboo-work, lacquer woodwork and woven carpets, have been set up. Being under-populated, Bhutan is dependent on foreign labour. To lessen this dependence on imported labour, many construction activities are to be mechanized.

A series of Five-Year Economic Plans began in 1961, the first two being 100 per cent financed by India. Considerable improvements have been brought about in roads, animal husbandry, irrigation, forestry and electricity generation. At least five hydro-electricity stations have been set up and Bhutan expects to export a surplus of energy in the future. Fifty per cent of expenditure under the fourth Five-Year Plan (1976-81) has been allocated to agriculture.

Since the 1960 ban on trade with Tibet, Bhutan's main trading partner has been India, although timber, liquor and cardamom are also exported to the Middle East and Western Europe. In 1976 the recently established Food Corporation exported 4,000 kg. of cardamom to Singapore. More transit trade facilities are now required. After the inauguration of the postal system in 1972, Bhutan's postage stamps became the main earner of foreign exchange, but in 1976 were superseded by tourism.

Bhutan is a member of the Colombo Plan and of ESCAP.

Transport and Communications

By 1976 more than 1,500 kilometres of roads, most of which are surfaced, linked different parts of the kingdom, and further surfaced roads connected main towns in Bhutan with the Indian states of West Bengal and Assam. There is a shortage of road transport. Paro, the chief airport, is served by a weekly flight to and from Hashimara in West Bengal. An airport at Yangphulla serves the east.

Social Welfare

In 1976 the country had 11 hospitals with a total of 405 beds. A mobile hospital unit was operating in the remote central areas. There were 40 doctors. Because of the shortage of doctors and lack of funds, local dispensaries are being converted into basic health units, providing basic

BHUTAN

medical services. Malaria and smallpox have been eradicated, but tuberculosis is still widespread.

Education

Free education of eleven years' duration is available. Some of the schools are co-educational and run along the lines of an American private school but using a British syllabus. There are no mission or private schools in Bhutan, all schools being subsidized by the Government. In 1976 there were 111 schools and colleges with totals of 19,000 pupils and 682 teachers. About 500 Bhutanese students are receiving higher education in India, Australia, New Zealand, Japan, Singapore, the United Kingdom, Switzerland, Austria and the U.S.A.

Tourism

Bhutan was opened to tourism in the autumn of 1974 and hotels, transport and other facilities were created in the west. Foreign tourists may visit Bhutan in package tours only, accompanied by guide/interpreters. Visas are required by all visitors.

In 1976 tourists from the Federal Republic of Germany, the U.S.A., Belgium, Italy, France, Australia and Japan totalled 1,500.

Introductory Survey, Statistical Survey

Sport

Archery is the national sport. Soccer, basketball, volleyball, badminton, tennis, table tennis, fishing and shooting are the major sports practised and there are also facilities in Thimphu for golf, ice-skating and swimming.

Public Holidays

The usual Buddhist holidays are observed, as well as the National Day of Bhutan (December 17th) and the Birthday of H.M. Jigme Singye Wangchuk (November 11th).

Home Minister: LYONPO TAMJI JAGAR.

Finance Minister: LYONPO CHOYAL.

Minister of Foreign Affairs: LYONPO DAWA TSERING.

NATIONAL ASSEMBLY

A National Assembly (*Tsogdu*) was established in 1953. The Assembly has a three-year term and meets twice

Statistical Survey, The Government, Political Parties, etc.

yearly in spring and autumn. There are 150 members, of whom 110 are indirectly elected by village headmen. Ten seats are reserved for ecclesiastical bodies (*see* Religion below) and the remainder are occupied by officials, the ministers, their deputies and members of the Royal Advisory Council. The Assembly enacts laws, advises on constitutional and political matters and debates all important issues. Both the Royal Advisory Council and the Council of Ministers are responsible to it.

LOCAL ADMINISTRATION

Districts: There are 17 districts, each headed by a Dzongda (in charge of administration and law and order) and a Thrimpon (in charge of judicial matters). Land revenue is collected by the village headmen and remitted to the Dzongda.

POLITICAL PARTIES

There are no political parties in Bhutan.

DIPLOMATIC REPRESENTATION

Bangladesh: New Delhi, India.

India: Lungtzenzempa, Thimphu; *Representative (Ambassador Extraordinary and Plenipotentiary):* J. R. HIREMATH.

JUDICIAL SYSTEM

Bhutan has a Civil and a Criminal Code.

High Court: Established February 1968 to review Appeals from Lower Courts; 6 Judges.

Appeal Court: The Supreme Court of Appeal is H.M. the King.

Magistrates Courts: All cases are heard by Thrimpons (District Magistrates). Appeals are made to the High Court.

RELIGION

The State religion is Mahayana Buddhism. Buddhism was introduced into Bhutan in the eighth century A.D. by the Indian saint Padma Sambhava, known in Bhutan as Guru Rimpoche. In the thirteenth century Phajo Drugo made the Drukpa School of Kagyu Buddhism dominant in Bhutan and this sect is still supported by the dominant race in Bhutan, the Bhutias. Monasteries are numerous. The chief monastery is situated at Tashichho Dzong and contains 1,000 Lamas. There are 6,000 state-supported Lamas in the kingdom, with the *Jey Khempo* as their head.

THE PRESS

Kuensel: Thimphu; f. 1967; weekly government newspaper; in English, Dzongkha and Nepalese; Editors SURESH K. PRAMAR, J. B. NEPAL (English) and DAMCHU LHENDUP (Dzongkha); combined circ. 3,500.

RADIO

There are 24 radio stations in Bhutan. Eight of them are for transmitting flood warning data.

TRANSPORT

ROADS AND TRACKS

More than 1,500 km. of motorable roads (most of which are surfaced) now connect different parts of the kingdom.

Finance, Transport, Tourism

In addition, surfaced roads link the important border towns of Phuntsholing, Gaylephug, Sarbhang and Samdrup Jongkhar in southern Bhutan to towns in West Bengal and Assam in India. Yaks, ponies and mules are still the chief means of transport on the rough mountain tracks.

State Transport Department: Phuntsholing; f. 1962; operates a fleet of 74 buses (1976).

Lorries for transporting goods are operated by the private sector.

CIVIL AVIATION

The main airport is at Paro; an airport at Yangphulls serves the east of the country. There are numerous helicopter landing pads.

TOURISM

The Kingdom was opened to tourism in the autumn of 1974 and the tourist seasons are from March to June and September to December. Due to lack of facilities, individual tourists are not yet permitted to visit Bhutan. Tourists must travel in organized package tours. Hotels have been constructed by the Department of Tourism at Phuntsholing, Paro and Thimphu. There are also many small privately run hotels.

BOLIVIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Bolivia is a landlocked Andean state bordered by Chile and Peru to the west, Brazil to the north and east and Paraguay and Argentina to the south. Climate varies according to altitude from humid tropical below 1,500 metres to the cool and cold zones above 3,500 metres. The official languages are Spanish, Quechua and Aymará. Roman Catholicism is the principal religion. The national flag (proportions 3 by 2) has equal horizontal stripes of red, yellow and green. The state flag has, in addition, the national emblem in the centre. The legal capital is Sucre. The administrative capital and seat of government is La Paz.

Recent History

Despite being in exile in Argentina, Dr. Victor Paz Estenssoro was elected President in May 1951. However, the military intervened and he was not allowed to return. In April 1952 a popular revolution overthrew the military junta and Dr. Paz Estenssoro returned as President. His government, a coalition of the Movimiento Nacionalista Revolucionario (MNR) and the Labour Party, committed itself to profound social revolution; it nationalized the tin mines and introduced universal suffrage and land reform. Hernán Siles Zuazo was elected President for the 1956-60 term and Dr. Paz Estenssoro was again elected President in 1960. However, in November 1964, shortly before beginning his third term, he was overthrown by the Vice-President, Gen. René Barrientos Ortuño. Gen. Barrientos shared the Presidency with Gen. Alfredo Ovando Candía until January 1966 but was elected sole President in July.

In April 1969 Dr. Luis Adolfo Siles Salinas, the Vice-President, succeeded to the presidency on the death of Gen. Barrientos, but in September Gen. Ovando Candía assumed power by *coup d'état*. In October 1970 he was deposed and Gen. Juan José Torres González emerged as President, pledging support for agrarian reform and worker participation in management. A "People's Assembly" was allowed to meet which called for extreme socialist measures to be taken, causing disquiet in right-wing circles. Gen. Torres' failure either to purge his right-wing opponents from the army or to arm his civilian supporters led to his deposition in August 1971 by Col. (later Gen.) Hugo Banzer Suárez, who became the country's fifty-eighth President in 146 years. Col. Banzer drew support from the right-wing Falange Socialista Boliviano and a section of the MNR, as well as from the army. During 1972 strains appeared in the ruling coalition and many of the MNR were arrested. In June 1973 President Banzer announced an imminent return to constitutional government but elections were later postponed to June 1974. The MNR withdrew its support and entered into active opposition.

Following an attempted military coup in June 1974 the cabinet was replaced by an all-military one. After an attempt to overthrow him in November 1974 President Banzer declared that elections had been postponed in-

definitely and that his military regime would retain power until at least 1980. All political and union activity was banned.

In January 1976 dissension within the army led President Banzer to replace the three armed forces commanders and several ministers. Members of opposition groups and trade unions were expelled after the alleged discovery of a plot to install a Communist dictatorship. In June political unrest intensified with widespread strikes among tin miners and disturbances in the universities, following the death of former President Torres in Buenos Aires. A short state of siege was declared, universities were closed and troops occupied the mining areas and took over their local radio stations. Many miners and students were arrested. The strikes officially ended at the end of June as the Government agreed to a 30 per cent wage rise. In May 1977 the Government announced that political parties would remain in recess indefinitely and the following month a group of prominent citizens published a manifesto asking for a return to constitutionality. In late 1977 the Government announced that general elections would take place on July 9th, 1978, to elect a President and a Constituent Assembly charged with replacing the previous bicameral parliamentary system with a unicameral one. It later declared that political activity would be legalized, including that of left-wing parties, although certain political leaders in exile would not be granted amnesty. It was reported that President Banzer would stand as a candidate of the Partido de Unidad Nacional (PUN), comprising elements of the MNR, Falange Socialista Boliviano and other groups.

The question of Bolivia's access to the Pacific continues and in 1976 Peru put forward certain proposals which were rejected by Chile. Tension between the three countries is increasing over this problem.

Government

Since 1969 Bolivia has been under military rule, sometimes with the participation of political parties.

Defence

Military service for one year is compulsory for all males at nineteen. The armed forces number 22,500 men, of whom the army has 17,000, the air force 4,000, and the navy 1,500. Defence expenditure for 1977 amounted to 1,500 million pesos.

Economic Affairs

Bolivia is the world's second largest producer of tin and the economy still depends largely on the export of tin, although progress is being made to diversify exports. Tin accounted for 34 per cent of export earnings in 1976, compared with 60 per cent in 1969.

Agriculture employs two-thirds of the labour force. Although subsistence farming predominates in the central

highlands, agricultural production is more effective in the tropical lowlands. Potatoes, maize, rice and wheat are the principal agricultural products for domestic consumption, while sugar, cotton, coffee and, increasingly, timber are the principal agricultural exports. Agriculture is a priority sector with increased government investment aimed at eventual self-sufficiency.

The mining sector employs only 3 per cent of wage earners but remains the main source of currency earnings, providing 66 per cent of total exports in 1976. Tin is the most important mineral but lead, tungsten, antimony, silver, zinc and others are also mined. By 1980 Bolivia should be able to smelt five-sixths of the tin it produces and a large percentage of other minerals. A major steel plan has been drafted, based on the 48,000 million metric tons of iron ore discovered at El Mutún. An integrated steel plant is to be established in co-operation with Brazil. Crude petroleum and natural gas have become of increasing importance since 1972. In 1976 Bolivia produced 2.36 million cubic metres of oil, with exports amounting to \$167.5 million. With the recent discovery of a major oil deposit near Santa Cruz, Bolivia hopes to increase daily output from 40,000 barrels in 1977 to 70,000 by 1980. Extensive exploration is being carried out by the state-controlled YPFB and by foreign oil companies working under partnership agreements. The export value of natural gas increased by 29 per cent to \$54.9 million in 1976, with output amounting to 4,370 million cubic metres. Recent agreements concluded with Argentina provide for higher prices and for exports to be increased from 150 to 220 million cubic metres in 1979.

The 1974 mining code is designed to encourage foreign investment, although the Government intends to maintain a 70 per cent overall control in the production of minerals and a 51 per cent interest in any joint venture enterprises. Projects include doubling the capacity of the Santa Cruz-Arica pipeline to 50,000 barrels per day and a new pipeline with a capacity of 20,000 barrels per day to be built between Santa Cruz and Choreti. \$160 million is to be spent on the complete modernization of Bolivia's refinery structure, including the construction of a new refinery at Santa Cruz. Between 1976 and 1981 the Government is to invest \$500 million in two petrochemical complexes, one in Oruro with 60 per cent participation by Argentina and one in the south-east with Brazilian participation.

Following a 40.6 per cent devaluation of the currency in 1972, Bolivia experienced severe inflation. The cost of living rose by 39 per cent in 1974 but was then brought under control by the Government's conservative fiscal, monetary and credit policies to reach 6 per cent in 1975 and 5.4 per cent in 1976. Estimates for 1977 are higher, due to rising import prices.

Bolivia's economic growth rate was 6.8 per cent in 1975 and 6.7 per cent in 1976, although agricultural production increased by only 4.4 per cent in 1976, due to bad weather conditions. Confidence was at a high level, with 80 per cent of investments being financed internally. 1976 was marked by a good export performance in both traditional and non-traditional sectors. There was a trade surplus of \$3.4 million, compared with a 1975 deficit of \$54 million, and international reserves rose to a record \$241 million in June 1977. The high level of international confidence is shown

by the amount of foreign loans being offered. The foreign debt reached \$1,418 million in 1976 and government priority is to channel this into productive activities. The recent growth in the economy owes much to the country's political and monetary stability and the longer term planning, together with the high prices for Bolivia's principal export products. It is expected that the Government will achieve its 1977 goal of a 7.5 per cent growth rate.

The five-year plan (1976-80) calls for an investment of \$3,000 million, 60 per cent of which will require external financing. The plan gives priority to agriculture, industry, mining and petroleum. It is hoped to diversify the country's industrial base and emphasis is being laid on current smelting projects and the development of a steel industry.

Bolivia is a member of LAFTA and the Andean Development Corporation.

Transport and Communications

In 1977 there were 3,787 km. of railways, linking the main towns, and there were 37,313 km. of roads in 1974. A 560 km. highway runs from Santa Cruz to Cochabamba, serving a colonization scheme on virgin lands around Santa Cruz. The Pan-American highway, linking Argentina and Peru, crosses Bolivia from south to north-west. Bolivia also has over 14,000 km. of navigable rivers which connect with the Amazon basin. In 1976 Argentina gave Bolivia free-port facilities at Rosario on the Paraná River. This gave Bolivia an independent Atlantic outlet. There are hopes of securing a Pacific outlet from Chile. Internal and international air services are provided by Lloyd Aéreo Boliviano and Transportes Aéreos Militares.

Social Welfare

There are benefits for unemployment, accident, sickness, old age and death. The Government intends to introduce a social security system for rural workers by 1980.

Education

The illiteracy rate was 40 per cent in 1976, despite a ten-year literacy campaign introduced in 1966. Education is free and, where possible, compulsory between the ages of 7 and 14. There are nine universities.

Quechua and Aymará are to become compulsory in schools from 1979.

Tourism

Lake Titicaca, at 3,800 metres above sea-level, offers excellent fishing and on its shore stands the famous Catholic sanctuary of Copacabana. The Andes peaks include Chacaltaya, which has the highest ski-run in the world. Tourists are mainly from the U.S.A. and South American countries.

Visas are not required to visit Bolivia by nationals of Argentina, Austria, Belgium, Canada, Chile, Denmark, France, the Federal Republic of Germany, Italy, Liechtenstein, Luxembourg, Norway, Peru, Spain, Sweden, Switzerland, the United Kingdom and the U.S.A. All visitors require an exit permit.

Sport

Football is the most popular sport.

Public Holidays

1978: March 24th (Good Friday), May 1st (Labour Day), May 25th (Corpus Christi), August 6th (Independence), November 2nd (All Souls' Day), December 25th (Christmas).

1979: January 1st (New Year).

Weights and Measures

The metric system is officially in force, but various old Spanish measures are also used.

Currency and Exchange Rates

100 centavos = 1 peso Boliviano.

Exchange rates (October 1977):

£1 sterling = 35.49 pesos;

U.S. \$1 = 20.00 pesos.

THE CONSTITUTION

Note: The Constitution is suspended at present.

Bolivia became an independent republic in 1825 and received its first Constitution in November 1826. Since that date a number of new Constitutions have been promulgated. Following the *coup d'état* of November 1964 the Constitution of 1947 was revived. Under it the executive power is vested in the President and members of his cabinet. In the revised Constitution the President is elected by direct suffrage for a four-year term and is not eligible for immediate re-election. In the event of his death or failure to assume office, the Vice-President takes his place and, failing the Vice-President, the President of the Senate.

The President has power to appoint members of the cabinet, diplomatic representatives, and archbishops and bishops from a panel proposed by the Senate. He is responsible for the conduct of foreign affairs and is also empowered to issue decrees, and initiate legislation by special messages to Congress.

Congress consists of a Senate and Chamber of Deputies and meets annually on August 6th at La Paz. Its ordinary sessions last only 90 working days, which may be extended to 120. Each of the nine departments (La Paz,

Chuquisaca, Oruro, Bení, Santa Cruz, Potosí, Tarija, Cochabamba and Pando), into which the country is divided for administrative purposes, elects three senators to serve for a period of six years. One-third of the Senate retires every two years. The 102 deputies are elected for four years, half the Chamber retiring every two years.

The supreme administrative, political and military authority in each department is vested in a prefect appointed by the President. The sub-divisions of each department, known as provinces, are administered by sub-prefects. The provinces are further divided into cantons. There are 94 provinces and some 1,000 cantons. The capital of each department has its autonomous municipal council and controls its own revenue and expenditure.

Public order, education and roads are under national control.

A decree issued in July 1952 conferred the franchise on all persons who had reached the age of 21, whether literate or illiterate. Previously the franchise had been restricted to literate persons.

The death penalty was restored in October 1971.

JUDICIAL SYSTEM

President of the Supreme Court: RAÚL ROMERO LINARES.

Attorney-General: MANUEL SILVA.

Judicial power is vested in the **Supreme Court** which sits at Sucre. There are 13 members, appointed by Congress for a term of ten years. The court is divided into four sections of three justices each. Two sections deal with civil cases, the others deal with criminal cases and fraud. The President of the Supreme Court presides over all four subsidiary sections.

There is a **District Court** sitting in each Department, and additional provincial and local courts to try minor cases.

In addition to the Attorney-General at Sucre (appointed

by the President), there is a District Attorney in each Department.

RELIGION

The majority of the population is Roman Catholic; there were an estimated 5,141,000 adherents in 1976 (provisional figure, not revised in the light of the 1976 census result).

Trade and Industry, Transport, Tourism

TRADE UNIONS

Trade unions were disbanded in 1974 but illegal meetings, particularly by mineworkers, continue. It was reported in 1976 that the government had imposed an official mine-workers union to replace the dissident miners' leaders.

The principal *de facto* unions are the *Central Obrera Boliviana* and the *Federación de Obreros Mineros* led by JUAN LECHIN OQUENDO (in exile).

TRANSPORT

RAILWAYS

Empresa Nacional de Ferrocarriles: Calle Bolívar 724, Casilla 428, La Paz; f. 1964; administers most of the railways in Bolivia; Gen. Man. GUSTAVO A. MÉNDEZ T.

Western Network: Total 2,197 km.

Eastern Network: Total 1,222 km.

Mixed Argentine-Bolivian Commission: Total 208 km.

Total networks: 3,627 km. (1977).

Private Railways:

Machacamarca-Uncia (Owners: Corporación Minera de Bolivia) 108 km.

Uyuni-Pulacayo (Owners: Empresa Minera Pulacayo) 52 km.

The Government was to spend 341 million pesos on rehabilitating the railway system during 1977-78.

ROADS

In 1974 Bolivia had 37,313 km. of roads, 1,163 km. of which were paved and another 6,560 km. of which were all-weather roads. Almost the entire road network is concentrated in the *altiplano* region and the Andes valleys.

The Five-Year Plan (1976-80) includes an ambitious programme to provide highways in rural areas, especially the province of Beni. There are plans to consolidate the La Paz-Santa Cruz highway, by completing its middle section between Oruro and Cochabamba, and to asphalt the Bolivian section of the Pan-American highway. The most important projected new road will be the Carretera Interoceánica to link Arica on the Pacific with Santos on the Atlantic via Tambo, Quemada, Cochabamba, Santa Cruz and Corumbá.

T.I.S.A. International: Bozo 167, Plaza Alonso de Mendoza, P.O.B. 6594, La Paz; international bus services; bus charter; car and bus hire; tours; Pres. ALEJANDRO HERRERA BUSTAMANTE; Gen. Man. ARMAND SAM SCHLEKER.

INLAND WATERWAYS

By agreement with Paraguay in 1938 (confirmed in 1939) Bolivia has an outlet on the River Paraguay. This

arrangement, together with navigation rights on the Paraná, gives her access to the River Plate and the sea. The River Paraguay is navigable for vessels of 12-foot draught for 288 km. beyond Asunción in Paraguay and for smaller boats another 960 km. to Corumbá in Brazil.

In 1974 Bolivia was granted free duty access to the Brazilian coastal ports of Belém and Santos and the inland ports of Corumbá and Port Velho. In 1976 Argentina granted Bolivia free port facilities at Rosario on the River Paraná. Most of Bolivia's foreign trade is handled through the ports of Matarani (Peru); Antofagasta and Arica (Chile), Rosario and Buenos Aires (Argentina) and Santos (Brazil).

Bolivia has over 14,000 km. of navigable rivers which connect most of Bolivia with the Amazon basin.

Bolivian River Navigation Company: f. 1958; services from Puerto Suárez to Buenos Aires (Argentina).

CIVIL AVIATION

Bolivia has 30 airports including the two international airports at La Paz and Santa Cruz. In 1974 air transport accounted for 25 per cent of cargo carried compared with 7 per cent by rail.

BOTSWANA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Botswana lies between the Republic of South Africa to the south and east, Rhodesia to the north-east and Namibia (South West Africa) to the west and north. A short section of the northern frontier adjoins Zambia. The climate is generally sub-tropical, with hot summers and an average annual rainfall of 45 cm. The territory is largely near-desert, and most of the population lives along the eastern border by the main railway line. The languages used are Tswana and English. The chief religion is Christianity. The national flag (proportions 3 by 2) consists of a central horizontal band of black edged with white, between bands of azure above and below. The capital is Gaborone.

Recent History

Formerly one of the British High Commission Territories in southern Africa, the Bechuanaland Protectorate became internally self-governing in March 1965 and, as Botswana, attained full independence within the Commonwealth on September 30th, 1966. The Prime Minister, Sir Seretse Khama, became the country's first President at independence.

Political life has been dominated by Sir Seretse Khama's Botswana Democratic Party (BDP) which won the general elections in 1965, 1969 and 1974, with little real opposition. A liberal conservative, Sir Seretse has consolidated his leadership of the country over the years while pursuing a national programme of democracy, development, self-reliance and unity.

New-found mineral wealth is stimulating the transition from a predominantly rural to a mixed economy, as well as creating new problems for the country. Growth of the urban at the expense of the rural sector, unequal distribution of capital and incidents of labour unrest and criticism of the public services present obstacles for development. In 1977, following a three-year study of 1,800 rural households, Mr. Derek Hudson of the Bank of Botswana claimed that Botswana has one of the most unequal distributions of wealth in the world. The survey revealed that, while 1 per cent of the rural population had annual incomes of 7,000 pula or more, for half of rural households the figure is less than 630 pula. Nevertheless, Botswana has won increasing respect for its stability of government, non-racialism and democratic practice.

In southern African politics, Botswana occupies a delicate position which is reflected in a foreign policy of moderation and non-alignment. While openly critical of the social and political structures in the neighbouring white-ruled countries, it depends heavily upon them for its trade and communications. Sir Seretse has maintained a firm attitude of opposition by refusing financial aid and diplomatic relations, and by repeatedly denouncing *apartheid* and accepting political refugees. The decision to open the border with Zambia and the establishment of full diplomatic relations with the Soviet Union and the People's Republic of China further strengthened Botswana's political independence from South Africa.

Sir Seretse played a leading role in the attempts to encourage a peaceful solution to the constitutional problems of Rhodesia and Namibia but the continuing failure of negotiations for a peaceful transition to black majority rule in either country and repeated incursions into Botswana by members of the Rhodesian security forces have caused the President to adopt a more sympathetic attitude to the armed struggle. Tension was also heightened by the influx of black Rhodesians—an estimated 15,000 between January and July 1977—into Botswana. Many were young ZAPU recruits on their way to Zambia. In 1977 the Police Mobile Unit was expanded to become the Botswana Defence Force, although an offer of military assistance from the U.S.S.R. was rejected, and contingency plans were formulated to nationalize the vital Rhodesian-owned railway if communications became disrupted. Botswana's economic reliance on Rhodesia and South Africa will decrease when it withdraws from the customs union with South Africa and nationalizes the railway.

Government

Legislative power is vested in the National Assembly, with 38 members holding office for five years, including 32 elected by universal adult suffrage. Executive power is vested in the President, elected by the Assembly for its duration. He appoints and leads a Cabinet which is responsible to the Assembly. The President has powers to delay implementation of legislation for six months; and certain matters also have to be referred to the 15-member House of Chiefs for approval though they have no power of veto. Local government is effected through nine district councils and three town councils (Gaborone, Lobatse and Francistown).

Defence

Botswana established a permanent Defence Force in 1977 and intends to increase its strength to 2,000 men by January 1978. In November 1977 it was announced that Botswana intends to form a small air force.

Economic Affairs

The economy is based chiefly on livestock raising and agriculture which provide a livelihood for 85 per cent of the population and which, until about 1971, were the source of almost all the country's exports. The predominant cattle industry depends on the periodic renewal of the agreement whereby the EEC rebates 90 per cent of its levies on Botswana's vital beef exports to the United Kingdom. The expansion of the national herd—to 2.6 million head in 1976—has led to risks of over-grazing and soil erosion. The Government's Tribal Land Grazing Policy is intended to safeguard against these, but has been criticized for favouring wealthy cattle-owners.

The fastest growing economic sector is mining, which already provides a major source of exports and revenues, although, with the exception of diamonds, production has not yet reached the expected levels. In addition to the established extraction of asbestos, manganese, coal, copper, copper-nickel and diamonds, deposits of brine, soda-

Introductory Survey

ash, salt, sodium sulphate, potash, talc and gypsum have still to be developed.

The Selebi-Pikwe copper and nickel operation, in which the Government has a 15 per cent share, began production in 1974. More than 40 million metric tons of ore were located and potential output was estimated at 46,000 tons of copper-nickel matte per year. Full capacity was almost reached in 1977. The biggest deposit of diamonds outside the U.S.S.R. was discovered in 1967 at Orapa, in northern Botswana, and production began four years later. Annual output is expected to rise from 2.4 million carats in 1976 to 4.5 million carats in 1978. The nearby Letlhakane kimberlite pipes, which are smaller than the deposits at Orapa but contain higher quality diamonds, began production at the end of 1976 with an initial annual output of 200,000 carats, rising to 400,000 carats by 1980. In July 1975 the Government increased its equity stake in the diamond operations from 15 to 50 per cent. Its share of the profits rose from 57.5 to 77.5 per cent. In January 1978 the Government reached agreement with De Beers for the exploitation of the high-grade kimberlite pipes at Jwaneng in southern Botswana.

The manufacturing sector is restricted to the processing of meat, beer and minerals although there are plans for expansion which will allow for the manufacture of soda ash. Botswana, with Lesotho and Swaziland, is linked to South Africa in a customs union but the establishment of its own currency and central bank in August 1976 is an indication of its growing economic self-confidence. The budget has shown a surplus since 1973 and current expenditure of P73.3 million and revenues totalling P94.2 million were announced for the 1977/78 budget, with P65.8 million for development, most of which will go towards the Accelerated Rural Development Programme, education and road construction schemes. However, since 1976 large sums have had to be diverted from development programmes to pay for additional security measures.

At the end of 1977 the economy was suffering from inflation and reduced foreign aid and investment. The latter was curtailed partly because of reduced world commodity prices and because of the equity stake demanded by the Government, but mainly because of the uncertain political situation in southern Africa.

Botswana's trade deficit, which goes back to 1962, remains considerable, as the rapid growth of mineral exports has been accompanied by an increased demand for imported manufactured goods and machinery. Development is also hampered by frequent drought, inadequate internal and external communications and a shortage of trained manpower. In the long term, the economic outlook is promising in view of Botswana's highly developed beef industry and its vast mineral resources which offer excellent prospects for the growth of ancillary industries, employment opportunities and economic diversification.

Transport and Communications

Communications are largely undeveloped and the lifeline of the country is the railway between South Africa and Rhodesia which is owned and operated by Rhodesia Railways. There are several airfields served by government and

private charter companies. In the north the Okavango River represents the only major source of water, one which it has not yet proved possible to exploit, either for irrigation or transport. A large road development plan is under way. In 1977 the Botswana-Zambia (Bot-Zam) highway from Nata to Kazungula was completed. The road offers increased opportunities for trade with Zambia, and connects the remote north of the country with the more populated south.

Social Welfare

Health services are being developed, and in September 1976 there were 13 general hospitals, one mental hospital, 7 health centres, 179 health posts and 81 clinics. Treatment is free for children under eleven years of age.

Education

In 1977 there were 137,000 pupils in primary schools, mostly financed by district councils, assisted by Government grants in aid. In addition, 16,059 students received secondary education, and 520 students received higher education at the University of Botswana and Swaziland in Botswana. Literacy in Tswana is about 25 per cent, and in English just over 15 per cent. The Government aims to provide free education by 1980. A major problem remains the shortage of jobs in Botswana outside the agricultural sector, despite the present mining boom.

Tourism

There are eight game reserves, including Chobe, only a short drive from Victoria Falls by first-class roads. Most of the main centres of population have hotels, and photographic and big-game safaris can be organized. Despite lack of infrastructure and the security problems associated with southern Africa, Botswana attracted 65,000 holiday visitors and 10,000 day trippers in 1976, mostly from South Africa.

Visas are not required to enter Botswana by nationals of Commonwealth countries, Austria, EEC countries, Finland, Greece, Iceland, Israel, Liechtenstein, Norway, San Marino, South Africa, Sweden, Switzerland, the U.S.A. and Uruguay.

THE CONSTITUTION

The current Constitution of Botswana came into operation in September 1966.

EXECUTIVE

President

Executive power lies with the President of Botswana, who is also Commander-in-Chief of the armed forces. Election for the office of President is linked with the General Election of members of the National Assembly. Presidential candidates must receive at least 1,000 nominations. If there is more than one candidate for the Presidency, each candidate for office in the Assembly must declare which presidential candidate he supports. The candidate for President who commands the votes of more than half the elected members of the Assembly will be declared President. If the Presidency falls vacant the members of the National Assembly will themselves elect a new President. The President will hold office for the duration of Parliament. After the 1974 elections the President became an ex-officio member of the assembly.

Cabinet

There is also a Vice-President, whose office is Ministerial. The Vice-President is appointed by the President, and acts as his deputy in the absence of the President. The Cabinet consists of the President, the Vice-President, and ten other Ministers appointed by the President. Every member of the Cabinet accepts responsibility before the National Assembly for the policies of the Government.

LEGISLATURE

The legislative power is vested in Parliament, consisting of the President and the National Assembly, acting after consultation in certain cases with the House of Chiefs. The President may withhold his assent to a Bill passed by the National Assembly, but if it is again presented to him after six months, he is required to assent to it unless he dissolves Parliament within 21 days.

House of Chiefs

The House of Chiefs has the Chiefs of the eight principal tribes of Botswana as *ex officio* members, 4 members elected by sub-chiefs from their own number, and 3 members elected by the other 12 members of the House. Bills and motions relating to chieftaincy matters and alterations of the Constitution must be referred to the House, which may also deliberate and make representations on any matter, including Bills affecting tribal interests.

National Assembly

The National Assembly consists of the Speaker, the Attorney-General, who does not have a vote, 32 elected members and 4 specially elected members. There is universal adult suffrage. The life of the Assembly is five years.

The Constitution also contains a code of human rights, enforceable by the High Court.

TRANSPORT

RAILWAYS

The main railway line from Cape Town to Rhodesia passes through the country entering at Ramatlabama

Trade and Industry, Transport, Tourism, University

and leaving at Ramaquabane (246 km.) reaching Rhodesia at Bakaranga. Two new railway lines to serve the Selebi-Pikwe mining complex and the Morupula colliery were completed in June 1973.

Rhodesia Railways: Bulawayo, Rhodesia; operate the railway system in Botswana.

ROADS

In 1974 there were 7,812 km. of maintained roads. Of these, 6,486 km. were earth roads, 1,107 km. were gravel roads and only 219 km. were bitumenized. The road between Lobatse and Francistown is being bitumenized. An American financed 400-mile road from Nata near Francistown to Kazungula was completed early in 1977. There are plans to spend P8.4 million on an 80-km. bitumenized road from Francistown to Serule. Zambia has installed a 50-ton ferry at Kazungula which has improved the ferry service between this politically vital area, the meeting place of the borders of Rhodesia, Botswana, Zambia and Namibia (South West Africa), and Livingstone in Zambia.

BRAZIL

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Federative Republic of Brazil, the fifth largest country in the world, lies in central and north-eastern South America. To the north are Venezuela, Colombia, Guyana, Surinam and French Guiana, to the west Peru and Bolivia, with Paraguay, Argentina and Uruguay to the south. Climatic conditions vary from the tropical rain forest of the Amazon basin to the savannah grasslands of the central and southern uplands. The language is Portuguese. Over 90 per cent of the population is Roman Catholic. The national flag (proportions 10 by 7) is green with a yellow diamond in the centre charged with a blue celestial globe. The capital is Brasília, though some administrative offices still remain in Rio de Janeiro.

Recent History

From 1930 to 1945, Brazil was ruled by the benevolent dictatorship of Dr. Getúlio Vargas. Under him, stability was maintained, despite strong undercurrents of both Fascist and Communist opposition, and his corporative state made steady economic progress. Vargas resigned in 1945 and in 1946 Eurico Dutra was elected President. Vargas was re-elected President in 1950, but failed to create the necessary stability and committed suicide in 1954. The next President was Dr. Juscelino Kubitschek, the founder of Brasília. President Kubitschek was succeeded briefly by Dr. Jânio Quadros in 1961 and then by the left-wing President João Goulart, who was overthrown by a military coup led by Gen. Humberto Castelo Branco in April 1964. Marshal Artur da Costa e Silva, who was elected President in October 1966, took office for a four-year term in March 1967. At this time a series of Institutional Acts were promulgated giving the President wide-ranging powers of government by decree.

In September 1969 President da Costa e Silva resigned, due to ill-health, and the Government was taken over by the three heads of the armed forces until October when Lieut.-Gen. Emílio Garrastazú Médici took office as President, having been elected by Congress under the new Constitution passed by the Government junta. Urban guerrilla activity was widespread during 1970 but was largely eliminated by stern security measures. General Ernesto Geisel, chosen by an electoral college as President, took office in March 1974. Despite his more liberal outlook, the opposition party, the MDB, made sweeping gains in the congressional elections of November 1974, and calls were made for an end to military government. General Geisel reaffirmed his intention to re-establish stable democratic institutions and considerably relaxed press censorship. However, in 1976 it was reported that political arrests and torture continued, and Church-State relations deteriorated late in the year. In November 1976 municipal elections were freely contested throughout Brazil. The Government party, ARENA, won overall despite significant opposition victories in nearly all the major State capitals.

In 1977 relations with the U.S.A. deteriorated over human rights issues and the question of Brazil's nuclear development. In April President Geisel closed Congress

for ten days after the MDB had blocked a bill to reform the judiciary. The President used his powers under Institutional Act 5 to reform the judiciary and institute various constitutional amendments by decree and later to remove José Alençar Furtado, the leader of the opposition in the Chamber of Deputies, from his post and strip him of his civic rights for ten years. In mid-1977 the first serious student unrest since 1968 took place and many were arrested. Various influential groups, including the MDB and some elements of the military, issued manifestos calling for a return to democracy. This resulted in further arrests and the censorship of foreign publications. In October divisions within the ruling élite over the presidential succession erupted with the dismissal of the hard-line candidate, Gen. Frola (Minister of the Army). In December President Geisel announced his intention to repeal the Institutional Acts but also declared that certain safeguards would be written into the constitution to defend order and democracy.

Government

Brazil has had a military-backed Government since the 1964 coup. Under the 1969 constitution the country is a federal republic comprising 21 States, four Territories and a Federal District (Brasília). In 1977 a new state was created, Mato Grosso do Sul. Legislative power is exercised by the bicameral National Congress, comprising the Chamber of Deputies (364 members elected for four years) and the Federal Senate (66 members elected in rotation for eight years). Election is by universal suffrage of literate adults (aged 18 or over) and voting is compulsory. Executive power is exercised by the President, elected for five years by an electoral college comprising all members of the National Congress and delegates from State legislatures. He appoints and leads the Cabinet. Each State has an appointed Governor and an elected legislature. Only two political parties have been legalized. Various amendments to the constitution were promulgated by presidential decree in 1977. From 1979 the President's term of office will be increased to six years.

Defence

Military service is compulsory for one year between the ages of 18 and 45. The armed forces consist of 271,800 men: army 180,000, navy 49,000 and air force 42,800. Public security forces number about 200,000 men. Defence expenditure in 1977 was 26,950 million cruzeiros.

Economic Affairs

Agricultural production provides a large proportion of Brazil's export earnings. In 1977 Brazil became the world's second largest exporter of agricultural products. The principal exchange earners are coffee, sugar and soya beans. Despite spectacular increases in soyabean production from 3.7 million tons in 1972 to 11 million tons in 1976, and very low coffee production due to the severe frosts in 1975, coffee regained its position as the top exchange earner in 1976 because of the world price boom. Other crops include cocoa, sisal, tobacco, maize and cotton.

Agricultural production rose by 4.2 per cent in 1976, compared with only 3 per cent in 1975.

Since the early 1960s increased emphasis has been laid on industrial development, and manufacturing accounted for over 25 per cent of Brazil's G.D.P. in 1974. In 1976 industrial production rose by 11 per cent. The Government's industrial policy includes self-sufficiency programmes in agro-chemicals, fertilizers, paper, cellulose, non-ferrous metals, steel, pharmaceuticals and petrochemicals. Steel is a fast-growing industry although the steel expansion programme was revised downwards in 1977 due to investment cutbacks. It is planned to increase steel production from 12 million metric tons in 1976 to 27 million tons in 1985. Brazil's largest shipyard, which can handle ships of up to 650,000 d.w.t., was opened in 1974 and it is planned to add another 150 ships to the Brazilian fleet by the 1980s. Brazil now has the world's fifth largest motor industry but, after years of growth, production fell in the first eight months of 1977 by 8 per cent due to the worsening economic climate.

Brazil possesses vast mineral reserves, the leading export being iron ore. Deposits at Serra dos Carajás, in Amazonia, are estimated to be the largest in the world: 18,000 million tons of over 66 per cent iron content. Production was due to start in 1979 but has been delayed until 1981 due to the withdrawal of various U.S. and Japanese interests; however, production should reach 12 million tons in 1982, rising to 50 million tons after five years. New mineral discoveries, including phosphates, uranium, manganese, copper and coal, are constantly being made but few reserves have been fully exploited. Less than 20 per cent of the nation's petroleum requirements are produced domestically and production fell slightly in 1976. However, the Campos offshore field, with estimated reserves of 600 million barrels, is due to start operating in 1978 at 45,000 barrels per day, rising to 230,000 in 1980, more than doubling total output. Foreign participation in oil exploration was allowed for the first time in 1976. Brazil relies on oil for 45 per cent of its energy needs, (but the Government is attempting to cut oil consumption in an effort to reduce its oil bill, which was U.S. \$3,500 million in 1976).

In 1976 90 per cent of all electric power was hydro-generated. Several important hydro-electric projects are under way, including the Itaipú project on the Paraná river which will increase Brazil's installed capacity to 63,600 MW by 1990. The project has been re-scheduled but should produce 12,600 MW by 1988. The Government aims to expand hydro-electric power so that it produces 32 per cent of electricity requirements in 1986, compared with 24 per cent in 1976, and to reduce oil-generated power from 44 per cent to 37 per cent. It is estimated that the nuclear programme will be producing 4 per cent of the nation's requirements in 1986. Following the discovery of two large uranium deposits, Brazil has signed a nuclear agreement with the Federal Republic of Germany under which eight nuclear power stations, with a total capacity of 10,000 MW, are to be built by 1990.

For eight years Brazil achieved a very high growth rate but was affected by the international economic recession in 1975. In 1976 economic growth accelerated again: the G.D.P. grew by 8.8 per cent, more than twice the increase

in 1975, but the inflation rate reached 46.3 per cent, the highest rate for ten years. In order to contain inflation and to reduce the current account deficit, the Government cut the 1977 investment budget by 40,000 million cruzeiros and introduced anti-inflationary measures, including monetary corrections, a prices and wages policy and a series of mini-devaluations. Further deflationary measures were announced in 1977 including a 12 per cent reduction in the 1977 imports by ministries and federal agencies. By the end of 1976 gross international reserves had increased to \$6,477 million, mainly due to a lower trade deficit (\$2,152 million, compared with \$3,513 million in 1975) and a higher rate of borrowing abroad. The foreign debt reached \$25,985 million in 1976, compared with \$21,171 million in 1975. Despite restrictive government policies to decelerate the economy and therefore ease the balance of payments and inflation problems, the economy was forecast to grow by 5-6 per cent in 1977. In the first half of the year the first trade surplus since the 1973 oil crisis was registered and inflation was reduced to under 40 per cent in the year ending August 1977.

The second Five-Year Development Plan (1975-79) aimed at improved social welfare and massive investment in industry, energy, transport, education and health. The sum of 716,000 million cruzeiros was to be invested in the Centre-South area which is to become the economic nucleus of the country. In 1976 heavy cutbacks in the Government's investment plans were announced, including a 40 per cent reduction in investments envisaged in the Plan. The main sectors affected were transport, communications and energy.

Brazil is a member of LAFTA and the Inter-American Development Bank.

Transport and Communications

Transport services are limited by jungles, rivers and mountains. Over large areas the aeroplane is the only practicable means of transport and Brazil has a large domestic network of internal air services. Highways are the principal mode of transport, accounting for 70 per cent of freight and 90 per cent of passenger traffic in 1974. Major projects include the 5,000-km. Trans-Amazonian Highway, running from Recife and Cabedelo to the Peruvian border, the 4,138-km. Cuiabá-Santarém highway which will run in a north-south direction and the 3,555-km. Trans-brasiliana project which will link Marabá on the Trans-Amazonian highway with Aceguá on the Uruguayan frontier. There are long-distance express bus services which play an important part in the scheme of public transport. Rivers are very important as a means of transport and 42,720 km. are navigable. The Amazon is navigable for 3,680 km. as far as Iquitos in Peru, and ocean-going ships can reach Manaus, 1,600 km. upstream. It is planned to lengthen and modernize the railway system in order to decrease reliance on the highway system.

Social Welfare

In 1960 the social security system was rationalized and in 1966 the National Institute for Social Security (INPS) was formed. However, in September 1977 a new system of social assistance, known as the Sistema Nacional de Previdência e Assistência, was introduced. It is to come into operation on July 1st, 1978, absorbing all existing

BRAZIL

social welfare institutions. In 1974, 43 million Brazilians received social security benefits compared with 13 million in 1960.

Education

Pre-elementary schooling is provided in urban areas for children up to 7 years old. Education is free in official primary schools and compulsory between the ages of 7 and 15. Secondary education is for three years; where necessary it is free, but a system of repayable grants is being encouraged, and the majority of secondary schools are private. The Federal Government is responsible for higher education and there are 63 universities and 740 other institutions of higher education, with a total of 889,000 students in 1974.

Although the high drop-out rate of children at elementary level is still a serious problem, illiteracy has steadily been reduced. A literacy drive (*Movimento Brasileiro de Alfabetização—Mobral*) was launched in 1971. The adult illiteracy rate fell from 35 per cent in 1970 to an estimated 26 per cent in 1973.

Tourism

Rio de Janeiro, with its famous beaches, is the centre of the tourist trade. Like Salvador, Recife and other towns, it has excellent examples of Portuguese colonial and modern architecture. The new capital, Brasília, incorporates a new concept of city planning and is the nation's showpiece. Other attractions are the Iguaçu Falls, seventh largest (by volume) in the world, and the tropical forests of the Amazon basin.

Visas are not required to visit Brazil by nationals of the following countries: Canada, EEC countries (except

Introductory Survey

Ireland), Greece, Liechtenstein, Morocco, Norway, Portugal, Spain, Sweden, Switzerland, U.S.A. and Latin American countries except Cuba.

Sport

Football is by far the most popular sport; basketball is the second great national sport, and tennis, water sports, golf, horse racing and recently underwater fishing are also popular.

Public Holidays

1978: March 24th (Good Friday), April 21st (Tiradentes Day), May 1st (Labour Day), September 7th (Independence Day), November 2nd (All Souls' Day), November 15th (Proclamation of the Republic), December 25th (Christmas Day).

1979: January 1st (New Year's Day), February 26th–28th (Carnival).

Local holidays: Rio de Janeiro: May 4th (Ascension), May 25th (Corpus Christi), November 2nd (All Souls' Day), December 8th (Immaculate Conception), January 20th (Foundation of Rio de Janeiro). São Paulo: as Rio de Janeiro and January 25th (Foundation of São Paulo).

THE CONSTITUTION

Brazil is a Federative Republic consisting of 21 states, one Federal District and four Territories indissolubly united under a representative form of government to constitute the Union. The Federal District is the capital of the Union.

The Union's competence includes maintaining relations with foreign states and making treaties with them, and taking part in international organizations; declaring war and making peace; decreeing a state of siege; organizing the armed forces, planning and guaranteeing national security, issuing currency; supervising credits, etc.; establishing national services, including communications, development and education services; legislating on the execution of the Constitution and federal services and on civil, commercial, penal, procedural, electoral, agrarian, maritime and labour law. The Union, States, Federal District and Municipalities are forbidden to make any distinction between Brazilians, establish any religious cults or churches against the public interest, and to deny public documents.

The Union may intervene in state affairs only in matters of extreme urgency, such as national security, and then only by Presidential decree. The States are responsible for electing their Governors by universal suffrage by direct secret ballot. The state law will decree the establishment of Municipalities, after due consultation with the local population; it will also decree the division of the States into districts; municipal organization may vary from state to state.

LEGISLATIVE POWER

The legislative power is exercised by the National Congress, which is composed of the Chamber of Deputies and the Federal Senate. Elections for deputies and senators take place simultaneously throughout the country; candidates for Congress must be Brazilian by birth, have full exercise of their political rights and be over twenty-one in the case of deputies and over thirty-five in the case of senators. Congress meets twice a year in ordinary sessions, and extraordinary sessions may be convened on demand of a third of the members of either House or the President. Each Chamber arranges its own internal procedure.

The *Chamber of Deputies* is made up of representatives of the people, elected by direct secret ballot by men and women over 18 years of age, for a period of four years. The number of inhabitants determines the number of deputies per state. Each Territory will have one deputy.

The *Federal Senate* is composed of representatives of the States, elected by direct secret ballot. Each State will elect three senators with a mandate for eight years, with elections after four years of one-third of the members and after another four years of the remaining two-thirds. Each Senator is elected with his substitute. The Senate approves, by secret ballot, the choice of Magistrates, when required by the Constitution; of the Attorney-General of the Republic, of the Ministers of the Accounts Tribunal, of the Governor of the Federal District, of the Territorial Governors and of the permanent heads of diplomatic missions.

The *National Congress* is responsible for legislating on all matters within the competence of the Union; national and regional plans and programmes, the strength of the armed forces in times of peace and territorial limits. Both houses vote on the budget in joint session. It is also responsible for making definitive resolutions on Presidential treaties, authorizing the President to leave the country; to declare war, to approve boundary changes in the States or Territories. The Executive power must send any bills proposed by the President to the National Congress within

fifteen days of signing. Constitutional amendments must be proposed by at least a third of the total number of members of both houses or by the President. Amendments are ratified by a simple majority. No changes may be made to the Constitution during a state of siege. Any Presidential bill must be considered by Congress within forty-five days if so requested by the President. The President is exclusively responsible for legislation concerning finance, creating new public offices, etc., matters concerning the administration of the Federal District and the Territories.

EXECUTIVE POWER

Executive power is exercised by the President of the Republic, aided by the Ministers of State. Candidates for the Presidency and Vice-Presidency must be Brazilian-born, be in full exercise of their political rights and be over thirty-five years of age. The President and Vice-President will be elected by a simple majority in open session by an electoral college composed of all members of the National Congress and delegates appointed by the State Legislatures on the basis of three for each state and one more for each 500,000 voters registered in the state. The President holds office for a term of five years and is not eligible for re-election. If the President violates any of his responsibilities he may be impeached by a two-thirds majority of the Deputies and judged by the Supreme Tribunal or the Senate according to the nature of his crime.

The Ministers of State are chosen by the President and their duties include carrying out the President's decrees, expediting instructions for the enactment of laws, decrees and regulations, and presentation to the President of an annual report of their activities.

National security is the responsibility of every citizen. There is a National Security Council, composed of the President and the Vice-President of the Republic, all the Ministers of State and the Chiefs of Staff of the armed services.

JUDICIAL POWER

Judicial power in the Union is exercised by the Supreme Federal Tribunal; the Federal Recourse Tribunals and federal judges; Military Tribunals and judges; Electoral Tribunals and judges; Labour Tribunals and judges; and State Tribunals and judges. Judges are appointed for life; they may not undertake any other employment, receive any percentages from cases tried by them or engage in any party political activity. The Tribunals elect their own presidents and organize their own internal structure.

The *Supreme Federal Tribunal*, situated in the Union capital, has jurisdiction over the whole national territory and is composed of eleven Ministers. The Ministers are nominated by the President after approval by the Senate, from Brazilian-born citizens, over the age of thirty-five, of proved judicial knowledge and experience.

POLITICAL AND PERSONAL RIGHTS

Registration and voting are compulsory for all Brazilian citizens over the age of eighteen except those who are illiterate or unable to express themselves in the national language or are temporarily or definitively deprived of political rights. The organization of political parties is regulated by federal law, with the guarantee of the fundamental rights of man. Congressional representation is achieved when five per cent of the total electorate votes for one party, with a minimum of seven per cent in each of seven states.

All citizens are equal in the eyes of the law, regardless of sex, race, employment, religion or political convictions; any racialism will be prosecuted; there is no death penalty (except under military legislation in case of external war), no life imprisonment, banishment or confiscation of property. Rights concerning citizens' life, liberty, security and property are inviolable.

The President may declare a state of siege in cases of serious breaches of order or the likelihood of their occurring; or war. Except in cases of war, the state of siege may not last longer than sixty days, with the possibility of extension with the approval of Congress. During a state of siege Congress may suspend constitutional guarantees, and also the immunity of federal deputies and senators.

The Constitution also lays down principles of economic and social order, concerning freedom of enterprise, dignity of human labour, social function of ownership, harmony and solidarity in production, economic development and repression of abuse of economic power. Strikes are not permitted in public services and essential activities, as defined by law. The constitution lays down certain rights for workers, including limited hours of work, paid holidays and social welfare benefits; voting in trade union elections is compulsory.

The law protects family life; education is the right of all, with equal opportunity. Education will be organized by the States and the Federal District and the Union will give technical and financial assistance to develop education.

In April 1977 the following constitutional amendments were promulgated by presidential decree:

1. The presidential term of office is to be increased from five to six years as from the expiry of the present incumbent's term, March 15th, 1979, and the date for presidential nominations has been brought forward from January 1979 to October 1978.

2. Henceforth, constitutional amendments must be approved by Congress by a simple majority, not the two-thirds majority as at present.

3. From 1978 state governors and one-third of the seats in the Senate are to be elected indirectly by electoral colleges comprising members of the state assemblies and municipal councils. Those elected (including mayors) in November 1976 are to hold office until 1982 instead of 1980.

4. Federal deputies are to be allocated on the basis of population and not on the number of registered voters as before.

5. Non-budgetary tax measures will no longer require congressional approval.

6. No election candidates are to be allowed to appear on radio or television to discuss campaign issues.

In December 1977 the Senate approved rules for allowing marriages to be dissolved. Brazilian citizens will be able to apply for one divorce only during their lifetime. In the case of a marriage partner becoming mentally ill, divorce proceedings cannot begin until five years after the illness has been proved.

POLITICAL PARTIES

A Political Parties Statute, the *Lei Orgânica dos Partidos Políticos*, was signed by the President on July 21st, 1971. It prohibited the establishment of organizations whose programmes were in conflict with the "principles of the democratic régime", or of any party unless it had the support of 5 per cent of the voters who took part in the latest general elections, spread over at least seven states. The following are the only two legal parties:

Aliança Renovadora Nacional (ARENA): Câmara dos Deputados, Palácio do Congresso Nacional, 70.000 Brasília, D.F.; f. 1966; pro-Government Party; Pres.

FRANCELINO PEREIRA; Leader in Senate EURICO REZENDE, in Chamber of Deputies JOSÉ BONIFÁCIO; publ. *O Renovador*.

Movimento Democrático Brasileiro (MDB): Câmara dos Deputados, Palácio do Congresso Nacional, Brasília, D.F.; includes members of former Partido Trabalhista Brasileiro; Pres. ULISSES GUIMARÃES; Leader in Senate FRANCO MONTUORO; Presidential and Vice-Presidential candidates in 1973 ULISSES GUIMARÃES and BARBOSA LIMA SOBRINHO.

JUDICIAL SYSTEM

The judiciary powers of the State are held by the following tribunals: the Supreme Federal Tribunal, the Federal Tribunal of Recourses, the State Tribunals of Appeals, the Superior Military, the Electoral, and the Labour Tribunals; and by judges of other courts.

The Supreme Federal Court comprises eleven ministers, nominated by the President and approved by the Senate. It judges offences committed by persons exempt from appearing before the normal courts, such as the President, Ministers of State, its own members, judges of other courts, and chiefs of permanent diplomatic missions. It also litigates in disputes between the Union and the states, between the states, or between foreign nations and the Union or the states; disputes as to jurisdiction between justices and/or tribunals of the different states, including those of the federal district and of the territories; in cases involving the extradition of criminals, in certain special cases involving the principle of *habeas corpus*, and in other cases. It is also empowered to judge ordinary appeals in cases in which the Union is interested as plaintiff or defendant.

The Federal Tribunal of Recourses judges the cases in which the Federal Union has interest.

The Tribunals of Appeals, apart from their normal function as a court of appeal, can sit in judgment on their own members. The number of judges varies according to the judiciary organization of each state.

The organs of the Electoral Tribunal (the Superior Tribunal, the Regional Tribunals, and the electoral judges) register the names of political parties, fix the date of elections, supervise the listing of voters, and deal with all infractions of the electoral laws. The seven judges of the Superior Electoral Tribunal are chosen: two from the Supreme Federal Tribunal, two from the Tribunal of Appeals, one from the Tribunal of Justice of the Federal District and two by the President.

The functions of the Military Court are no more than the name implies. The Labour Tribunal deals with labour disputes.

Civil offenders usually come before the courts of the separate states and of the Federal District. Each state

BRAZIL

organizes its own judiciary system on the principles established in the Constitution, and appoints its own judges from those who have passed the State examination in law.

THE PRESS

The most striking feature of the Brazilian press is the relatively small circulation of newspapers in comparison with the size of the population. The newspapers with the largest circulations are *O Estado de São Paulo* (192,000), *Jornal do Brasil* (170,000) and *O Globo* (180,000). The low circulation is mainly due to distribution difficulties. In consequence there are no national newspapers.

The National Transport Plan envisages an expenditure of 83,200 million cruzeiros on railways, of which 67,000 million is to be spent before 1979. It is aimed to construct 2,500 km. of new track and to standardize the gauges over 500 km. Nine hundred kilometres of track is to be electrified and track improvement should cover 14,000 km.

ROADS

Departamento Nacional de Estradas de Rodagem (DNER) (*National Roads Development*): Avda. Pres. Vargas 522/534, Rio de Janeiro, RJ; f. 1945 to plan and execute federal road policy and to supervise state and municipal roads with the aim of integrating them into the national network; Dir. Eng. ADHEMAR RIBEIRO DA SILVA.

In 1976 there were 1,489,064 km. of roads in Brazil, of which 4.8 per cent were paved.

Brasília has been a focal point for inter-regional development, and paved roads link the capital with every region of Brazil. The building of completely new roads has taken place predominantly in the north. The east-west Trans-Amazonian highway was due for completion in 1974 but 10 per cent of it was still to be completed in late 1976.

According to the Second National Development Plan, the paved federal network alone will increase from 41,200 km. to 63,000 km. by 1979 while the unpaved federal roads will increase from 33,500 km. in 1974 to 45,800 km. by 1979.

INLAND WATERWAYS

River transport plays only a minor part in the movement of goods, carrying 1.44 million tons a year. However, since the mid-1960s there has been an average annual increase of 6.5 per cent. There are three major river systems, the Amazon, Paraná and the São Francisco, only the first of which is easily navigable. Plans have been drawn up to improve the inland waterway system and one plan is to link the Amazon and Upper Paraná to provide a navigable waterway across the centre of the country.

Companhia das Docas do Pará: Avda. Presidente Vargas 41, 2º, Belém, PA; administers the port of Belém; cap. 45m.; Dir.-Pres. Col. RAÚL DA SILVA MOREIRA.

Comissão Nacional de Energia Nuclear: Rua General Severiano, 90 Botafoga ZC-82, 20.000 Rio de Janeiro, RJ; f. 1956; Pres. HERVÁSIO GUIMARÃES DE CARVALHO.

Brazil's first nuclear power station is being built at Angra dos Reis, RJ. Its initial capacity will be 630 MW. and it is scheduled to come into operation in 1978. Two other plants, of 1,200 MW. each, have been commissioned and will be built at the same site with Brazilian participation, following an agreement between Brazil and the Federal Republic of Germany.

The 1977 budget of the CNEN amounted to Cr. 325,245,000 (U.S. \$21,683,000).

Research reactors: The following research reactors are in operation:

(IPR-RI) IPR-NUCLEBRAS, Belo Horizonte, MG: thermal power 250 kW.

(IEA-RI) IEA, São Paulo, SP: thermal power 10 MW.

(IEN-RI) IEN-NUCLEBRAS, Rio de Janeiro, RJ: thermal power 10 kW.

(URANIE) IPR-NUCLEBRAS, Belo Horizonte, MG (subcritical).

(RESUCO) CEN-UFPE, Recife, PE (subcritical).

(NC-9000) CTA, São José dos Campos, SP (subcritical).

(CAPITU) IPR-NUCLEBRAS, Belo Horizonte, MG (subcritical).

(SUBLIME) IME, Rio de Janeiro, RJ (subcritical).

(COBRA) IEN-NUCLEBRAS, Rio de Janeiro, RJ (planned).

A government-owned company, **Empresas Nucleares Brasileiras, SA (NUCLEBRAS)** was formed in 1974 (succeeding the Companhia Brasileira de Tecnologia Nuclear). Its main objectives are to establish fuel-cycle and NSSS industries to promote the transfer of nuclear and conventional technology to industries in Brazil and to pursue research and development programmes.

As a result of the Brazil-Federal Republic of Germany nuclear agreement signed in July 1975, four joint-ventures between Nuclebrás and German firms were established: NUCLAM (mining), NUCLEI (enrichment by the nozzle method), NUCLIN (engineering) and NUCLEP (heavy equipment).

Eletrobrás: Avda. Presidente Vargas 642-10º, Rio de Janeiro, RJ; a subsidiary, FURNAS, is building a 626 MW. atomic power plant due for completion in 1978.

Instituto de Energia Atômica: Cidade Universitária, C.P. 11049, Pinheiros, São Paulo, SP; divisions of nuclear physics, reactor physics, reactor operations and maintenance, radio-biology, radio-chemistry, nuclear metallurgy, nuclear engineering, chemical engineering; Dir.
